

OUTPATIENT PHARMACY (PSO)

MANAGER'S USER MANUAL

Version 7.0 December 1997

(Revised March 2012)

Department of Veterans Affairs – Product Development

Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists "All," replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

Date	Revised Pages	Patch Number	Description
03/12	i, <u>59, 62, 195a-</u> <u>195b, 248a-</u> <u>248b, 268, 269,</u> <u>270, 270a –</u> <u>270b, 293 – 297</u>	PSO*7*354	Add an option to the Maintenance menu Added Site Parameter Added Domain Name Server (DNS) and mail tracking information A file named PHARMACY AUTOMATED DISPENSING DEVICES added. A new multiple named OPAI added to DISPENSING SYSTEM PRINTER sub-file. Added the acronym and definition of ADD and OPAI to the Glossary (Niha Goyal, PM; John Owczarzak, Tech Writer)
02/2012	i-ii, iia-iib, v-xi, 12, 18, 30-31, 107, 126a-126b, 128, 133, 150, 150a-150n, 159, 198, 204-206, 209-211, 211a- 211b, 212-213, 213a-213b, 215- 216, 218, 218a- 218b, 219-220, 220a-220b, 221- 222, 222a-222b, 223-226, 226a- 226b, 227-229, 229a-229b, 230- 233, 234-236, 236a-236b, 237, 237a-237b, 238- 240, 242-243, 244a-244b, 245- 246, 276-277, 277a-277b, 278, 292s-292t, 293- 297, 300-301	PSO*7*385	Removed incorrect listing of View Additional Reject Info (ARI) action Added new actions Submit Multiple Actions (SMA) and Suspense Date Calculation (SMA) Added new option View ePharmacy Rx (VER) Added TRICARE and CHAMPVA examples of rejects on a new order Corrected earlier formatting errors Added signature alert Corrected typos Updated Service Code values Updated changed security key names Updated name of TRICARE CHAMPVA Bypass/Override Report Updated screen shots related to patch changes Updated wording based on reviewer feedback Added CHAMPVA functionality Added separate section to list changes to security keys Updated wording for ¾ Days Supply Hold Added rounding functionality for ¾ Days Supply Hold Added CHAMPVA to Glossary (S. Spence, PM; C. Smith, Tech Writer)

Date	Revised Pages	Patch Number	Description
10/2011	i-ii, v-xi, 6, 9, 12, 105, 135, 137, 147, 149, 178, 205, 207- 209b, 210, 212, 215-216b, 217- 218b, 219-220, 223-225, 227- 233b, 234-238, 240-244, 297, 299-301	PSO*7*359	Added new action View Additional Reject Info (ARI) Expanded ECME Numbers to twelve digits Updated screen shots related to patch changes Added TRICARE to Glossary Corrected typos Corrected formatting errors from 11/10 reissue (S. Chapter 1: Introduction

The Outpatient Pharmacy V. 7.0 package:

- Provides a method for managing the medications given to Veterans who have visited a clinic or who have received prescriptions upon discharge from the hospital.
- Automatically generates prescription labels, and prints refill request forms.
- Medication histories are kept online to permit checks for potential interactions.
- Profiles can be generated to assist the clinician in managing the patient's medication regimen.
- Management reports aid the pharmacy in controlling inventory and costs.

The primary benefits to the Veteran are the assurance that he or she is receiving the proper medication and the convenience of obtaining refills easily. The clinicians and pharmacists responsible for patient care benefit from a complete, accurate, and current medication profile available at any time to permit professional evaluation of treatment plans. Utilization, cost, and workload reports provide management cost controlling tools while maintaining the highest level of patient care.

A number of site parameters allow the individual Department of Veterans Affairs Medical Center (VAMC) to customize the package to meet local needs.

Documentation Conventions

This *Outpatient Pharmacy V. 7.0 Manager's User Manual* includes documentation conventions, also known as notations, which are used consistently throughout this manual. Each convention is outlined below.

Convention	Example
Menu option text is italicized.	There are eight options on the <i>Archiving</i> menu.
Screen prompts are denoted with quotation marks around them.	The "Dosage:" prompt displays next.
Responses in bold face indicate user input.	Select Orders by number: (1-6): 5
<enter> indicates that the Enter key (or Return key on some keyboards) must be pressed.</enter>	Type Y for Yes or N for No and press <enter></enter> .
<tab></tab> indicates that the Tab key must be pressed.	Press <tab></tab> to move the cursor to the next field.
Indicates especially important or helpful information.	Up to four of the last LAB results can be displayed in the
Indicates that options are locked with a particular security key. The user must hold the particular security key to be able to perform the menu option.	This option requires the security key PSOLOCKCLOZ.

Getting Help

?, ??, ??? One, two or three question marks can be entered at any of the prompts for online help. One question mark elicits a brief statement of what information is appropriate for the prompt. Two question marks provide more help, plus the hidden actions, and three question marks will provide more detailed help, including a list of possible answers, if appropriate.

Related Manuals

The following manuals are located on the VistA Documentation Library (VDL) at: <u>http://www.va.gov/vdl</u>.

Main Package Documentation:

- Outpatient Pharmacy V. 7.0 Release Notes
- Outpatient Pharmacy V. 7.0 Manager's User Manual
- Outpatient Pharmacy V. 7.0 Pharmacist's User Manual
- Outpatient Pharmacy V. 7.0 Technician's User Manual
- Outpatient Pharmacy V. 7.0 User Manual Supplemental
- Outpatient Pharmacy V. 7.0 Technical Manual/Security Guide

Additional Documentation:

Additional documentation related to specific projects is also located on the VDL. For example, there may be several different Release Notes documents, which apply to specific projects. Also, there may be several sets of "Change Page" documents, which apply to changes made only for a specific package patch.

(This page included for two-sided copying.)

Chapter 2: List Manager

The screen displayed when processing an order has changed dramatically from the previous version of Outpatient Pharmacy (e.g., v. 6.0). The new screen was designed using List Manager.

This new screen gives more information and easier accessibility to vital reports and areas of a patient's chart.

Please take the time to read over the explanation of the screen and the actions that can now be executed at the touch of a key. This type of preparation before attempting to use List Manager will reduce the time and effort needed to become skilled in order processing with this new version of List Manager.

- DC Discontinued via backdoor Pharmacy

The Status column will also display some additional discontinue type actions performed on the order. The codes and the action they represent are as follows:

- DF Discontinued due to edit by a provider through CPRS
- DD Discontinued due to death
- DA Auto discontinued due to admission

A "B" will be appended to the above statuses if the Bad Address Indicator was set and there was no active temporary address at the time of the last label activity.

CMOP Indicators:	 There are two separate indicators when the drug in an order is marked for Consolidated Mail Outpatient Pharmacy (CMOP) processing. This indicator is displayed after the Order Status if applicable. > Drug for the prescription is marked for CMOP T Displayed when the last fill is either in a Transmitted or Retransmitted CMOP state. (This indicator can overwrite the ">" indicator. 		
Copay Indicator:	A "\$" displayed to the right of the prescription number indicates the prescription is copay eligible.		
ePharmacy Indicator	An 'e' displayed to the right of the prescription number indicates that the prescription is electronic third-party billable.		
Return to Stock Indicator:	An "R" displayed to the right of the Last Fill Date indicates the last fill was returned to stock.		
Pending Orders:	Any orders entered through Computerized Patient Records System (CPRS), or another outside source, that have not been finished by Outpatient Pharmacy.		
Non-VA Meds Orders:	Any over the counter (OTC) medications, herbal supplements, medications prescribed by providers outside the VA, and medications prescribed by the VA, but purchased by the patient at an outside pharmacy are displayed here. Non-VA Meds orders cannot be placed or updated in Outpatient Pharmacy. The user can input information about a patient's use of Non-VA Meds only through CPRS. However, the user can use either CPRS or Outpatient Pharmacy menu options to view Non-VA Meds data in a patient's medical records.		

Third Party Rejects Any prescriptions that are rejected by third-party payers because of Refill Too Soon (code 79) or Drug Utilization Review (DUR - code 88) are displayed in this section.

Example: Showing Rejected Prescriptions

Using List Manager with Outpatient Pharmacy

List Manager is a tool designed so that a list of items can be presented to the user for an action.

For Outpatient Pharmacy, the List Manager does the following:

- Allows the pharmacist or technician to browse through a list of actions
- Allows the pharmacist or technician to take action against those items
- Allows the user to select an action that displays an action or informational profile
- Allows the user to select a different action without leaving an option.

Entering Actions

Actions are entered by typing the name(s), or synonym(s) at the "Select Item(s)" prompt. In addition to the various actions that may be available specific to a particular option, List Manager provides generic actions applicable to any List Manager screen. A double question mark (??) may be entered at the "Select Action" prompt for a list of all actions available. The following is a list of generic List Manager actions with a brief description. The synonym for each action is shown in brackets following the action name. Entering the synonym is the quickest way to select an action.

Action Next Screen [+]	Description Move to the next screen (may be shown as a default).
Previous Screen [-]	Move to the previous screen.
Up a Line [UP]	Move up one line.
Down a Line [DN]	Move down one line.
Shift View to Right [>]	Move the screen to the right if the screen width is more than 80 characters.
Shift View to Left [<] characters.	Move the screen to the left if the screen width is more than 80
First Screen [FS]	Move to the first screen.
Last Screen [LS]	Move to the last screen.

Action Go to Page [GO]	Description Move to any selected page in the list.
Re Display Screen [RD]	Redisplay the current.
Print Screen [PS]	Prints the header and the portion of the list currently displayed.
Print List [PL]	Prints the list of entries currently displayed.
Search List [SL]	Finds selected text in list of entries.
Auto Display (On/Off) [ADPL]	Toggles the menu of actions to be displayed/not displayed automatically.
Quit [QU]	Exits the screen (may be shown as a default).

Outpatient Pharmacy Hidden Actions

The Outpatient Pharmacy hidden actions will display with the previous hidden actions once a completed or finished order is selected and a double question mark (??) is entered at the "Select Action:" prompt.

The following hidden actions appear on the Medication Profile screen and can only be applied to one order at a time.

Action Activity Logs [AL]	Description Displays the Activity Logs.
Copy [CO]	Allows the user to copy and edit an order.
DIN	Displays available drug restriction/guideline information for the Dispense Drug and Orderable Item associated with the selected medication order.
Intervention Menu [IN]	Intervention menu allows the user to enter a new intervention or delete, edit, print, and view an existing intervention.
Hold [HD]	Places an order on a hold status.
Other OP Actions [OTH]	Allows the user to choose from the following sub-actions: Progress Note [PN], Action Profile [AP], Print Medication Instructions [MI], Display Orders' Statuses [DO], or Non-VA Meds Report [NV].

Action Patient Information [PI]	Description Shows patient information, allergies, adverse reactions, and pending clinic appointments.
Pull Rx [PP]	Action taken to pull prescription(s) early from suspense.
Reprint [RP]	Reprints the label.
View Reject [REJ]	Allows the user to view and resolve the Refill Too Soon or Drug Utilization Review returned by the third party payer for a specific prescription/fill claim.
Unhold [UH]	Removes an order from a hold status.
Verify [VF]	Allows the pharmacist to verify an order a pharmacy technician has entered.

Speed Actions

These Outpatient Pharmacy actions are referred to as "speed actions" and appear on the Medication Profile screen. These actions can be applied to one or more orders at a time.

Action Reprint [RP]	Description Reprints the label.
Renew [RN]	A continuation of a medication authorized by the provider.
Refill [RF]	A second or subsequent filling authorized by the provider.
Reprint Signature [RS]	Reprints the signature log.
Discontinue [DC]	Status used when an order was made inactive either by a new order or by the request of a physician.
Release [RL]	Action taken at the time the order is filled and ready to be given to the patient.
Pull Rx [PP]	Action taken to pull prescription(s) early from suspense.
Inpat. Profile [IP]	Action taken to view an Inpatient Profile.
СМ	Action taken to manually queue to CMOP.
Fill/Rel Date Disply [RDD]	Switch between displaying the FILL DATE column and the LAST RELD column.
Display Remote [DR]	Action taken to display a patient's remote prescriptions.

Other Outpatient Pharmacy ListMan Actions

Action Exit [EX]	Description Exit processing pending orders.
AC	Accept.
BY	Bypass.
DC	Discontinue.
ED	Edit.
FN	Finish.
Other Screen Actions	
Action Edit/Enter Allergy/ADR Data [EA]	Description Provides access to the Adverse Reaction Tracking package to allow entry and/or edit of allergy adverse reaction data for the patient. See the Adverse Reaction Tracking package documentation for more information on allergy/ADR processing.
Detailed Allergy Display [DA]	Displays a detailed listing of the selected item from the patient's allergy/ADR list. Entry to the Edit Allergy/ADR Data action is provided with this list also.
Patient Record Update [PU]	Allows editing of patient data such as SSN, birth date, address, phone, and outpatient narrative. Patient data can also be updated using the <i>Update Patient Record</i> menu option. If implementing Other Language Modifications, either can be used to set a patient's other language preference.
New Order [NO]	Allows new orders to be entered for the patient.
Exit Patient List [EX]	Exit patient's Patient Information screen so that a new patient can be selected.

Chapter 3: Using the *Outpatient Pharmacy Manager* Menu

This manual describes options available on the *Outpatient Pharmacy Manager* menu. This menu should be assigned to supervisors, package coordinators, and members of the Automated Data Processing (ADP)/Information Resources Management Service (IRMS) staff.

Example: Accessing the Outpatient Pharmacy Manager menu

Select OPTION NAME: **PSO MANAGER** Outpatient Pharmacy Manager Outpatient Pharmacy software - Version 7.0

The following options are available on the Outpatient Pharmacy Manager menu.

- Archiving...
- Autocancel Rx's on Admission
- Bingo Board...
- Change Label Printer
- Clozapine Pharmacy Manager...
- Copay Menu...
- DUE Supervisor...
- Enter/Edit Clinic Sort Groups
- External Interface Menu...
- Label/Profile Monitor Reprint
- Maintenance (Outpatient Pharmacy)...
- Medication Profile
- Output Reports...
- Pharmacy Intervention Menu...
- Process Drug/Drug Interactions
- Release Medication
- Return Medication to Stock
- Rx (Prescriptions)...
- ScripTalk Main Menu...
- Supervisor Functions...
- Suspense Functions...
- Update Patient Record
- Verification...

Patient Lookup

The ability to look up a patient by prescription number or wand a barcode with the prescription has been added to the patient lookup prompt on the following options.

- Patient Prescription Processing [PSO LM BACKDOOR ORDERS]
- *Medication Profile* [PSO P]
- *Rx (Prescriptions)* [PSO RX]
- Update Patient Record [PSO PAT]
- *Manual Print of Multi-Rx Forms* [PSO LM MULTI-RX PRINT]
- *ScripTalk Patient Enter/Edit* [PSO SCRIPTALK PATIENT ENROLL]
- Patient Address Changes Report [PSO ADDRESS CHANGE REPORT]
- List Prescriptions Not Mailed [PSO BAI NOT MAILED]
- Non-VA Meds Usage Report [PSO NON-VA MEDS USAGE REPORT]
- Enter New Patient [PSO BINGO NEW PATIENT]
- Action Profile (132 COLUMN PRINTOUT) [PSO ACTION PROFILE]
- Poly Pharmacy Report [PSOPOLY]

The help text for patient lookup reads as follows.

Enter the prescription number prefixed by a # (ex. #XXXXXX) or Wand the barcode of the prescription. The format of the barcode is NNN-NNNNNN where the first 3 digits are your station number. - OR -Answer with PATIENT NAME, or SOCIAL SECURITY NUMBER, or last 4 digits of SOCIAL SECURITY NUMBER, or first initial of last name with last 4 digits of SOCIAL SECURITY NUMBER Do you want the entire NNNNNNN-Entry PATIENT List?

Chapter 4: Using the Archive Menu Option

This chapter describes the options on the Archiving menu.

This menu is locked with the PSOA PURGE key. The PSOA PURGE key should be assigned to all persons responsible for performing these functions.

Archiving [PSO ARCHIVE]

The *Archiving* menu is used to build a data warehouse and manage resources by saving prescription data to external storage devices like tape, disk, or CD-ROM and then purging old prescriptions, typically those that have expired more than a year ago.

There are eight options on the Archiving menu:

- Find
- Save to Tape
- Tape Retrieval
- Archive to File
- File Retrieval
- Purge **> Out of order: Unavailable
- List One Patient's Archived Rx's
- Print Archived Prescriptions

Find

[PSO ARCHIVE FIND]

This option identifies prescriptions that have expired or have been canceled before the selected date; the default date given to the user is 360 days ago. As the *Find* option runs, it prints a dot on the screen for each prescription identified.

Save to Tape

[PSO ARCHIVE TAPE SAVE]

The *Save to Tape* option records all information about the archived prescriptions gathered by the *Find* option to magnetic tape. The tape must be opened for variable length records. The first part of the tape holds an index that lists alphabetically all patients for whom prescriptions are recorded on the tape and, for each patient, a list of his or her prescriptions.

Tape Retrieval

[PSO ARCHIVE TAPE RETRIEVE]

The *Tape Retrieval* option reads information from the tape and prints a summary of all prescriptions for the selected patient. This printed copy should be directed to a printer with 132-column width. Because the retrieval option reads the index first to find the patient, the tape must be rewound before each retrieval. It should be emphasized that this retrieval simply prints the information about the prescriptions. It does not restore this information to the on-line database.

Archive to File

[PSO ARCHIVE FILE SAVE]

The *Archive to File* option records all information about the archived prescriptions gathered by the *Find* option to a Host File Server (HFS) file. The first part of the file holds an index that alphabetically lists all patients for whom prescriptions are recorded and, for each patient, a list of his or her prescriptions. With the proper file name convention (e.g., ARC0797.TMP, ARC0897.TMP, etc.). These files can be grouped and stored on any medium on the operating system for long-term storage. Subsequently, the file can be deleted from the system, in effect producing a manageable data warehouse and freeing up system resources.

Any file name may be chosen for the archiving file. However, it is suggested that a naming convention be used to group the files for easier retrieval

Example: Archive to File

```
Select Outpatient Pharmacy Manager Option: ARCHiving
Select Archiving Option: ARCHIve to File
13 Rx'S will be archived. Ok to continue Y/N? NO// YES YES
Do you want a hardcopy of your archived prescriptions? NO// <Enter>
Host File Server Device: [Select Host File Server Device]
HOST FILE NAME: [Enter the unique name for the file.]
Recording information.....
Select Archiving Option:
```

File Retrieval

[PSO ARCHIVE FILE RETRIEVE]

This option reads information from the HFS file and prints a summary of all prescriptions for the selected patient. This printed copy should be directed to a printer with 132-column width. It should be emphasized that the file must be copied from the long-term storage medium back onto the system and that this retrieval simply prints the information about the prescriptions. It does not restore this information to the on-line database.

Example: File Retrieval

```
Select Archiving Option: FILE Retrieval
Host File Server Device: [Select Host File Server Device]
HOST FILE NAME: [Enter the unique name for the file.]
Output Device: [Select Print Device]
Do you want to print the file index? YES

Print Archived Prescriptions

[PSOARINDEX]

This option allows the user to print a list of archived prescriptions from the PHARMACY ARCHIVE file.

This chapter describes the option for canceling prescriptions for patient who are admitted as inpatients.

Autocancel Rx's on Admission [PSO AUTOCANCEL1]

Using the *Autocancel Rx's on Admission* option, a job can be tasked every night to cancel the outpatient prescriptions of patients who were admitted three (3) days previous. Enter the desired time to queue the job to run. The time set for the job to run can also be edited with this option. The job should be set to run at a time between 5:30 p.m. and 11:30 p.m. (or as convenient for the site).

Chapter 6: Using the Bingo Board Menu

This chapter describes the options available on the Bingo Board menu.

Bingo Board [PSO BINGO BOARD]

Pharmacy management uses the *Bingo Board* menu to control the bingo board functions. The bingo board notifies a patient that the prescription has been filled. This is accomplished by displaying the patient's name or a number on monitors located in the pharmacy and non-pharmacy (i.e., cafeteria) waiting areas.

The first prompts upon entering Outpatient Pharmacy are to enter the division and label printer. If more than one group has been defined, a prompt to enter a display group will appear. If only one group is defined, it is automatically selected and no prompt appears. If no display group is defined, it is assumed that the site is not set up to run bingo board.

The following options are available on the Bingo Board menu:

- BM Bingo Board Manager
- BU Bingo Board User

Bingo Board Manager (BM)

[PSO BINGO MANAGER]

The necessary options to set up the bingo board can be accessed through the *Bingo Board Manager* menu. Before data entry can begin, the division must be defined when entering the software package. Divisions are manager defined, but should be consistent with local policies in order to keep the statistical data relevant. At least one division must be defined.

After the division has been defined, the display parameters must be defined through the *Enter/Edit Display* option. The display group is a uniquely defined location where the patient data will be displayed. As with the division parameter, at least one display group must be defined.

Names now display differently on the bingo board. Names and ticket numbers can be displayed alphabetically in one column, and new names to the board will appear in reverse video for a user-defined amount of time. The user enters the time when creating a display group and it is stored in the GROUP DISPLAY file.

IRMS must set up a dedicated device to be used for the bingo board. Only devices with the sub-type C-VT can be entered at the "DISPLAY DEVICE" prompt. A DEC VT-220 with a coaxial output connected to a cable ready TV monitor is all that is needed on the hardware side.

The following options are available on the Bingo Board Manager menu:

- Enter/Edit Display
- Auto-Start Enter/Edit
- Print Bingo Board Statistics
- Print Bingo Board Wait Time
- Purge Bingo Board Data
- Start Bingo Board Display
- Stop Bingo Board Display

Enter/Edit Display [PSO BINGO ENTER/EDIT DISPLAY]

This option allows locations where the patient data will be displayed to be uniquely defined. Either a new display group name or the name of an existing group to edit or delete can be entered.

If the name is chosen at the "NAME/TICKET" prompt, the "TICKET #" prompt will not appear when a new patient is entered in the *Enter New Patient* option.

The display cannot be changed from name to ticket when patients are already in the Group Display. All patients must be purged using the *Purge Bingo Board Data* option for that Group Display. After the data is purged, the NAME/TICKET field must be edited using this option. Then the patient can be re-entered and ticket numbers assigned.

Example: Enter/Edit Display

Select Bingo Board Manager Option: Enter/Edit Display Select GROUP DISPLAY NAME: MAIN Are you adding 'MAIN' as a new GROUP DISPLAY (the 3RD)? Y (Yes) NAME: MAIN// < Enter> [The name of the Display Group.] NAME/TICKET: NAME NAME [Select either Name or Ticket # to display.] MESSAGE: 1>WEST CLINIC VAMC 2>[This is a free text field. The message will appear on the screen for the users to view.] EDIT Option: < Enter> TWO COLUMN DISPLAY: Y YES [Display names/ticket #'s in one or two column.] DISPLAY WAIT TIME: Y YES [Average display waiting time.] NORMAL WAIT TIME: 10 [Normal wait time (in minutes) is entered by the site.] DISPLAY SETUP HELP TEXT: Y YES In order to automatically start and stop the bingo board monitor, a dedicated device must be setup by your IRM Service Once a dedicated device is setup, the bingo board can be scheduled to automatically start and/or stop at user-defined times. -----example continues----- Example: Enter/Edit Display (continued)

Enter 'NO' at the DISPLAY SETUP HELP TEXT prompt to not display this help text. DISPLAY DEVICE: ? [Device dedicated by IRMS for bingo board setup.] Only devices with Sub-type starting with "C-VT" are allowed. Answer with DEVICE NAME, or LOCAL SYNONYM, or \$I, or VOLUME SET(CPU), or SIGN-ON/SYSTEM DEVICE, or FORM CURRENTLY MOUNTED DISPLAY DEVICE: [Select print device.] AUTO-START DISPLAY DEVICE: Y YES [Sets the display group to automatically start.] Do you want to initialize auto-start now? NO// Y YES Enter Start Time: ? Enter time as HH:MM in 12 hour format (For example, '8:00' or '8:00AM). Enter Start Time: 9:30am [Start time for the display group.] Enter Stop Time: 4:00pm [Stop time for the display group.]

A time that is at least two minutes in the future must be entered at the "QUEUED TO RUN AT WHAT TIME" prompt.

The software will convert it to today's date with the time entered. For example, to queue it to run later today and the current time is 8:00am, a time like 9:30am can be entered. It will default to today's date. To queue for tomorrow, enter a time like T+1@00:00am/pm. For example, to queue it for 8:30am and the current time is 3:00pm, T+1(or tomorrow's date)@8:30am must be entered.

If the local Outpatient Pharmacy only runs Monday-Friday, enter **D@00:00am/pm** (with D representing "Days of the Week) at the "RESCHEDULING FREQUENCY" prompt. For example, to queue it to run at 7:45am Monday through Friday, enter **D@7:45am**.

Auto-Start Enter/Edit [PSO BINGO INITIALIZE]

This option is used to change the start and stop times of the display groups that have been set up to automatically start and/or stop each day. The scheduling time and frequency can also be changed using this option.

Example: Auto-Start Enter/Edit

Select Bingo Board Manager Option: Auto-Start Enter/Edit You want to edit Display Group(s) Start/Stop times? NO// Y YES Select GROUP DISPLAY NAME: MAIN Enter Start Time: 3:00AM// <Enter> Enter Stop Time: 4:00PM// <Enter> Select GROUP DISPLAY NAME:

See the *Enter/Edit Display* option for an example of the auto-start screen. **Print Bingo Board Statistics [PSO BINGO REPORT PRINT]** With this option, a report can be generated covering a date range that can be sorted by single division or all divisions. Date ranges in the future are not allowed. The start date must be a date that precedes the end date.

The Bingo Board Report includes totals on number of patients, waiting time, and average waiting time.

Select Bingo Board Manager Option: Print 1 Print Bingo Board Statistics 2 Print Bingo Board Wait Time CHOOSE 1-2: 1 Print Bingo Board Statistics Start Date: 060907 (JUN 09, 2007) Ending Date: 070907 (JUL 09, 2007) Report all Divisions? Print Bingo Board Wait Time [PSO BINGO REPORT WAIT TIME]

This option allows a report to be printed that sorts the entries in the PATIENT NOTIFICATION (Rx READY) file by Display Group, then Wait Time. This report can be used to keep track of the bingo board activity for a given day. To keep a permanent record of this activity, this report can be printed each day, preferably at the end of the day. The following are definitions of the items found on this report.

Field	Description
Name	The name of the patient. For a patient with multiple entries, his/her name is printed only once.
Time In	The time that the patient's name was entered in the computer.
Time Out	The time that the patient's name was entered on the bingo board monitor.
Rx#	The prescription number.
Wait Time	The amount of time it took to fill the prescription. It is the difference between Time In and Time Out. For orders with more than one prescription, the wait time is the same for each.
Display	The Display Group that the entries were entered under. Multiple site hospitals may have multiple display groups set up to coincide with each site.
Total	A summation of all the Wait Times in the PATIENT NOTIFICATION (Rx READY) file. It includes the wait time of the patients with multiple entries. For example, if it took 3 minutes to fill each of the three prescriptions for OPPATIENT23,ONE, the Total function sums up the Wait Time as though it took 9 minutes.
Count	The number of Wait Time entries. It counts the number of wait time entries for each prescription, not each patient.
Mean	The average or middle value of the Wait Time range of values.
Minimum	The least Wait Time value in the range.
Maximum	The greatest Wait Time value in the range.
Dev. (Deviation)	A relative number which signifies the overall departure from the average.

If this report is not printed each day, data may be lost because many sites purge the PATIENT NOTIFICATION (Rx READY) file each morning.

Example: Print Bingo Board Wait Time

Select Bingo Board Option: BM Bingo Board Manager BINGO BOARD CONTROL PANEL Select Bingo Board Manager Option: PRINT 1 Print Bingo Board Statistics 2 Print Bingo Board Wait Time CHOOSE 1-2: 2 Print Bingo Board Wait Time DEVICE: [Select Print Device] (report follows) BINGO BOARD WAIT TIME PRINTOUT MAY 21,2007 15:34 PAGE 1 TIME TIME WAIT Rx# NAME IN OUT TIME _____ _____ DISPLAY: WAITING ROOM 15042004342150420043431504200434515122004346151220043501512200435415122002744151220063761512200637715072002403 OPPATIENT30,ONE 1503 1 1503 1 1503 1 1509 3 1509 3 OPPATIENT14, ONE 1509 3 OPPATIENT23, ONE 1509 3 1509 3 1509 3 15272002403152720060341527200236515272002572 OPPATIENT19, ONE 1524 3 1524 3 1524 3 OPPATIENT26,ONE 1524 3 ____ TOTAL 33 COUNT 13 MEAN 3 MINIMUM 1 3 MAXIMUM DEV. 1

Purge Bingo Board Data [PSO BINGO PURGE]

With this option all entries can be deleted from the PATIENT NOTIFICATION (Rx READY) file.

It is recommended that data be purged each day. However, if data is not purged, it will not affect the accuracy of the bingo board statistics.

If this option is used before the end of the workday, all data will be lost except the statistical data on those prescriptions already picked up.

Start Bingo Board Display [PSO BINGO START]

The *Start Bingo Board Display* option has been changed so that the bingo board can be started without tying up a terminal or requiring the user who starts it to have multiple sign-on capability. A site parameter has been added to indicate whether a dedicated device has been reserved. If so, the user is prompted to enter the device name. If a dedicated device is set up, the user is able to automatically start or stop the board via TaskMan. The user is also prompted for a Display Group that is saved as a site parameter. This option requires working with local IRMS to complete its setup.

Use this option to start the bingo board display. If there are no prescription entries yet, the message typed in the GROUP DISPLAY will cycle. When the entries begin, the message will be displayed and held for a period of time, then pages of numbers or names will be displayed until all the names have been shown. Then the cycle starts over.

The terminal that executes the option may or may not be the display terminal.

Stop Bingo Board Display [PSO BINGO STOP]

This option is used to stop the bingo board display. The bingo board can be stopped and started as often as desired. It must be stopped if any changes are made to the display group currently being used. This option can be accessed from any terminal.

When the display is stopped and "Yes" entered at the purge prompt, a second prompt displays and allows either all of the display groups or a specific display group to be selected for purging.

Bingo Board User (BU)

[PSO BINGO USER]

The *Bingo Board User* menu enables use of the bingo board display. The options on this menu allow a patient's name or a number to be displayed, entered, or removed from the bingo board display located in the pharmacy area.

When the routing for an order is set to "Window", the entering of prescription orders stores information in the bingo board PATIENT NOTIFICATION (Rx READY) file. For new, renew, pull early from suspense, refill orders, barcode refill/renew, and finish process for orders entered via CPRS, the date and time is captured when the order is stored in this file. The same occurs for partials, except the time is captured when a prescription number is entered.

Releasing the prescription places the name or ticket number of the patient on the bingo board monitor if a display group exists and stores data in the WAITING TIME file. The options on this menu are used to manually enter, display, or remove a patient's name or number from the monitor.

The following options are available on the Bingo Board User menu:

- Enter New Patient
- Display Patient's Name on Monitor
- *Remove Patient's Name from Monitor*
- Status of Patient's Order

Enter New Patient [PSO BINGO NEW PATIENT]

Use this option to manually enter the name of a new patient on the bingo board. Each prescription number for the patient's order must also be entered.

A "Ticket #" prompt displays if ticket number was chosen as the method of display in the *Enter/Edit Display* option on the *Bingo Board Manager* menu. The ticket number will be entered first, and at the next prompt each of the prescription numbers for that patient will be entered.

Display Patient's Name on Monitor [PSO BINGO DISPLAY PATIENT]

Use this option to begin displaying the name or number of a patient whose prescription is ready. The message, "PRESCRIPTIONS ARE READY FOR:" appears as fixed text on the display screen. This option displays the following reminder for ECME billable prescriptions: "*** This Pharmacy Rx requires a patient signature! ***"

Remove Patient's Name from Monitor [PSO BINGO DELETE PATIENT]

After the patient picks up the prescription, the name or ticket number can be removed from the display either manually or through the barcode reader. This option displays the following reminder for ECME billable prescriptions: "*** This ePharmacy Rx requires a patient signature! ***"

It is recommended that a patient's name be removed from the monitor as soon as the prescription is picked up.

Status of Patient's Order [PSO BINGO STATUS]

This option enables checking of the number of prescriptions a patient has ready, the division, time in/time out, and the prescription number(s). There are four possible statuses:

Status	Description
Pending	Active order input via CPRS that is in the PENDING OUTPATIENT ORDERS file.
Being Processed	Order that is in the PATIENT NOTIFICATION (Rx READY) file, but not displayed.
Ready For Pickup	Order that is in the PATIENT NOTIFICATION (Rx READY) file and is being displayed.
Picked Up	Order that has been picked up.

Example: Status of Patient's Order

```
Select Bingo Board User Option: Status of Patient's Order
Enter Patient Name: OPPATIENT17,ONE
                                         08-30-48 000123456
                                                                   NO
                                                                        NSC
VETERAN
        OPPATIENT17, ONE has the following orders for 10/31/06

Chapter 7: Changing the Label Printer

This chapter describes the Change Label Printer option.

Change Label Printer [PSO CHANGE PRINTER]

This option allows the user to change the printer to which labels are printed.

Select Outpatient Pharmacy Manager Option: Change Label Printer Select LABEL PRINTER: LABELPRT2// <Enter> LABELPRT2 OK to assume label alignment is correct? YES//<Enter> (This page included for two-sided copying.)

Chapter 8: Controlling the Dispensing of Clozapine

This chapter describes the options available through Outpatient Pharmacy for dispensing Clozapine.

Clozapine Pharmacy Manager

[PSOL MANAGER]

This option requires a security key, PSOLOCKCLOZ.

Use this menu to control the dispensing of Clozapine. The following options are available on this menu:

- Display Lab Tests and Results
- Edit Data for a Patient in the Clozapine Program
- List of Override Prescriptions
- Register Clozapine Patient

The manufacturer requires this dispensing information for Clozapine patients. All members of the Clozapine treatment team must be entered as users on the local system and must be given this key. All pharmacists who have the ability to override the lockouts in this option must also hold the key. These pharmacists should be identified by the pharmacy service representative of the Clozapine treatment team.

The following step must be taken before a prescription for Clozapine can be entered. If this information is missing, Clozapine prescriptions cannot be entered.

Any physician writing a prescription for Clozapine must have a DEA number or VA number entered in the NEW PERSON file. These can be added through the *Add New Providers* option on the *Supervisor's* menu. This must be done before the prescription is entered. The DEA or VA number cannot be entered during the new prescription entry process. With the release of YS*5.01*90, providers must also hold the YSCL AUTHORIZED security key.

When an order is placed, the system checks for the provider's DEA number or VA number first. If the provider does not have either, the following warning displays:

Provider must have a DEA# or VA#" to write prescriptions for clozapine

If the provider has either the DEA number or the VA number, then the software checks for the assignment of the YSCL AUTHORIZED key. If the provider has a DEA or VA number, but does not hold the YSCL AUTHORIZED key, the following warning displays:

Provider must hold YSCL AUTHORIZED key to write prescriptions for clozapine

Prescriptions for Clozapine are for 7-day, 14-day, or 28-day supply and allow zero to three refills, depending on patient-defined criteria. For a Clozapine prescription, the total daily dose must be entered. If the prescription is for pills to be taken at intervals, enter a number equal to the pill strength times the number of pills per day. If the prescription is for a dose pack, enter the daily dose specified by the dose pack. This entry should be between 12.5 and 900, in increments of 12.5 mg/day. If it is not, a prompt will display asking for the dosage to be confirmed.

Display Lab Tests and Results [PSOLAB LIST]

With this option, lab test results for patients receiving Clozapine can be displayed and monitored. This option should be assigned to all appropriate pharmacists. Monitoring lab test results is required by the Circular 10-90-059 regarding patient management protocol for the use of Clozapine and should be run as specified in the circular. Date ranges for prescription fills should be 7, 14, or 28 days and ranges for lab tests should be at least 30 days.

Edit Data for a Patient in the Clozapine Program [PSOL EDIT]

Use this option to edit data for a patient who has already been enrolled in the Clozapine treatment program. It is typically used to re-register a patient whose treatment has been discontinued and who has rejoined the program.

Local users cannot edit Patient Status within the Clozapine module.

There are two statuses, Pre-Treatment and Active Treatment, that can be selected. Two other statuses, Treatment on Hold and Discontinued, are set by the background job and require the patient to be reregistered.

The Pre-Treatment status is for a registered patient, but who has never received a prescription. If after four weeks (28 days prior to the start date listed for the data collection) the patient does not receive a prescription, the patient status is changed to Discontinued by the background job and the patient must be re-registered.

Patch YS*5.01*90 allows for a monthly prescription as well as weekly and bi-weekly. The Active status is for a patient that has had a prescription within the last 7, 14, or 28 days. If the most recent prescription is over 56 days old, the patient status is now automatically discontinued and the patient must be reregistered.

Sex, race, and ZIP Code should be registered for each patient through Medical Administration Service (MAS)/Business Management Office.

List of Override Prescriptions [PSOLIST OVERRIDES]

As described in Circular 10-90-059, a list of the Clozapine prescriptions entered can be generated by overriding the lockout. This option should be assigned to appropriate pharmacists and should be run weekly.

Register Clozapine Patient [PSOL REGISTER PATIENT]

This option is used to register patients authorized to receive Clozapine by VHA's National Clozapine Coordinating Center (NCCC). Data required by manufacturers of the drug Clozapine is entered into the PHARMACY PATIENT file through this option. Patients registered in this program must have a ZIP code, date of birth, race, and sex entered in the PATIENT file.

Messages for Clozapine Drug Selection

When the Clozapine drug has been selected, the following messages are introduced for dispensing Clozapine according to the scenarios shown in the examples below.

All messages are processed through communication with the Mental Health patch YS*5.01*90.

The "NEUTROPHIL MATURITY, MEAN (ANC) results" verbiage shown in these examples is for illustration only. This can vary, depending on the site definition for ANC calculation.

Example 1: Patient not registered (or not eligible) in the Clozapine program

Now doing drug interaction and allergy checks. Please wait...

Permission to dispense clozapine has been denied. Please contact the Director of the VA National Clozapine Coordinating Center (Phone: 214-857-0068 Fax: 214-857-0339).

Example 2: Patient discontinued from the Clozapine program

Now doing drug interaction and allergy checks. Please wait... *** This patient has been discontinued from the clozapine treatment program *** *** and must have a new registration number assigned *** Permission to dispense clozapine has been denied. Please contact the Director of the VA National Clozapine Coordinating Center (Phone: 214-857-0068 Fax: 214-857-0339).

Example 3: Clozapine Patient with no LAB work in the past 7 days or if labs are available which have not been entered in VistA, the site will receive the following warning

Now doing drug interaction and allergy checks. Please wait...

Permission to dispense clozapine has been denied. If the results of the latest Lab Test drawn in the past 7 days show WBC>3000/mm3 and ANC>1500/mm3 and you wish to dispense outside the FDA and VA protocol WBC/ANC limits, document your request to Director of the VA National Clozapine Coordinating Center (Phone: 214-857-0068 Fax: 214-857-0339) for a one-time override permission.

A CBC/Differential including WBC and ANC Must Be Ordered and Monitored on a Twice weekly basis until the WBC STABILIZES above 3500/mm3 and ANC above 2000/mm3 with no signs of infection.

Also make sure that the LAB tests, WBC and ANC are set up correctly in the Mental Health package using the CLOZAPINE MULTI TEST LINK option.

If the patient has paper documentation to prove laboratory tests were done (for example, outside the VA system) and the results were within accepted limits, the NCCC can authorize a onetime override. After the NCCC has received and approved this documentation, the following message will display.

Example 4: Onetime override authorized by NCCC

Now doing drug interaction and allergy checks. Please wait... Permission to dispense clozapine has been authorized by NCCC Override reason being: NCCC AUTHORIZED Do you want to override and issue this prescription? N// Example 5: When the Patient's WBC <3500 (range 3000 to 3500 for overriding)

Now doing drug interaction and allergy checks. Please wait... *** Most recent WBC and NEUTROPHIL MATURITY, MEAN (ANC) results *** performed on JUL 27,2006 are: WBC: 3100 ANC: 1900 *** Last Four WBC and ANC results were: WBC ANC 05/20/2006@14:53 Results: 4900 - 2800 05/27/2006@14:53 Results: 1900 - 2500 06/27/2006@14:53 Results: 3900 - 2500 07/27/2006@15:06 Results: 3100 - 1900 Override reason being: LAST WBC RESULT < 3500

Up to four of the last LAB results can be displayed in the message.

Example 6: When the Patient's WBC is above range but ANC <2000 (range 1500 to 2000 for overriding)

```
Now doing drug interaction and allergy checks. Please wait...
*** Most recent WBC and NEUTROPHIL MATURITY, MEAN (ANC) results ***
    performed on JUL 26,2006 are:
    WBC: 3900
    ANC: 1900
*** No previous results to display ***
Override reason being: LAST ANC RESULT < 2000
Do you want to override and issue this prescription? N//</pre>
```

In Example 6, previous LAB results did not exist.

Example 7: Patient meets all criteria

```
Now doing drug interaction and allergy checks. Please wait...
*** Most recent WBC and NEUTROPHIL MATURITY, MEAN (ANC) results ***
    performed on JUL 27,2006 are:
    WBC: 3900
    ANC: 2000
CLOZAPINE dosage (mg/day) ? : (12.5-3000):
```

Chapter 9: Handling Copay Charges

The copay status of a prescription is determined at the time of entry and re-evaluated every time a fill for that prescription is released. A prescription will be designated as exempt from copay under the following conditions:

- \checkmark The drug is marked as a supply item, nutritional supplement or for investigational use.
- ✓ The Rx Patient Status assigned to the prescription is exempt from copayment.
- \checkmark The Veteran is copay exempt based on income.
- \checkmark The medication prescribed is used in the treatment of:
 - A Service Connected (SC) condition
 - Combat Veteran (CV)
 - o Vietnam-era herbicide/Agent Orange (AO) exposure
 - o Ionizing Radiation (IR) exposure
 - o Southwest Asia Conditions
 - Shipboard Hazard and Defense (SHAD)
 - Military Sexual Trauma (MST)
 - Cancer of the Head and/or Neck (HNC)

The copay status of a prescription is re-evaluated whenever a fill is released. Various actions can occur based on changes to the criteria that determine the copay status of a prescription, including no action, automatic copay status reset, or a MailMan message generated detailing missing information required for user follow up.

Once a Veteran meets the designated annual copayment cap, subsequent fills for any prescriptions dispensed will not be charged a copay. Any fills for copay-eligible prescriptions entered after the cap is reached are not billed and are identified as potential charges. If editing the Days Supply of an Rx or returning an Rx fill to stock results in the total copayment of the Veteran to fall below the annual cap, Integrated Billing (IB) software shall initiate a copay charge for any fill that was identified as a potential charge until the annual cap is once again reached.

A user will be prompted to respond to any medication copay exemption questions that apply to the patient when entering a new prescription. Responses entered for the medication copay exemption questions are stored with the prescription and display as default values when an order is renewed, copied, or edited in such a way that a new order is created.

If none of the copay exemptions listed apply, the order is released as a copay prescription with no questions asked. (See "Patient Prescription Processing-New Order Entry," for a complete order entry example.)

Example: Entering an Rx for a patient with no applicable medication copay exemptions

Do you want to enter a Progress Note? No// <**Enter**> NO Rx # 559157 10/23/06 OPPATIENT24,ONE #30 TAKE ONE TABLET BY MOUTH EVERY DAY NIACIN (NIASPAN-KOS) 500MG SA TAB OPPROVIDER,ONE OPPHARMACIST,ONE # of Refills: 11 Is this correct? YES// If any medication copay exemptions apply to a patient when entering a new prescription, the applicable questions are displayed for the user to respond "Yes" or "No." The responses will be used to determine the copay status of the prescription. The prescription fill will not generate a copay charge when released if at least one of the responses is "Yes." Responses are required.

Example: An order with medication copay exemptions, but no responses entered

```
Rx # 3754648
                       10/24/06
OPPATIENT24, ONE
                              #30
APPLY SMALL AMOUNT TO AFFECTED AREA TWICE A DAY
HYDROCORTISONE 1% CREAM
OPPROVIDER, ONE
                         OPPHARMACIST, ONE
# of Refills: 11
       SC Percent: 30%
     Disabilities: NONE STATED
Was treatment for Service Connected condition? NO <Enter>
Was treatment related to Combat? NO <Enter>
Was treatment related to Agent Orange exposure? NO <Enter>
Was treatment related to service in SW Asia? NO <Enter>
Was treatment related to PROJ 112/SHAD? NO <Enter>
Was treatment related to Military Sexual Trauma? NO <Enter>
Was treatment related to Head and/or Neck Cancer? NO <Enter>
Is this correct? YES// <Enter>
```

All Service Connected and Environmental Indicators that apply will be asked regardless of a previously entered "Yes" response. SC will be asked for SC 0-100%, but copay charges will continue to be formulated in the same manner.)

Was treatment for a Service Connected condition? **NO <Enter>** Was treatment related to Combat? **NO <Enter>** Was treatment related to Agent Orange exposure? N// Y Is this correct? YES//

A dollar sign is displayed next to the copay prescription number if the copay status is billable.

Example: Billable Copay Status

Copay Menu [PSOCP MENU]

Users with access to this menu option can exempt an Rx Patient Status from copayment or CHAMPUS billing, reset a prescription's copay status, cancel some or all charges for a prescription, and enter/edit responses to medication exemption questions prompted at order entry.

The following options are available on the Copay Menu:

- CHAMPUS Billing Exemption
- Exempt Rx Patient Status from Copayment
- Reset Copay Status/Cancel Charges

CHAMPUS Billing Exemption [PSOCP CHAMPUS EXEMPTION]

Use this option to select a patient category (Rx Patient Status) to exempt from any CHAMPUS billing.

Example: CHAMPUS Billing Exemption

```
Select Copay Menu Option: CHAMPUS Billing Exemption

Select RX PATIENT STATUS NAME: ZZPOW

EXEMPT FROM CHAMPUS BILLING: ?

Answer YES if this Rx Patient status is to be exempt from Champus billing.

Choose from:

0 NO

1 YES

EXEMPT FROM CHAMPUS BILLING:
```

Exempt Rx Patient Status from Copayment [PSOCP EXEMPTION]

This option allows users to exempt an Rx Patient Status from copayment. A prescription assigned an Rx Patient Status that has been set as exempt from copay will not be charged a copay. A warning is displayed describing the consequences of taking this action and then the user is asked to confirm the change.

Example: Exempt Rx Patient Status from Copayment

Select RX PATIENT STATUS NAME: Inpatient EXEMPT FROM COPAYMENT: NO// Y YES ***** WARNING **** By setting the Exempt from Copayment for the Rx Patient Status of INPATIENT to 'YES', every prescription entered with this Rx Patient Status will NOT be charged a Copayment. A mail message will be sent to PSORPH and PSO COPAY Key holders informing them of your change. Are you sure you want to do this? Y// <Enter> ES Setting INPATIENT Rx Patient Status to Exempt from Copayment.

The warning displayed when removing the copay exemption from an Rx Patient Status differs slightly.

Example: Warning Message

By setting the EXEMPT FROM COPAYMENT for the Rx Patient Status of OPT NSC to 'NO', prescriptions entered with this Rx Patient Status from this point on will NOT be exempt from Copayment.

A MailMan message is sent to the holders of the PSO COPAY and PSORPH keys whenever the copay exemption status of an Rx Patient Status is changed.

Example: MailMan Message

Subj: Exempt from Copayment [#4072] 18 Oct 06 16:29 3 lines
From: OUTPATIENT PHARMACY In 'IN' basket. Page 1 *New*
The INPATIENT Rx Patient Status has been marked as
Exempt from Copayment by OPPHARMACIST3,THREE.
Every prescription with this Rx Patient Status will not be charged a Copayment.
Enter message action (in IN basket): Ignore//

The text differs slightly when the copay exemption is removed.

Example: Copay Exemption Removed

The Exempt from Copayment status has been removed from the OPT NSC Rx Patient Status by OPPHARMACIST3,THREE. Prescriptions entered with this Rx Patient Status will not be exempt from Copayment.

Reset Copay Status/Cancel Charges [PSOCP RESET COPAY STATUS]

This option combines and enhances the functionality of the previous *Remove Copay Charge* and *Reset Copay Status* options. Three basic functions can be performed with this option:

- The prescription's copay status can be reset.
- Responses to the medication exemption questions can be entered or changed.
- All or selected copay charges can be cancelled.

The actions allowed depend on the copay status of the patient and that of the selected prescription. The user needs to know the prescription number to be changed when accessing this option.

Reset Copay Status

Two methods can be used to change the copay status of a prescription directly. The first method is illustrated below. By entering "Yes" at the "Do you want to reset the status to NO COPAYMENT?" prompt and entering a reason for the reset, the prescription's copay status is changed from COPAY to NO COPAYMENT.

Example: Change the Copay Status

Select PRESCRIPTION RX #: **559157** NIACIN (NIASPAN-KOS) 500MG SA TAB Rx # 559157 is a Copay prescription

The reset prompt displays only if there are no exemption flags set to 'Yes.'

-	want to reset the status to NO COPAYMENT? Reason for Reset : ??	N//	YES
	Choose from:		
1			
1	RX REFUSED		
2	RX NEVER RECEIVED		
3	RX RETURNED/DAMAGED (MAIL)		
4	ENTERED IN ERROR		
5	RX CANCELLED		
б	INPATIENT/PASS		
7	INVESTIGATIONAL DRUG		
8	RX DELETED		
9	EMPLOYEE		
10	CNH - 3 DAY		
11	PATIENT DECEASED		
12	SUPPLY ITEM		
13	BEDSIDE MEDICATIONS		
14	ELIGIBILITY INCORRECT		
15	CHANGE IN ELIGIBILITY		
16	RX EDITED		
21	RX COPAY INCOME EXEMPTION		
33	AGENT ORANGE RELATED		
34	IONIZING RAD RELATED		
35	SOUTHWEST ASIA RELATED		
37	MILITARY SEXUAL TRAUMA		
38	COPAY CAP REACHED		
39	CANCER OF HEAD/NECK		
40	PHARMACY AUTO CANCELLED		
10			

Example: Change the Copay Status (continued)

44		CO	MBAT	VET	FERA	AN		
45		RX	FOR	FOF	RMEF	R POW		
46		RX	FOR	UNE	EMPI	LOYABLE	VET	TERAN
47		KA	TRINA	A AB	FEC	CTED VET	ERA	AN
48		PR	JJECT	11	2/S	HAD		
Select	Reason	for	Reset	: :	15	CHANGE	IN	ELIGIBILITY

The change is recorded in the Copay Activity Log for this prescription.

Example: Copay Activity Log

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 10/24/06 COPAY RESET ORIGINAL OPPROVIDER9,TWO Comment: CHANGE IN ELIGIBILITY Old value=Copay New value=No Copay

Resetting the copay status does not involve canceling any incurred copay charges. The new copay status applies to future fills only. Any past charges billed will not be cancelled automatically. The canceling of copay charges is independent of the reset function.

Enter/Edit Medication Exemption Question Responses

The second way a user can directly reset the copay status of a prescription is to use the *Reset Copay Status/Cancel Charges* option to enter or edit any existing responses to the medication exemption questions displayed during order entry. Only those medication exemptions that apply to the patient for which the prescription is written can be modified. Any existing response to an exemption question displays to the user after entering the prescription number and the user is asked about entering or editing any copay exemption flags.

In the following screen example, *Reset Copay Status*, the <50% SC, Agent Orange (AO) exposure, PROJ 112/SHAD, and Military Sexual Trauma (MST) medication exemptions apply to the Veteran for which Rx# 3754533 has been entered. SC, AO, and SHAD exemption defaults of "No" display because values already exist. The MST exemption does not display because a response has never been entered.

Prompts display for Service Connected and all Environmental Indicators that are flagged for the Veteran in Enrollment.

The user is prompted to respond to "Do you want to enter/edit any copay exemption flags?" If the user responds "Yes", each medication exemption that applies to the Veteran will be presented for editing. All three medication copay exemptions are presented for editing, including the MST exemption for which a response did not exist. "Yes" is entered for the MST exemption question and a system message indicates that the copay status of the Rx is reset to No Copay by this action.

Example: Reset Copay Status

Select Copay Menu Option: RESET Copay Status/Cancel Charges Select PRESCRIPTION RX #: 3754533 HYDROCORTISONE 1.0% CREAM Rx # 3754533 is a Copay prescription < Current copay status of Rx> appears. The following exemption flags have been set: < If any exemption flags have values they will be displayed after the copay status SC: No AO: No Do you want to enter/edit any copay exemption flags? Y// < Enter> ES Was treatment for a Service Connected condition? N// <Enter> O Was treatment related to Agent Orange exposure? N// <Enter> 0 Was treatment related to PROJ 112/SHAD? N// <Enter> 0 Was treatment related to Military Sexual Trauma?// YES Editing of exemption flag(s) has resulted in a copay status change. The status for this Rx will be reset to NO COPAY. Do you want to cancel any charges (Y/N)? N <This prompt appears only if this Rx has incurred any charges.

The Copay Activity Log for this order shows the record of the change.

Example: Copay Activity Log

Co	Copay Activity Log:										
#	Date	Reaso	n		Rx Ref		Initiator	Of Activity			
===			======	=======		=====			====		
1	10/24/06	COPAY	RESET		Refill	2	OPPROVIDER	9,TWO			
	Comment: MI	LITARY	SEXUAL	TRAUMA	RELATED	Old	value=Copay	New value=No	copay		

NOTE

The copay status of an Rx will not be reset from a "No" Copay to Copay status based strictly on a response to a medication exemption question.

Cancel Charges

A user can select to remove all or specific charges for a prescription fill. If the user chooses to cancel a specific charge, a list of fills/refills is displayed showing the fill reference and release date. Any charge that has already been cancelled or any fill that has not been billed due to the Veteran meeting the annual copay cap will be identified.

Example: Cancel Copay Charges

```
Do you want to cancel any charges(Y/N)? Y <This prompt appears only if this
Rx has incurred any charges.
(A)ll or (S)elect Charges? (A/S): S
1. Original fill (05/01/06)
2. Refill #1 (6/10/06)
3. Refill #2 (7/12/06) (Charge Cancelled)
4. Refill #3 (8/15/06)
5. Refill #4 (9/23/06) (Potential Charge *)
* Potential charge indicates fill was not billed due to the annual cap.
If cancelled, this fill will not be considered for future copay billing.
Select 1:-5: 5
Do you wish to continue (Y/N)? Y
```

Typing a "??" at the "Select Reason for Reset or Charge Cancellation" prompt lists the same reasons displayed previously in the "Reset Copay Status" section. Once the reason for the change is entered, a summary of all the actions taken on the prescription is displayed.

Example: Summary of Actions

Editing of exemption flag(s) has resulted in a copay status change. The status for this Rx will be reset to NO COPAY. Select Reason for Reset or Charge Cancellation : 1 RX REFUSED Copay status reset due to exemption flag(s) The following exemption flags have been changed: EC: Yes MST: Yes Rx # 3754533 - Refill 3 copay charge cancelled Select PRESCRIPTION RX #:

The Copay Activity Log shows the canceled charge as REMOVE COPAY CHARGE.

Example: Copay Activity Log

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 11/02/06 REMOVE COPAY CHARGE Refill 3 OPPROVIDER9,TWO Comment: RX REFUSED

Potential Charges and Partial Charges

In this example, the prescription is for a 90-day supply. When Refill #2 was released, the Veteran met his annual copay cap and the fill was not billed. An entry is made in the Copay Activity Log to document when a prescription fill is not billed due to the annual copay cap. A fill is identified as a potential charge when NO BILLING was performed.

Example: Copay Activity Log for No Bill

Rx Activity Log	Oct 23,	2006	@13:53:0	2	Page	5:	1 of	1
OPPATIENT9, ONE								
PID: 000-76-5432P				Ht(cm):	169.55	(03/0	06/2006	5)
DOB: NOV 18,1950 (55)				Wt(kg):	125.45	(03/0	06/2006	5)
Rx #: 459166 Original Fill	Rx #: 459166 Original Fill Released: 03/12/06							
Routing: Mail Finished b	y: OPPHA	RMACIS	ST27,THRE	E				
Copay Activity Log:								
# Date Reason	1	Rx Ref	2	Initia	tor Of A	Activi	lty	
	========	=====		======	========	=====		===
1 10/23/06 ANNUAL CAP RE	ACHED 1	REFILI	2	OPPHAR	MACIST15	5, THRE	CΕ	
Comment: NO BILLING FOR THIS	FILL							

The list of fills associated with this order, as seen in the *Reset Copay Status/Cancel Charges* option, would show Refill #2 as a Potential Charge.

Example: Reset Copay Status/Cancel Charges for Potential Charge

1. Original fill (03/06/06) 2. Refill #1 (05/24/06) 3. Refill #2 (10/23/06) (Potential Charge *) * Potential charge indicates fill was not billed due to the annual cap. If cancelled, this fill will not be considered for future copay billing.

If the same Refill #2 is released and the Veteran reaches the annual copay cap after the first 30 days of the 90-day supply is billed, the Copay Activity Log will indicate that the Veteran was partially billed due to the annual cap.

Example: Copay Activity Log

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 10/26/06 ANNUAL CAP REACHED REFILL 2 OPPHARMACIST15, THREE Comment: PARTIAL BILLING FOR THIS FILL

Refill #2 will not be identified as having a potential charge because partial billing was done.

Example: Reset Copay Status/Cancel Charges for Partial Charge

1.	Original fill	(03/06/06)
2.	Refill #1	(05/24/06)
3.	Refill #2	(10/23/06)

If Refill #2 is cancelled, the partial charge (for 30 day supply) is cancelled and the remaining 60-day supply that was not charged is removed from consideration for future copay billing. Only one entry is entered in the Copay Activity Log.

Example: Copay Activity Log

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 10/26/06 ANNUAL CAP REACHED REFILL 2 OPPHARMACIST15,THREE Comment: PARTIAL BILLING FOR THIS FILL 2 10/29/06 REMOVE COPAY CHARGE REFILL 2 OPPHARMACIST15,THREE Comment: RX REFUSED

Once a potential charge has been cancelled, it will be dropped from the list of incurred charges that are displayed.

IB-initiated Medication Copay Charge

There are times when the medication copay status of a prescription can be changed by a background process. In this example, another prescription for the same Veteran was returned to stock, dropping copayments below the annual cap. Integrated Billing (IB) goes through all of the prescriptions looking for any that were not billed a copay because the annual cap was reached. IB initiates a copay charge against any such prescriptions that are found until the copay cap is again reached.

Example: An IB-initiated Medication Copay Charge

Chapter 10: Evaluating Drug Usage

This chapter describes the options on the DUE Supervisor menu.

DUE Supervisor [PSOD SUPERVISOR]

This menu provides options to create a questionnaire based on the criteria of a Drug Usage Evaluation and print an answer sheet for the provider's use in answering the questionnaire. The answer sheet can be printed and distributed to the clinic so that the provider may complete it when ordering a medication being evaluated. An answer sheet can also be generated (optional) when a patient's Action Profile prints, if the profile contains a medication being evaluated. The provider's responses can be entered into the DUE ANSWER SHEET file.

The following options are available on the DUE Supervisor menu:

- 1 Enter a New Answer sheet
- 2 Edit an Existing Answer Sheet
- *3 Create/Edit a Questionnaire*
- 4 Batch Print Questionnaires
- 5 DUE Report

Enter a New Answer Sheet [PSOD CREATE ANSWER SHEET]

In this option, the user enters answers to a DUE Questionnaire. This creates an answer sheet entry in the DUE ANSWER SHEET file. These answer sheets can be kept online for statistical and/or compliance studies. Answer sheets are stored in the file using a sequence number. This number is automatically generated by the computer and should be written on the hard copy of the answer sheet immediately so that it can be used later in editing or deleting the entry.

Edit an Existing Answer Sheet [PSOD EDIT ANSWER SHEET]

Edit a DUE Answer Sheet entry using this option. Ordinarily, the sequence number is available when editing the Answer Sheet; however, the user can search the file if the provider, drug, or questionnaire is known by typing ^S at the "SEQUENCE NUMBER" prompt. The search displays all of the entries containing the combination of provider, drug, or questionnaire used in the search.

Create/Edit a Questionnaire [PSOD DUE BUILD QUESTIONNAIRE]

To create a questionnaire, first select one or more drugs being evaluated. After selecting the drugs, create a set of questions to be used on the questionnaire. These questions do not have to be added to the DUE QUESTION file since they are being added through this option. The questionnaire must be marked as "Active" and "Active for Profiles" for the Answer Sheet to automatically print with the Action Profiles. A summary can be printed for the questionnaire using the *DUE Report* option. For this reason, when creating a questionnaire, the user should strive to make each question a yes, no, or unknown type question. Questions having a free text or numeric type answer are ignored in the summary.

The PRINT DUE QUESTIONNAIRE site parameter needs to be set to "YES" for the questionnaire to print with the Action Profile.

Batch Print Questionnaires [PSOD BATCH PRINT QUESTIONNAIRE]

To print a blank form of a selected questionnaire, enter the number of copies and a printer device. These questionnaire answer sheets can be distributed to providers to complete when ordering medications being evaluated.

DUE Report [PSOD DUE SORT AND PRINT]

This report displays entries from the DUE ANSWER SHEET file. A summary of this report is available, showing the number of answer sheets, number of questionnaires, and a breakdown of all yes/no/unknown type questions. This breakdown shows each question number and the number of times it was answered yes/no/unknown, or unanswered. For this reason, when creating a questionnaire, the user should strive to make each question a yes, no, or unknown type question. Questions having a free text or numeric type answer are ignored in the summary.

Chapter 11: Enter/Edit Clinic Sort Groups

This chapter describes the Enter/Edit Clinic Sort Groups option.

Enter/Edit Clinic Sort Groups [PSO SETUP CLINIC GROUPS]

This option enables the user to identify a group of clinics that will print together for the action/informational profiles.

Example: Enter/Edit Clinic Sort Groups

```
Select Pharmacist Menu Option: ENTer/Edit Clinic Sort Groups
Select Clinic Sort Group: ?
Answer with OUTPATIENT CLINIC SORT GROUP NAME
Choose from:
  CLINIC 1
   CLINIC 2
    You may enter a new OUTPATIENT CLINIC SORT GROUP, if you wish
    Answer must be 3-30 characters in length.
Select Clinic Sort Group: CLINIC 3
 Are you adding 'CLINIC 3' as
    a new OUTPATIENT CLINIC SORT GROUP (the 6TH)? Y <Enter> (Yes)
NAME: CLINIC 3// <Enter>
Select SORT GROUPS: ?
Answer with SORT GROUP SORT GROUPS
    You may enter a new SORT GROUP, if you wish
     Enter name of clinic to be included in the sort group.
Answer with HOSPITAL LOCATION NAME, or ABBREVIATION
Do you want the entire 122-Entry HOSPITAL LOCATION List? N (No)
Select SORT GROUPS: 2 EAST
 Are you adding '2 EAST' as a new SORT GROUP (the 1ST for this OUTPATIENT
CLINIC SORT GROUP)? Y (Yes)
Select SORT GROUPS: < Enter>
```

(This page included for two-sided copying.)

Chapter 12: External Interface Menu

This chapter describes the options on the External Interface Menu.

This menu is locked with the PSOINTERFACE lock. The PSOINTERFACE key should be assigned to all persons responsible for performing these functions.

External Interface Menu [PSO EXTERNAL INTERFACE]

This menu contains the following options for using an external interface device.

- Purge External Batches
- Reprint External Batches
- View External Batches

Purge External Batches [PSO INTERFACE PURGE]

This option purges entries from the PHARMACY EXTERNAL INTERFACE file.

Example: Purge External Batches

Select External Interface Menu Option: **Purge** External Batches Enter cutoff date for purge of External Interface file: **022807** (FEB 28, 2007) Purge entries that were not successfully processed? NO// <**Enter**> Purge queued to run in background. Select External Interface Menu Option:

Reprint External Batches [PSO INTERFACE REPRINT]

This option enables the reprinting of labels for batches of prescriptions that have been sent to the external interface.

Example: Reprint External Batches

Select External Interface Menu Option: Reprint External Batches Enter a date/time range to see all batches sent to the External Interface. Start date/time: 022807 (FEB 28, 2007) End date/time: 030707 (MAR 07, 2007) Gathering batches, please wait... BATCH QUEUED TO PRINT ON: PATIENT: ALBANY _____ 1FEB28,2007@08:06:14OPPATIENT12,ONE2FEB28,2007@08:10:56OPPATIENT12,ONE3FEB28,2007@08:19:20OPPATIENT22,ONE4FEB28,2007@08:38:17OPPATIENT28,ONE5FEB28,2007@08:50:32OPPATIENT9,ONE6FEB28,2007@09:15:35OPPATIENT9,ONE7FEB28,2007@09:33:48OPPATIENT18,ONE8FEB28,2007@09:39:31OPPATIENT1,ONE9FEB28,2007@10:36:51OPPATIENT1,ONE10FEB28,2007@13:37:24OPPATIENT4,ONE11FEB28,2007@13:46:07OPPATIENT8,ONE Select Batch(s) to reprint: (1-11): 5,6 Batches selected for Reprint are: Batch 5 Queued for FEB 28,2007@08:50:32 by OPPHARMACIST4,THREE Batch 6 Queued for FEB 28,2007@09:15:35 by OPPHARMACIST4,THREE Before Reprinting, would you like a list of these prescriptions? N// <Enter> O Are you sure you want to Reprint labels? Y// <Enter> YES.. Select LABEL DEVICE: [Select Print Device] LABEL(S) QUEUED TO PRINT!

Select External Interface Menu Option:

View External Batches [PSOINTERFACE VIEW]

With this option the user can view batches of prescriptions that have printed from the external interface.

Example: View External Batches

Select External Interface Menu Option: View External Batches Enter a date/time range to see all batches sent to the External Interface. Start date/time: 022807 (FEB 28, 2007) End date/time: 030707 (MAR 07, 2007) Gathering batches, please wait... BATCH QUEUED TO PRINT ON: PATIENT: BROWNS PLACE -----_____

Chapter 13: Label/Profile Monitor Reprint

This mini-chapter defines the option for handling printer malfunctions.

Label Profile Monitor Reprint

[PSO B]

When a printer malfunction occurs, up to 1000 (or more depending on the Label Profile Monitor Max site parameter) damaged labels or profiles can be reprinted. Enter the failed output device name and the last usable label or profile.

Chapter 14: Implementing and Maintaining Outpatient Pharmacy

Maintenance (Outpatient Pharmacy) [PSO MAINTENANCE]

The *Maintenance (Outpatient Pharmacy)* menu contains the options that are used for implementing and maintaining the Outpatient Pharmacy software. These options are:

- Site Parameter Enter/Edit
- Edit Provider
- Add New Providers
- Queue Background Jobs
- Autocancel Rx's on Admission
- Bingo Board Manager ...
- Edit Data for a Patient in the Clozapine Program
- Enter/Edit Clinic Sort Groups
- Initialize Rx Cost Statistics
- Edit Pharmacy Intervention
- Delete Intervention
- Auto-delete from Suspense
- Delete a Prescription
- Enter/Edit Automated Dispensing Devices
- Expire Prescriptions
- Manual Auto Expire Rxs
- Prescription Cost Update
- Purge Drug Cost Data
- Purge External Batches
- Recompile AMIS Data

Site Parameter Enter/Edit [PSO SITE PARAMETERS]

This option is used to establish and edit parameters for the Outpatient Pharmacy software application. The following table lists each parameter and its corresponding description. These fields are contained in either the OUTPATIENT SITE file or the PHARMACY SYSTEM file.

Site Parameter	Description
NAME	This field contains the name of the site.
MAILING FRANK STREET ADDRESS	This field is used for the address of the outpatient site.
AREA CODE	This field is used for the area code of the outpatient site.
PHONE NUMBER	This field is used for the telephone number of the outpatient site.
MAILING FRANK ZIP+4 CODE	This field is used for the zip code of the outpatient site. This field will allow zip+4 format (excluding the "-")
SITE NUMBER	This field is used to show the site/station number.
NCPDP NUMBER	This field is the site-specific National Council for Prescription Drug Programs number (NCPDP), formerly referred to as the National Association of Boards of Pharmacy Number (NABP).
MAILING FRANK CITY	This field is used for the city in which the outpatient site is located.
MAILING FRANK STATE	This field is used to show the state in which the outpatient site resides.
MAILING COMMENTS	This field will be printed on the laser labels mailing address label. It can contain anything the site deems appropriate (i.e. whether mailing is "Forwarding service requested" or "Address service requested", etc.)
INACTIVE DATE	This date will indicate that the Outpatient Site is no longer active, and cannot be selected through the Outpatient Pharmacy options.
HOLD FUNCTION?	This site parameter is used to determine if the 'Hold' function will be used at the medical facility.
SUSPENSE FUNCTION?	This site parameter will be used to determine if the 'Suspense' feature will be used at the medical facility.
CANCEL DRUG IN SAME CLASS	Prescriptions with duplicate classes can only be discontinued if this site parameter is set to 'Yes' and if the Rx has not been put on hold through CPRS.
REFILL INACTIVE DRUG RXS	This will be used to determine if inactive drugs will be used to refill active prescriptions.
ASK METHOD OF PICKUP	This field will be used to determine if method of pickup will be asked for window prescriptions.
PASS MEDS ON PROFILE	This field is used to determine if pass medication within specified date range will be listed on profiles.
PROFILE `SORT BY' DEFAULT	This field will be used to determine the sort order of medications on profiles.
COPIES ON NEW	This field will be used to determine the number of copies for labels to print.

Site Parameter	Description
DRUG CHECK FOR CLERK	This field is used to determine if the duplicate drug warnings should be shown for non-pharmacist.
FEE BASIS SUPPORT	This field is used to determine if fee basis prescriptions are processed.
MULTI RX REQUEST FORM	This field is used to determine if the multiple prescription request forms are printed with medication labels.
BARCODES ON REQUEST FORMS	This field is used to determine if barcodes are printed on profiles, labels, and multi request forms.
BARCODES ON ACTION PROFILES	This field is used to indicate if barcodes are to print with the action profiles. The printer used must be setup or have barcode capabilities for the barcodes to print. Contact IRM to help determine which printers have barcode capabilities.
VERIFICATION	This field is used to determine if prescriptions entered by a non-pharmacist are placed in a non-verified status.
DISPLAY GROUP	This field is used to determine which bingo board display screen will be shown on the waiting room monitor.
SCREEN PROFILES	This field is used to determine if profiles are displayed when refilling and renewing medications.
EDIT PATIENT DATA	This field is used to determine if editing of patient data will be allowed.
EDIT DRUG	This field will be used to determine if drugs can be changed during prescription edit.
RENEWING RX'S ALLOWED	This field will be used to determine if renewing of medications will be allowed.
PASS MEDS CANCEL	This field is used to determine if pass medications are to be cancelled.
AUTO SUSPEND	This field is used to determine if medication that is refilled or renewed before the next possible fill date is to be placed in suspense automatically.
SHALL COMPUTER ASSIGN RX #S	This field is used to determine if the computer will auto generate prescription numbers.
PROFILE WITH NEW PRESCRIPTIONS	This field is used to determine if medication profiles are printed when new medication is ordered.
SLAVED LABEL PRINTING	This field will be used to allow printing of RX labels without being able to queue to a printer.
	This parameter is primarily for slaved printing of RX labels. If 'yes' is the answer the prompt or action to be taken on the label will include the '/PRINT' action.
METHADONE PROGRAM	This field will be used to determine if the site has a methadone program and if a particular drug should be prompted for.
METHADONE DRUG	This field will be used to show what drug is being used if the site has a methadone program.
DAYS TO PULL FROM SUSPENSE	This field will be used to pull a patient's medication from suspense for a specified number of days. The day range is from 0 to 10.
DAYS TO PULL SUSPENDED CS CMOP	This field will be used to pull a patient's controlled substances from suspense for CMOP medications for a specified number of days. The range is between 0 and 10.

Site Parameter	Description				
RECENTLY DC'D/EXPIRED DAYS	Allow local facilities to set a timeframe (7-45 days) for which a discontinued or expired outpatient medication order will be identified as 'recently discontinued/expired'. Default value is 7 days.				
NEW LABEL STOCK	This field will be used to determine which medication label stock will be used.				
EXTERNAL INTERFACE	This field allows sites to alter the characteristics of the external interface. The Set of Codes field have the following values:				
	0 - the external interface is off				
	1 - send all drugs to the external interface; print labels locally				
	2 - send all drugs to the external interface; don't print labels locally				
	 3 - send only marked drugs to the external interface; don't print labels locally 4 - send only marked drugs to external interface and print labels through VistA. 				
DISPENSING SYSTEM PRINTER	This field identifies the name of the printer(s) that, when selected, and the interface is in use, an HL7 message is generated to the dispensing system.				
BLANK LABEL BETWEEN PATIENTS	This field will determine if a blank label should print between patients on the label printers.				
VERIFYING PHARMACIST ON LABELS	This site parameter will determine if the name of the verifying pharmacist or the name of the person who made the order request will print on the Rx label. If the parameter is set to Yes the verifying pharmacist name will print.				
AUTOMATED DISPENSE	This field will determine what version of the automated dispense machine this site is running. If the machine is older than HL7 V.2.4, enter letter O, if HL7 V.2.4 has been installed, enter 2.4.				
FILE RELEASE DATE/TIME	This field is used to indicate if the release date/time is to be filed for the prescription dispensed by an external interface.				
ENABLE MASTER FILE UPDATE	This field will determine if the automated dispense machines are ready to receive HL7 V.2.4 messages.				
DISPENSE DNS NAME	This is the DNS computer name of the automated dispensing machine that is used for this outpatient site division.				
DISPENSE DNS PORT	Enter the DNS port number associated with the automated dispense machine for this outpatient pharmacy site division.				
OPAI	This multiple field will allow any one division to have more than one Automated Dispensing Device (ADD) communicating with VistA through the Outpatient Pharmacy Automated Interface (OPAI). It is linked to the DISPENSING SYSTEM PRINTER (#59.0200801) field. When a label printer is selected during Patient Prescription Processing, HL7 messages for orders will be routed based on the automated dispensing devices defined in this multiple.				

The CPRS ORDERING INSTITUTION field in the OUTPATIENT SITE file allows multiple Institutions to be entered for the local site. If more than one Institution is entered for a site, the user can select the appropriate Institution when using the *Complete Orders from OERR* option and complete Pending Orders from clinics that are associated with the specific Institution selected.

Site Parameter	Description					
CPRS ORDERING INSTITUTION	This field is used when completing orders from CPRS. If there is only one Institution entry, then when completing orders from CPRS under this Outpatient site, only those orders from that Institution will be shown. If there is more than one entry, then the Institution will be prompted for when completing orders from CPRS, and only those orders associated with that Institution selected will be shown.					
RELATED INSTITUTION	Institution associated with the site.					
LOGICAL LINK	This is a pointer to the Logical Link file (#870). This link is used to transmit messages to an external (client) application. This field is not filled in when messages are exchanged between DHCP applications on the same system. This field will be used as the Logical Link for the prescription if there is a Clinic associated with the prescription, and the Institution derived from that Clinic has an entry in this CPRS ORDERING INSTITUTION multiple with an associated Logical Link.					
NPI INSTITUTION	This is the institution or division that has the National Provider Identifier (NPI) value for this Outpatient Site. No two Outpatient Site entries in this file should point to the same INSTITUTION file entry. (Note that the RELATED INSTITUTION field differs from this field and is the parent institution which may be the same for any or all of the Outpatient Site entries.)					
LABEL/PROFILE MONITOR MAX	Maximum number of label/profiles to be stored in the Label/Profile Monitor list for each printer device. The default and minimum value for this number is 1000. Each time the printer is used an entry is made in the Label/Profile monitor and if the monitor holds more entries than specified by this parameter, the oldest entry is deleted.					
NARCOTICS NUMBERED DIFFERENTLY	This field is used to determine if narcotics will be numbered differently from other medications/supplies.					
NARCOTIC LOWER BOUND	This field is used to determine what prescription numbers narcotics are to start with if narcotics are numbered differently from other prescriptions/supplies.					
NARCOTIC UPPER BOUND	This field is used to determine the highest prescription number used for narcotics if this type of medication is numbered differently from other medications/supplies.					
LAST NARCOTIC NUMBER ISSUED	This field is used to indicate last number issue d for narcotic medications.					
PRESCRIPTION # LOWER BOUND	This field is used to enter the lowest prescription number for this site.					
PRESCRIPTION # UPPER BOUND	This field is used to enter the highest prescription number for this site.					
LAST PRESCRIPTION # ISSUED	This field is used to store the last RX number used.					
IB SERVICE/SECTION	Select the appropriate entry in the Service/Section file (#49) that is to be used for the Pharmacy Copayment/Integrated Billing procedures.					

Site Parameter	Description
NARRATIVE FOR COPAY DOCUMENT	This field contains information from the site regarding the copayment procedures for the patient to follow upon receipt of the copay document. For example, information may include a telephone number to call regarding billing inquiries, a payment mailing address, etc.
NARRATIVE REFILLABLE RX	This field contains information from the site regarding procedures for the patient to obtain a refill of his refillable medication. May include the address, phone number, etc. that will assist the patient.
NARRATIVE NON- REFILLABLE RX	This field contains information from the site regarding procedures for the patient to obtain a new prescription for his non-refillable medication. This field may contain address, phone number, etc that will assist the patient.
CHARGE LOCATION	This field is a pointer to the Hospital Location File (#44). Multi-division sites should populate this field for each division. This data could be obtained from the Business Office of the Medical Center.

The CHARGE LOCATION field is used to group charges in the COTS billing system according to the type of service.

IMPORTANT

Entering and defining the Charge Locations is crucial to the success of this function. Initially, however, a unique Outpatient Pharmacy Location must be entered in the HOSPITAL LOCATION file by Registration or Scheduling. It is recommended that the Location be coordinated with the Medical Center's business office. A Charge Location should be defined for every division currently in the OUTPATIENT SITE file, which means that there could be multiple hospital locations or one location for all divisions.

If a Charge Location is not defined for a particular division, Outpatient Pharmacy will search all active divisions in the OUTPATIENT SITE file for a Charge Location entry and use the first one it finds. If the PFSS switch is ON and no Charge Locations are defined in any divisions, the information will not be passed on to IB or the COTS billing system and no charge takes place.

Information in the CHARGE LOCATION field cannot be deleted, but it can be replaced with entry of another Charge Location.

Site Parameter	Description
SCRIPTALK DEVICE	This field contains a pointer to the ScripTalk printer device in the device file.
SCRIPTALK AUTO- PRINT SETTINGS	Set this to 'A' to have a ScripTalk label automatically print for ScripTalk-enrolled patients whenever their regular medication label prints. Set to 'M' if ScripTalk labels will be printed manually.
DEFAULT OUTPATIENT SITE	The outpatient site (and parameters) which will be used for ward order entry. An entry in this field will bypass the site selection prompt when entering outpatient from OE/RR.
ADMISSION CANCEL OF RXS	This field is used to determine if outpatient medication will be cancelled after 72 hours of an admission to the medical center.
EXEMPT WARD FROM AUTOCANCEL	For all of the WARD LOCATIONS entered, prescriptions for patients on these wards will not be canceled by the Autocancel RX's on Admission Outpatient Pharmacy system job.
DAYS PRINTED RX STAYS IN 52.5: 7	This field contains the number of days printed prescriptions are to remain in the RX SUSPENSE file when running the Delete From Suspense File option. The number of days to remain may be from 7 to 90.
POLYPHARMACY W/ACTION PROFILE	This field is used to determine if a polypharmacy report prints with action profile across all divisions.
INTERDIVISIONAL PROCESSING	This field is used to indicate if interdivisional processing is to occur.
DIVISION PROMPT ASKED	This field is used to indicate if the 'Division' prompt is to be asked.
REFILL/RENEW DIVISION	This field is used to indicate the refill/renew division for multi divisional sites.
PROCESS AUTO REFILLS FOR INPAT	This flag should be set to Yes, only if the site wants the scheduled AUTO REFILL [PSO AUTO REFILL] option to process refills for patients who are currently an inpatient. The AUTO REFILL job defaults to NO unless the site has this flagged as YES.
PROCESS AUTO REFILLS FOR CNH	This flag should be set to Yes, only if the site wants the scheduled AUTO REFILL [PSO AUTO REFILL] option to process refills for CNH patients. The AUTO REFILL job defaults to NO unless the site has this flagged as YES.

The following example displays all of the prompts that are possible with the *Site Parameter Enter/Edit* option. The prompts displayed at each site will depend upon that site's settings.

Example: Site Parameter Enter/Edit - all fields

Select Maintenance (Outpatient Pharmacy) Option: SITE Parameter Enter/Edit
Select SITE NAME: ALBANY 500
Would you like to see all site parameters for this division? Y// NO
NAME: ALBANY// <Enter>

at a particular division?: Y// <Enter> ES
Choose REFILL division: Cindy// <Enter> 043
Initialization of 'INTERDIVISIONAL PROCESSING' is complete.
Select SITE NAME:
```

Edit Provider [PSO PROVIDER EDIT]

Edit existing provider entries in the NEW PERSON file with this option.

Add New Providers [PSO PROVIDER ADD]

This option allows new providers to be added. The provider's name is already in the file if the name entered at the "Enter NEW PERSON's name" prompt is repeated and the screen returns to the menu. The *Edit Provider* option must be used in this case to change existing provider entries.

Queue Background Jobs [PSO AUTOQUEUE JOBS]

This option is used to queue all background jobs. Once the *Queue the Background Jobs* option is selected, the option automatically pre-selects the jobs. Entering "E" for exit cannot exit the option. To exit a specific job and go on to the next one, an up arrow (^) must be entered. The background jobs are as follows:

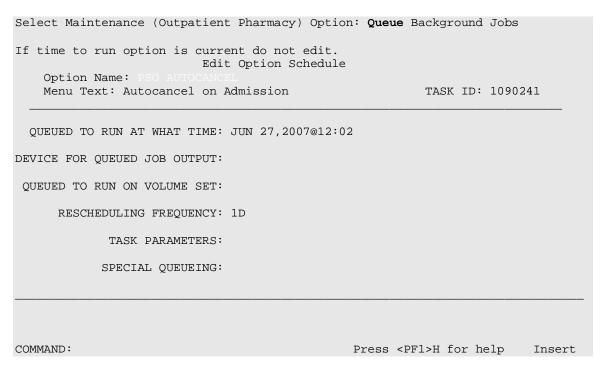

- Autocancel Rx's on Admission
- Nightly Rx Cost Compile
- Nightly Management Data Compile
- Compile AMIS Data (NIGHT JOB)
- Expire Prescriptions
- Auto-delete from Suspense

A date and time at least two minutes in the future must be entered. The jobs should be set to run at a time convenient for the site.

Respond only to the following prompts. All others will be left blank.

-	This is the date/time desired for this option to be started by TaskMan.
RESCHEDULING FREQUENCY:	If this field is blank then the job will run only once.

Example: View of Queue Background Jobs Screen

Autocancel Rx's on Admission [PSO AUTOCANCEL1]

Use the *Autocancel Rx's on Admission* option to task a job every night to cancel the outpatient prescriptions of patients who were admitted 3 days ago. Enter the time desired to queue the job to run. Using this same option the user can also edit the time set for the job to run. The job should be set to run at a time between 5:30 p.m. and 11:30 p.m. (or when convenient for the site).

Bingo Board Manager (BM) [PSO BINGO MANAGER]

Through the *Bingo Board Manager* menu the user can access the necessary options to set up the bingo board. Before data entry can begin, the division must be defined when entering the software package. Divisions are manager defined, but should be consistent with local policies in order to keep the statistical data relevant. At least one division must be defined.

After defining the division, define the display parameters through the *Enter/Edit Display* option. The display group is a uniquely defined location where the patient data will be displayed. As with the division parameter, at least one display group must be defined.

The following options are available on the Bingo Board Manager menu:

- Enter/Edit Display
- Auto-Start Enter/Edit
- Print Bingo Board Statistics
- Print Bingo Board Wait Time
- Purge Bingo Board Data
- Start Bingo Board Display
- Stop Bingo Board Display

Enter/Edit Display [PSO BINGO ENTER/EDIT DISPLAY]

Unique locations where the patient data will be displayed can be defined with this option. Enter a new display group name or the name of an existing group to edit or delete.

If the name is chosen at the "NAME/TICKET" prompt, the "TICKET #" prompt will not appear when a new patient is entered in the *Enter a New Patient* option.

The display cannot be changed from name to ticket when patients are already in the Group Display. All patients must be purged using the *Purge Bingo Board* option for that Group Display. After the data is purged, the user must edit the NAME/TICKET field using this option. Then the patient can be re-entered and assigned ticket numbers.

Only devices with the sub-type C-VT can be entered at the "DISPLAY DEVICE" prompt. A DEC VT-220 with a coaxial output connected to a cable ready TV monitor is all that is needed on the hardware side.

Example: Enter/Edit Display

```
Select Bingo Board Manager Option: Enter/Edit Display
Select GROUP DISPLAY NAME: MAIN
  Are you adding 'MAIN' as a new GROUP DISPLAY (the 3RD)? Y (Yes)
NAME: MAIN// < Enter> [The name of the Display Group.]
NAME/TICKET: NAME NAME [Select either Name or Ticket # to display.]
MESSAGE:
  1>WEST CLINIC VAMC
  2>[This is a free text field. The message will appear on the screen for the users to view.]
EDIT Option: < Enter>
TWO COLUMN DISPLAY: Y YES [Display names/ticket #'s in one or two column.]
DISPLAY WAIT TIME: Y YES [Average display waiting time.]
NORMAL WAIT TIME: 10 [Normal wait time (in minutes) is entered by the site.]
DISPLAY SETUP HELP TEXT: Y YES
In order to automatically start and stop the bingo board monitor,
a dedicated device must be setup by your IRM Service.
Once a dedicated device is setup, the bingo board can be scheduled
to automatically start and/or stop at user-defined times.
Enter 'NO' at the DISPLAY SETUP HELP TEXT prompt to not display this help text.
DISPLAY DEVICE: ? [Device dedicated by IRMS for bingo board setup.]
     Only devices with Sub-type starting with "C-VT" is allowed.
 Answer with DEVICE NAME, or LOCAL SYNONYM, or $1, or VOLUME SET(CPU), or
     SIGN-ON/SYSTEM DEVICE, or FORM CURRENTLY MOUNTED
DISPLAY DEVICE: [Select print device.]
AUTO-START DISPLAY DEVICE: Y YES [Sets the display group to automatically start.]
Do you want to initialize auto-start now? NO// Y YES
Enter Start Time: ?
Enter time as HH:MM in 12 hour format (For example, '8:00' or '8:00AM).
Enter Start Time: 9:30am [Start time for the display group.]
Enter Stop Time: 4:00pm [Stop time for the display group.]
```

At the "QUEUED TO RUN AT WHAT TIME" prompt a time must be entered that is at least two minutes in the future. The software will convert it to today's date with the time entered. For example, if the time is 8:00am, to queue it for later today 9:30am can be entered. It will default to today's date. To enter a time for it to queue tomorrow, "T+1@00:00am/pm" must be entered. For example, if the time is 3:00pm, to queue it for 8:30am, "T+1(or tomorrow's date)@8:30am" must be entered.

Auto-Start Enter/Edit [PSO BINGO INITIALIZE]

This option is used to change the start and stop times of the display groups that have been set up to automatically start and/or stop each day. The scheduling time and frequency can also be changed using this option.

Example: Auto-Start Enter/Edit

Select Bingo Board Manager Option: AUTO-Start Enter/Edit You want to edit Display Group(s) Start/Stop times? NO// Y YES Select GROUP DISPLAY NAME: MAIN Enter Start Time: 3:00AM// <Enter> Enter Stop Time: 4:00PM// <Enter> Select GROUP DISPLAY NAME: <Enter>

See the Enter/Edit Display option for an example of the auto-start screen.]

Print Bingo Board Statistics [PSO BINGO REPORT PRINT]

A report is generated covering a date range that can be sorted by single division or all divisions. Date ranges in the future are not allowed. The start date must be a date that precedes the end date.

The Bingo Board Report includes totals on number of patients, waiting time, and average waiting time.

Print Bingo Board Wait Time [PSO BINGO REPORT WAIT TIME]

This option allows printing of a report that sorts the entries in the PATIENT NOTIFICATION (Rx READY) file by Display Group, then Wait Time. This report can be used to keep track of the bingo board activity for a given day. To keep a permanent record of this activity, this report can be printed each day, preferably at the end of the day. The following are definitions of the items found on this report.

Field	Description
Name	The name of the patient. For a patient with multiple entries, his/her name is printed only once.
Time In	The time that the patient's name was entered in the computer.
Time Out	The time that the patient's name was entered on the bingo board monitor.
Rx#	The prescription number.
Wait Time	The amount of time it took to fill the prescription. It is the difference between Time In and Time Out. For orders with more than one prescription, the wait time is the same for each.
Display	The Display Group that the entries were entered under. Multiple site hospitals may have multiple display groups set up to coincide with each site.
Total	A summation of all the Wait Times in the PATIENT NOTIFICATION (Rx READY) file. It includes the wait time of the patients with multiple entries. For example, if it took 3 minutes to fill each of the three prescriptions for OPPATIENT23,ONE, the Total function sums up the Wait Time as though it took 9 minutes.
Count	The number of Wait Time entries. It counts the number of wait time entries for each prescription, not each patient.
Mean	The average or middle value of the Wait Time range of values.
Minimum	The least Wait Time value in the range.
Maximum	The greatest Wait Time value in the range.
Dev. (Deviation)	A relative number which signifies the overall departure from the average.

Data may be lost if this report is not printed each day, because many sites purge the PATIENT NOTIFICATION (Rx READY) file each morning.

Example: Print Bingo Board Wait Time

		-		
Select Bingo Board Option:	BM Bingo B	oard Mar	nager

TOTAL COUNT MEAN MINIMUM MAXIMUM DEV.				 33 13 3 1 3 1 3 1

Purge Bingo Board Data [PSO BINGO PURGE]

With this option, the user can delete all entries from the PATIENT NOTIFICATION (Rx READY) file.

It is recommended that data be purged each day. However, if data is not purged, it will not affect the accuracy of the bingo board statistics.

IMPORTANT

If this option is used before the end of the workday, all data will be lost except the statistical data on those prescriptions already picked up.

Start Bingo Board Display [PSO BINGO START]

Use this option to start the bingo board display. If there are no prescription entries yet, the message typed in the GROUP DISPLAY will cycle. When the entries begin, the message will be displayed and held for a period of time, then pages of numbers or names will be displayed until all the names have been shown. Then the cycle starts over.

The terminal that executes the option may or may not be the display terminal.

Stop Bingo Board Display [PSO BINGO STOP]

Use this option to stop the bingo board display. The bingo board can be stopped and started as often as desired. It must be stopped if any changes are made to the display group currently being used. This option can be accessed from any terminal.

When the display is stopped and "Yes" answered to the purge prompt, a second prompt appears and allows all of the display groups or a specific display group to be selected for purging.

Edit Data for a Patient in the Clozapine Program [PSOL EDIT]

Use this option to edit data for a patient who has already been enrolled in the Clozapine treatment program. It is typically used to re-register a patient whose treatment has been discontinued and who has rejoined the program.

There are two statuses, Pre-Treatment and Active Treatment, which can be selected. Two other statuses, Treatment on Hold and Discontinued, are set by the background job and require the patient to be reregistered.

The Pre-Treatment status is for a patient registered but never receiving a prescription. If after four weeks (28 days prior to the start date listed for the data collection) the patient does not receive a prescription, the patient status is changed to Discontinued by the background job and the patient must be re-registered.

The Active status is for a patient that has had a prescription within the last 7 or 14 days. If the most recent prescription is over 14 days old, the patient status is changed to Treatment on Hold by the background job and the patient must be re-registered.

Sex, race, and ZIP Code should be registered for each patient through Medical Administration Service (MAS) or the Business Management Office.

Enter/Edit Clinic Sort Groups [PSO SETUP CLINIC GROUPS]

This option enables a group of clinics to be identified that will print together for the action/informational profiles.

Example: Enter Clinic Sort Group

```
Select Maintenance (Outpatient Pharmacy) Option: ENT
        Enter/Edit Clinic Sort Groups
    1
    2
        Enter/Edit Local Drug Interaction
CHOOSE 1-2: 1 Enter/Edit Clinic Sort Groups
Select Clinic Sort Group: ?
Answer with OUTPATIENT CLINIC SORT GROUP NAME
Choose from:
   CLINIC 1
   Clinic 2
     You may enter a new OUTPATIENT CLINIC SORT GROUP, if you wish
     Answer must be 3-30 characters in length.
Select Clinic Sort Group: CLINIC 3
  Are you adding 'CLINIC 3' as
   a new OUTPATIENT CLINIC SORT GROUP (the 6TH)? Y (Yes)
NAME: Clinic 1// <Enter>
Select SORT GROUPS: ?
 Answer with SORT GROUP SORT GROUPS
    You may enter a new SORT GROUP, if you wish
    Enter name of clinic to be included in the sort group.
Answer with HOSPITAL LOCATION NAME, or ABBREVIATION
Do you want the entire 122-Entry HOSPITAL LOCATION List? N (No)
Select SORT GROUPS: 2 EAST
 Are you adding '2 EAST' as a new SORT GROUP (the 1ST for this OUTPATIENT
CLINIC SORT GROUP)? Y (Yes)
Select SORT GROUPS: < Enter>
```

Initialize Rx Cost Statistics [PSO COSTINIT]

This option allows the manager to initialize the system to automatically compile cost data for one day or a range of days.

Note: The default date is today plus 1 at 1:00 a.m. (T+1@01:00). The date on the screen represents either a default date/time if the option has never been queued, or the current date/time this option is queued to run.

Edit Pharmacy Intervention [PSO INTERVENTION EDIT]

Use this option to edit an already existing entry in the APSP INTERVENTION file.

Delete Intervention [PSO INTERVENTION DELETE]

This option can be used to delete an intervention from the APSP INTERVENTION file. An intervention can be deleted only on the same day that it was entered.

Auto-delete from Suspense [PSO PNDEL]

The *Auto-delete from Suspense* option is the same option as the V. 6.0 *Delete from Suspense File* option. This option allows the user to delete from the file the records of all the prescriptions that have already been printed prior to the user specified number of days. This specified number of days must be set from 7 to 90 days at the "DAYS PRINTED RX STAYS IN 52.5" prompt in the *Site Parameter Enter/Edit* option. The task is set to run every 7 days at the user specified time. The user may also re-queue or dequeue this task using this option. Once a prescription is deleted from suspense, it cannot be reset for reprinting. This option will delete based on the date the prescription was printed from suspense, not the original suspense date. The reason for using the print date is that one batch may print on a certain day with prescriptions with different original suspense dates. This job will therefore never delete only part of a printed batch.

Automate Internet Refill [PSO AUTO REFILL INITIALIZE]

This option initializes a job that will automatically process the refill requests placed via the Internet.

This option requires the PSOAUTRF key.

The following warning is displayed if the user does not hold the key.

Example: Automate Internet Refills - no security key held

Select Maintenance (Outpatient Pharmacy) Option: AUTOMATE Internet Refill You must hold the PSOAUTRF key to run this option!

Internet refills are processed for all active divisions defined in the OUTPATIENT SITE file that have pending refill entries in the PRESCRIPTION REFILL REQUEST file. The *Automate Internet Refill* option uses the same criteria (prompting) that is used for the *Process Internet Refill* option. However, instead of the user responding to the prompts, the criteria is automatically set up by the software as follows:

Prompt/Criteria	Pre-set Value
FILL DATE:	TODAY
MAIL/WINDOW:	MAIL
Will these refills be Queued or Suspended?	SUSPENDED
PROCESS AUTO REFILLS FOR INPAT?	NO (but site parameter overrides)
PROCESS AUTO REFILLS FOR CNH?	NO (but site parameter overrides)

Scheduling the background job includes setting a time and the job's rescheduling frequency.

These fields should be left blank: DEVICE FOR QUEUED JOB OUTPUT, QUEUED TO RUN ON VOLUME SET, TASK PARAMETERS, and SPECIAL QUEUEING.

Example: Automate Internet Refills - Setting up the background job

Select Maintenance (Outpatient Pharmacy) Option: AUTOMATE Internet Refill Edit Option Schedule Option Name: PSO AUTO REFILL Menu Text: Automate Internet Refill TASK ID: 173872 QUEUED TO RUN AT WHAT TIME: AUG 7,2007@16:40 DEVICE FOR QUEUED JOB OUTPUT: QUEUED TO RUN ON VOLUME SET: RESCHEDULING FREQUENCY: 24H TASK PARAMETERS: SPECIAL QUEUEING:

COMMAND:

Delete a Prescription [PSORXDL]

Using this option a prescription status can be changed to deleted. Deleted prescriptions do not appear on any profiles.

A released prescription can only be deleted after it has been returned to stock.

Expire Prescriptions [PSO EXPIRE INITIALIZE]

This option initializes a daily job that will mark any prescription as expired that has yesterday as an expiration date.

Manual Auto Expire Rxs [PSO MANUAL AUTO EXPIRE]

This job needs to be run only if expired prescriptions are showing up as active orders on the Orders tab in CPRS. This could happen if the *Expire Prescriptions* option was not queued as a daily task *AND* those prescription(s) were never accessed/viewed in *Patient Prescription Processing* option.

Sites that have not queued the Expire Prescriptions job on the daily task schedule should do so by selecting the *Queue Background Jobs* option from the Maintenance (Outpatient Pharmacy) menu option, making an entry in the Edit Option Schedule template for the *Expire Prescriptions* option and scheduling it to run daily.

Prescription Cost Update [PSO RXCOST UPDATE]

This option updates prescription costs in the DRUG COST file by generic drug name. Costs can be updated on refills and partials as well. Updates can be made only as far back as one year plus 120 days.

Purge Drug Cost Data [PSO PURGE DRUG COST]

To purge drug cost data from the DRUG COST file, enter a starting and ending date. Then choose to run this job immediately or queue it.

Example: Purge Drug Cost Data

Select Maintenance (Outpatient Pharmacy) Option: PURGE Drug Cost Data
Purge Cost Data Starting: FEB 2007// <Enter> (FEB 2007)
Purge Cost Data Ending: 3/97 (MAR 2007)
Are you sure you want to purge cost data
from 02/00/07 to 03/00/07? NO// Y YES
Do you want this option to run IMMEDIATELY or QUEUED? Q// <Enter> UEUED
Requested Start Time: NOW// <Enter> (MAY 06, 2007@10:31:23)
Task #223079 QUEUED.

Purge External Batches [PSO INTERFACE PURGE]

This option purges entries from the PHARMACY EXTERNAL INTERFACE file.

Example: Purge External Batches

Select External Interface Menu Option: **Purge** External Batches Enter cutoff date for purge of External Interface file: **022807** (FEB 28, 2007) Purge entries that were not successfully processed? NO// **<Enter>** Purge queued to run in background. Select External Interface Menu Option: **<Enter>**

Recompile AMIS Data [PSO AMIS RECOMPILE]

To gather Automated Management Information System (AMIS) data from various sources, use this option. It is recommended that this job should be queued to run during off-peak hours (or at a time that is convenient for the site).

The month/day/year may be specified for a current month report, but only month and year can be specified for reports of past months.

Chapter 15: Using the Medication Profile

This chapter describes the Medication Profile, its different formats, and how it can be used in patient care.

Medication Profile

[PSO P]

The Medication Profile displays a profile of all prescriptions on file for a particular patient. The prescription display includes all Non-VA Med orders also. The user may view this information directly on the screen or request it to be printed. The medication profile is available in two formats: short or long.

Medication Profile: Short Format

The short format displays the following information:

- patient name
- eligibility •
- reactions
- prescription number •
- Sig •
- quantity •
- last fill date •
- address

- DOB •
- narrative •
- prescriptions •
- drug name •
- Status •
- issue date •
- refills remaining. •

The short report format of the fields for Non-VA Med orders include the drug name or orderable item name, dosage, schedule and date documented.

The short format displays the status in an abbreviated form. The following is an explanation of the codes: Cal Statura/Dagaminti

Code	Status/Description
А	Active
В	Bad Address Indicated
DF	Discontinued due to edit by a provider through CPRS
DE	Discontinued due to edit via backdoor Pharmacy
DP	Discontinued by provider through CPRS
DC	Discontinued via backdoor Pharmacy
DD	Discontinued due to death
DA	Auto discontinued due to admission
E	Expired
HP	Placed on hold by provider through CPRS
Н	Placed on hold via backdoor Pharmacy
Ν	Non Verified
Р	Pending due to drug interactions
S	Suspended
\$	Copay eligible
Е	third-party electronically billable
R	Returned to stock prescription (next to last fill date)

NOTES:

Order #4 indicates that it has recently expired. Orders #5,7,10 indicate that they were recently discontinued. Hold Type display codes are shown in **blue**. Discontinue Type display codes are shown in **blue**.

Medication Profile: Long Format

The long format displays all information contained on the short format as well as the following additional fields:

- physician's name
- fill date

•

- dates of refills/partial fills
 - whether the prescription was filled at the pharmacy window or by mail
- clerk code
- total allowable refills
- which division filled it
- The long report format of the fields for Non-VA Med orders include the start date, CPRS order #, status, documented by, order check(s), override reason, override provider, and statement of explanation.

Route:

Status: Active

Start Date: 09/03/03 CPRS Order #: 12234

Documented By: OPCLERK21,FOUR on 09/03/03

Statement of Explanation: Non-VA medication recommended by VA provider

Patient wants to buy from Non-VA pharmacy
```

The Intervention menu hidden action has been included in the Patient Information, the Medication Profile and Detailed Order ListMan screens when utilizing the following options:

- Patient Prescription Processing [PSO LM BACKDOOR ORDERS]
- Complete Orders from OERR [PSO LMOE FINISH]
- Edit Prescriptions [PSO RXEDIT]

See Chapter 17, "Using the Pharmacy Intervention Menu" for more details.

Medication Reconciliation

The Medication Reconciliation product (patch PSO*7*294) introduces the components necessary to build four tools useful for medication reconciliation. The product utilizes Health Summary components and Text Integrated Utility (TIU) data objects to create a list of current medications. Medication Reconciliation also leverages the Remote Data Interoperability (RDI) software to include medication data from other sites.

For a complete list of functionality, please refer to the Medication Reconciliation Implementation Guide.

Medication Profile and Refill

[PSO HRC PROFILE/REFILL]

This option was originally requested by the Health Resource Center (HRC) to provide a new standalone option similar to that of the ePharmacy Medication Profile (View Only) [PSO PMP] option for the Compensation and Pension Record Interchange (CAPRI) system. It allows users to view a medication profile as well as refill prescriptions for a specific patient.

Enter ?? for more actionsCVChange ViewPIPatient InformationSIG Show/Hide SIGGSGroup by StatusRFRefillSelect:Quit// RFRefillBarcode Refill?NO//Select Orders by number:(1-16): ?This response must be a list or range, e.g., 1,3,5 or 2-4,8.Select Orders by number:(1-16): 2FILL DATE:(5/2/2011 - 11/2/2011): TODAY//(JUL 12, 2011)MAIL/WINDOW:MAIL//Mow refilling Rx#100004113Drug:AMITRIPTYLINE10MG TABQty:120Sig:RX#100004113has been suspended until 07-12-11.

NOTE: The system has the flexibility to sort the Medication Profile by different columns (RX, drug name, date, etc). When selecting a range of prescriptions from the Medication Profile to be refilled, selection is not limited to active prescriptions. If discontinued or expired prescriptions are included in a range, the system will display a message stating the status of each prescription as they are processed within the range. For example:

Cannot refill Rx # 100002897, Rx is in DISCONTINUED status.

(This page included for two-sided copying.)

Chapter 16: About the Output Reports Menu

This chapter describes the options on the Output Reports menu.

Output Reports [PSO OUTPUTS]

The *Output Reports* menu generates a variety of management reports. These reports contain current medication profiles, utilization, cost, and workload information that help management maintain the highest level of patient care.

The following reports and menus are available on the Output Reports menu:

- Action Profile (132 COLUMN PRINTOUT)
- Alpha Drug List and Synonyms
- AMIS Report
- Bad Address Reporting Main Menu ...
- CMOP Controlled Substance Rx Dispense Report
- Commonly Dispensed Drugs
- Cost Analysis Reports ...
- Daily AMIS Report
- Drug List By Synonym
- Free Text Dosage Report
- Inactive Drug List
- Internet Refill Report
- List of Patients/Prescriptions for Recall Notice
- List Prescriptions on Hold
- Management Reports Menu ...
- Medication Profile
- Monthly Drug Cost
- Narcotic Prescription List
- Non-Formulary List
- Non-VA Meds Usage Report
- Poly Pharmacy Report
- Prescription List for Drug Warnings
- Released and Unreleased Prescription Report

Action Profile (132 COLUMN PRINTOUT) [PSO ACTION PROFILE]

This option provides a list of a patient's active prescriptions, the expired and canceled prescriptions that may be renewed, and any Non-VA Med orders documented via the CPRS GUI application, and any remote prescriptions the patient may have are added to the end of the list as shown in the following report. Each prescription is followed by a place for the provider to indicate the action, renew or discontinue. This profile can be printed for an individual patient, for all patients with appointments in a clinic, all patients in all clinics, or for a clinic group.

In addition, a polypharmacy report can be printed with the action/informational profile. To get this report, answer **Yes** to the "POLYPHARMACY W/ACTION PROFILE" prompt in the *Site Parameter Enter/Edit* option to turn on this site parameter. This profile can be printed in an 80- or 132-column format. The Action Profile must be sent to a printer.

Barcodes may not show up on the action profile if the site parameters have not been set up for them.

If a prescription is for a drug marked for lab monitoring, the most recent lab result will be printed.

Copay affects the output report for this option. The letters SC (service connected) and NSC (non-service connected) will print on the same line as the RENEW/MD line only if the Veteran is rated service connected less than 50% and the prescription is not a supply item. This allows the physician to indicate (circle) the correct Veteran eligibility so that the Veteran may be charged a copay for the prescription, if applicable.

This report now displays ******BAD ADDRESS INDICATED****** if the patient has a bad address indicator. Also, if a temporary address has no end date, the following text is now displayed: "(Temp address from XXX 99,9999 till (no end date))".

If the prescription has been returned to stock, the letter (R) will appear next to the last fill date.

```

Alpha Drug List and Synonyms [PSO ALPHA]

This report lists all drugs in alphabetical order by generic name. Any existing synonyms for each drug are listed in lowercase letters under the generic name.

AMIS Report

[PSO AMIS]

This report lists prescription statistics that are required by the VA Central Office. For a multidivisional site, the print device will report each division's statistics on a separate page with the grand totals on the last page. This report must be printed on a 132-column printer.

Month/day/year may be specified for a current month report, but only month and year can be specified for reports of past months.

Bad Address Reporting Main Menu [PSO BAI REPORT]

The Bad Address Reporting Main Menu provides the following options:

- Bad Address Suspended List
- List Prescriptions Not Mailed

Bad Address Suspended List [PSO BAI SUSPENDED]

This option identifies prescriptions for Veterans with either Bad Address Indicated, Do Not Mail, for Foreign Address, as well as no active temporary address, giving the user the opportunity to be proactive regarding prescriptions that when Printed or Pulled Early from Suspense, would be unable to be mailed.

Example: Bad Address Suspended List Report

Select Output Reports Option: Bad Address Reporting Main Menu Select Bad Address Reporting Main Menu Option: Bad Address Suspended List This option shows unprinted suspended prescriptions for the following: - BAD ADDRESS INDICATOR set in the PATIENT file (#2) and no active temporary address - DO NOT MAIL set in the PHARMACY PATIENT file (#55) - FOREIGN ADDRESS set in the PATIENT file (#2) and no active US temporary address Select one of the following: B Bad Address Indicator Do Not Mail D F Foreign All А Print for Bad Address Indicator/Do Not Mail/Foreign/All (B/D/F/A): A// <Enter> A11 Ending suspense date: 08.15.07 (AUG 15, 2007) You are logged in under the ALBANY division. Print only those Rx's suspended for this division? Yes// <Enter> YES DEVICE: HOME// [Select Print Device] -----example continues-----

Example: Bad Address Suspended List Report (continued)

List Prescriptions Not Mailed [PSO BAI NOT MAILED]

This option provides a report of prescriptions with a routing of Mail that were not mailed due to a bad address.

CMOP Controlled Substance Rx Dispense Report [PSO CMOP CS RX DISPENSE REPORT]

This report provides a log of controlled substance prescriptions dispensed by a CMOP. This report can be sorted by release date or alphabetically by drug name. It displays the Release Date, Patient Name, Prescription Number, CMOP Status, and CMOP facility at which the prescription was filled. This report is designed to print on a 132-column printer and it is recommended that the printing be queued.

Commonly Dispensed Drugs [PSO COMMON]

This report lists the drugs with the greatest number of fills during a selected period of time. For multidivisional sites, the print device will report each division's statistics on a separate page.

Cost Analysis Reports [PSO COMMON]

This menu contains twelve different reports of cost analysis using existing data. Data for these reports are already compiled, so they print relatively quickly.

Clinic Costs [PSO CLINIC COSTS]

This report contains data on all the prescriptions filled during the user specified time period for a specific clinic or for clinics.

Division Costs by Drug [PSO DIV COSTS BY DRUG]

This report contains data on all prescriptions filled during a user specified period of time for one or more pharmacy divisions at a single site.

Drug Costs [PSO DRUG COSTS]

This report contains data on all prescriptions filled during a user specified time period for a specific drug or all drugs on file.

Drug Costs by Division [PSO COST BY DIVISION]

This report contains data on all prescriptions filled during a user specified period of time at a specific pharmacy division or for all pharmacy divisions.

Drug Costs by Division by Provider [PSO COST DIVISION BY PROVIDER]

This report contains drug costs during a user specified period of time sorted by division or divisions and within the division by provider.

Drug Costs by Provider [PSO COST BY PROVIDER]

This report contains data on all prescriptions filled during a specified period of time sorted by a drug or all drugs for each provider.

High Cost Rx Report [PSO HI COST]

This report lists all prescriptions filled during the specified time period that cost more than the user specified dollar limit.

Patient Status Costs [PSO COST BY PATIENT STATUS]

This report displays data on all prescriptions filled during a user specified period of time for a specific patient status.

Pharmacy Cost Statistics Menu [PSO COST STAT MENU]

This menu contains options for pharmacy cost statistics data.

<u>Pharmacy Statistics</u> [PSO COST STATISTICS]

This report contains cost information and other statistics for all prescriptions filled during a user specified period of time.

<u>Sort Statistics By Division</u> [PSO COST STATS BY DIVISION]

This report sorted by division contains cost information and other statistics for all prescriptions filled during a user specified period of time.

Provider by Drug Costs [PSO COST PROVIDER BY DRUG]

This report sorted by provider displays data on all prescriptions filled for each drug during a user specified period of time.

Provider Costs [PSO COST PER PROVIDER]

This report displays the total prescription and cost data for prescriptions sorted by provider for a user specified period of time.

Request Statistics [PSO REQ STATS]

This report displays the total number of requests for service, average cost for each request, and average number of fills per request for a user specified period of time.

Daily AMIS Report [PSO DAILY AMIS]

This report contains Automated Management Information System (AMIS) data for a selected day, month, and quarter. Output includes daily, monthly, and quarter AMIS totals.

Drug List By Synonym [PSO SYNONYM]

This report lists all active drugs in alphabetical order by synonym. The drug is listed once for each synonym.

Free Text Dosage Report [PSO DOSAGE REPORT]

This report provides a list of drugs for prescriptions having a Dosage Ordered entry that is free text or a dosage that results in the calculation of the number of tablets. This report is designed to help identify all such entries so that sites can determine if these dosages should be added to the Local Possible Dosages in the DRUG file, which would make them selectable during the medication order entry process.

Example: Free Text Dosage Report

Run Date: NOV 13,2006 Page 1 Free Text Dosage Entry Report for the Period: APR 27,2006 to NOV 13,2006			
Drug Provider:Count	Free Text Entry	Count	
ACETAMINOPHEN AND CODEINE 30MG (342) 3 TABLETS OPPROVIDER24,TWO:3			
ALCOHOL PREP PADS (3718) OPPROVIDER13,TWO:2	1 PAD	2	
OPPROVIDER13, TWO:1	PAD	1	
AMINOPHYLLINE 500MG SUPP (3422) OPPROVIDER13,TWO:1	1 SUPPOSITORY(IES) 500MG	1	
ASPIRIN BUFFERED 325MG TAB (280) OPPROVIDER24,TWO:2	1625MG	2	
	975MG	3	
OPPROVIDER24,TWO:2 OPPROVIDER13,TWO:1			

Inactive Drug List [PSO INACTIVE]

This report lists those drugs on file that have been inactivated.

VA FileMan sorts this report. If the user does not have VA FileMan experience, it is strongly recommended that the local IRMS staff be contacted before running this report.

Internet Refill Report [PSO INTERNET REFILL REPORT]

This option generates a list of all Internet Refill prescriptions sorted by Patient, Date, or Result for one division or for all. This report can be printed in detail or summary format.

Example: Internet Refill Report - Detailed report, sorted by patient

Select Output Reports Option: Internet Refill Report You may select a single or multiple DIVISIONS, or enter ^ALL to select all DIVISIONS. List of Patients/Prescriptions for Recall Notice [PSO RECALL LIST]

This report lists prescriptions containing medications associated with specific recall criteria, such as lot numbers and/or National Drug Code (NDC) numbers.

This new option has been placed under the Output Reports [PSO OUTPUTS] menu and prompts the user for the following criteria:

- Division
- Prescription Release Date Range
- Inclusion/Exclusion of Deceased Patients
- Medication Identifier

One of the following four medication identifiers may be selected:

1-NDC code
2-Dispense Drug and Lot Number
3-Dispense Drug only
4-Drug Name (VA Generic or Orderable Item)

Example: List of Patients/Prescriptions for Recall Notice - Input

```
Division: ^ALL
  From Release Date: T-90// (OCT 30, 2009)
  To Release Date: T// (JAN 28, 2010)
  Exclude Deceased Patients? YES//

-----example continues-----
```

Example: List of Patients/Prescriptions for Recall Notice – Input (continued)

Before continuing, please set up your terminal to capture the detailed report data. On some terminals, this can be done by clicking on the 'Tools' menu above, then click on 'Capture Incoming Data' to save to Desktop. This report may take a while to run.

The output of this report is in a delimited output format suitable for export to MS Excel and includes data from original prescription fills, refills, partial fills, and Consolidated Mail Outpatient Pharmacy (CMOP) fills. The report output is sorted primarily by patient name and secondarily by prescription number.

Each fill of the prescription is printed on a separate line preceded by a "HEADER" line containing patient demographic information. Each prescription detail line starts with a double backslash followed by an identifier to denote the type of fill (ORIGINAL, REFILL, PARTIAL, or CMOP).

Example: List of Patients/Prescriptions for Recall Notice - Output

List Prescriptions on Hold [PSO HOLDRPT]

This report lists prescriptions that have a hold status.

Management Reports Menu [PSO MGMT REPORT MENU]

With this menu the user can compile data for daily or monthly management reports. When the data has been compiled, the reports can be viewed on screen (132 columns) or printed on a 132-column printer.

Important

Before printing the first management report, the *Initialize Daily Compile* option must be run. This option compiles past management data for a user specified date range and then queues a job to run every morning at 1:00 a.m. to compile the previous day's data.

This menu contains the following options:

- Daily Management Report Menu ...
- Date Range Recompile Data
- Initialize Daily Compile
- Monthly Management Report Menu ...
- One Day Recompile Data
- Purge Data

Daily Management Report Menu [PSO MGMT REPORT DAILY MENU]

This menu contains the following options for printing the daily management reports:

- All Reports
- Cost of Prescriptions
- Count of Prescriptions
- Intravenous Admixture
- Type of Prescriptions Filled

<u>All Reports</u> [PSO MGMT REPORTS ALL DAILY]

This option prints all of the daily management reports for Outpatient Pharmacy that includes the Intravenous Admixture, Cost of Prescriptions, Prescription Count, and Type of Prescriptions Filled reports. They can be printed for a specific division or for all divisions if the site is multidivisional.

<u>Cost of Prescriptions</u> [PSO MGMT REPORT RX COSTS]

This report contains the average cost and total cost for staff prescriptions, fee prescriptions, all prescriptions, equivalent fills, methadone prescriptions (if a methadone program exists), and participating pharmacies prescriptions.

<u>Count of Prescriptions</u> [PSO MGMT REPORT RX COUNTS]

This report contains the total number of prescriptions filled during the specified month(s). It contains the patient category, number of equivalent fills, total prescriptions, total methadone prescriptions (if a methadone program exists), and patient requests.

Intravenous Admixture [PSO MGMT REPORT IV]

This report contains the total, average cost for piggybacks and syringes, L.V.P., T.P.N., and Chemotherapy used for outpatients only. A grand total for each month is also provided.

<u>Type of Prescriptions Filled</u> [PSO MGMT REPORT TYPE OF RX]

This report contains the total number of prescriptions filled by fee and staff physicians, new and refill prescriptions, prescriptions sent by mail or dispensed at the window, prescriptions filled by participating pharmacies, and investigation drug prescriptions.

Date Range Recompile Data [PSO MGMT RPT RANGE COMPILE]

The management data for a user specified date range could be compiled/recompiled with this option. The data must be recompiled if prescription data has changed for prescriptions filled or refilled before today.

Initialize Daily Compile [PSO MGMT RPT DAILY COMPILE]

This option queues a job to run every day at 1:00 a.m. to compile the previous day's management reports data. It also compiles the management data for a specific date range. When initializing the compiling of data prior to yesterday's date, the default date will be either today plus 1 at 1:00 a.m. (T+1@01:00) if the option has never been queued or the date and time this option has already been queued to run.

This option must be run to initialize the compiling of management report data before the management reports are printed.

Monthly Management Report Menu [PSO MGMT REPORT MONTHLY MENU]

This menu contains options for printing the monthly management reports. The monthly management reports can be printed for previous months, but not the current month. The options are:

- All Reports
- Cost of Prescriptions
- Count of Prescriptions
- Intravenous Admixture
- Type of Prescriptions Filled

<u>All Reports</u> [PSO MGMT MONTHLY ALL REPORTS]

Print all of the monthly management reports with this option. These reports include the Intravenous Admixture, Cost of Prescriptions, Count of Prescriptions, and Type of Prescriptions Filled reports.

<u>Cost of Prescriptions</u> [PSO MGMT MONTHLY RX COSTS]

This report contains the average and total cost for staff prescriptions, fee prescriptions, all prescriptions, equivalent fills, methadone prescriptions (if a methadone program exists), and participating pharmacies prescriptions.

<u>Count of Prescriptions</u> [PSO MGMT MONTHLY RX COUNTS]

This report contains the total number of prescriptions filled during the specified month(s). It includes the patient category, number of equivalent fills, total prescriptions, total methadone (if methadone program exists), and patient requests.

Intravenous Admixture [PSO MGMT MONTHLY IV]

This report contains the total and average cost for piggybacks and syringes, L.V.P., T.P.N., and Chemotherapy, plus the grand total for each month.

<u>Type of Prescriptions Filled</u> [PSO MGMT MONTHLY TYPE OF RX]

This report contains the number of prescriptions filled by fee and staff physicians, new and refill prescriptions, prescriptions sent by mail or dispensed at the window, prescriptions filled by participating pharmacies, and investigational drug prescriptions.

One Day Recompile Data [PSO MGMT REPORT MONTHLY MENU]

The management data for a user specified day can be compiled/recompiled with this option.

Purge Data [PSO MGMT DATA PURGE]

Delete data from the OUTPATIENT PHARMACY MANAGEMENT DATA file with this option. The default starting date will always be the first date in the file.

Medication Profile [PSO P]

This report is the same as the "Medication Profile" described in "Chapter 15: Using the Medication Profile".

Monthly Drug Cost [PSO MONTHLYCOST]

This report lists the monthly drug costs and can be printed for a selected drug or all drugs. This report must be printed on a 132-column printer.

Narcotic Prescription List

[PSO NARC]

This report lists the quantity, provider, fill date, patient, and patient ID for each prescription for narcotic drugs filled during the specified time period. This report must be printed on a 132-column printer.

Non-Formulary List [PSO NONFORM]

This report lists all active drugs that have been designated as non-formulary. Non-formulary drugs are those that have not been approved for routine use by the Pharmacy and Therapeutics Committee of the medical center. These items can be dispensed under special circumstances when approved by the designated authority.

Non-VA Meds Usage Report [PSO NON-VA MEDS USAGE REPORT]

This report lists the patient's Non-VA medical orders that are documented via the CPRS GUI package. The Patient Name, Order Status, Orderable Item, Date Documented, or Order Checks are the available sorting criteria for this report. (When sorting by Order Checks, the Non-VA Med orders with Order Checks will print before any Non-VA Med orders without Order Checks. When sorting by Status, the Active Non-VA Med orders will be displayed before the Inactive Non-VA Med orders.) It is an 80-column report available for printing to the screen or to a print device.

Example: Non-VA Meds Usage Report

```
Select Outpatient Pharmacy Manager Option: OUTPut Reports

Non-VA Meds are automatically discontinued when a Date of Death has been entered for a patient. In the event a Date of Death is entered in-error and subsequently deleted, the Non-VA Meds will be automatically reinstalled to an active status if they were active before they were discontinued.

(This page included for two-sided copying.)

Poly Pharmacy Report [PSO POLY]

This report lists a patient or patients with a selected minimum amount of prescriptions within a selected number of days. The Non-VA Med orders are included in the amount of prescriptions and are displayed, after all of the medications distributed by the VA, on this report. Only active prescriptions show on this report. The class column of this report is the drug classification from the DRUG file.

Released and Unreleased Prescription Report

[PSO RELEASE REPORT]

This report lists released and unreleased prescriptions by date range. The start date default is the date the package is installed and the end date default will be the current date.

Prescription List for Drug Warnings [PSO RX LIST]

This report lists all prescriptions that have been finished with a particular medication(s) within a given date range.

This new option has been placed under the Output Reports [PSO OUTPUTS] menu and uses a sort template PSO DRUG WARNINGS.

Example: Prescription List for Drug Warnings – Input

The output of this report is in a delimited output format suitable for export to MS Excel and includes data from original prescription fills, refills, partial fills, and Consolidated Mail Outpatient Pharmacy (CMOP) fills. The report output is sorted primarily by patient name and secondarily by prescription number.

Each fill of the prescription is printed on a separate line preceded by a "HEADER" line containing patient demographic information. Each prescription detail line starts with a double backslash followed by an identifier to denote the type of fill (ORIGINAL, REFILL, PARTIAL, or CMOP).

Example: Prescription List for Drug Warnings – Output

Chapter 17: Using the Pharmacy Intervention Menu

This chapter describes the options in the *Pharmacy Intervention Menu*.

Pharmacy Intervention Menu

[PSO INTERVENTION MENU]

The *Pharmacy Intervention Menu* option enables the user to enter, edit, print, delete, or view interventions in the APSP INTERVENTION file.

The following options are available on this menu:

- Enter Pharmacy Intervention
- Edit Pharmacy Intervention
- Print Pharmacy Intervention
- Delete Intervention
- View Intervention

Enter Pharmacy Intervention [PSO INTERVENTION NEW ENTRY]

When it is necessary to interrupt the filling of a prescription to contact the provider in order to change, clarify, or cancel the prescription, use this option to add a new intervention entry into the APSP INTERVENTION file.

Edit Pharmacy Intervention [PSO INTERVENTION EDIT]

Use this option to edit an already existing entry in the APSP INTERVENTION file.

Print Pharmacy Intervention [PSO INTERVENTION PRINTOUT]

A captioned report of pharmacy interventions for a certain date range can be printed with this option. The report prints out on normal width paper and it can be queued to print at a later time.

The "subtotal" on this report represents the number of interventions for a specific type of intervention where the recommendation for the intervention was accepted. The "total" is the sum of all interventions in which the recommendation was accepted.

The "sub count" on this report is the number of interventions for a specific type of intervention over the specific date range. The "count" is the total number of all interventions over the specific date range.

Delete Intervention [PSO INTERVENTION DELETE]

This option can be used to delete an intervention from the APSP INTERVENTION file. An intervention can be deleted only on the same day that it was entered.

View Intervention [PSO INTERVENTION VIEW]

This option displays pharmacy interventions in a captioned format. More than one intervention can be viewed at a time.

Chapter 18: Processing Drug/Drug Interactions

This chapter describes the option used for processing drug interactions.

Process Drug/Drug Interactions [PSO INTERACTION VERIFY]

This option can be used to process information for medications that have been marked as a drug/drug interaction. This allows prescriptions with drug/drug interactions to be processed, deleted, or bypassed. An assigned signature code, which will not appear on the screen, must be entered to complete any of these actions. It will then be verified or non-verified. The *Electronic Signature Code Edit* option can be found under the *User's Toolbox* menu in Kernel V. 8.0.

When processing a drug/drug interaction, the profile will list the status of the interacting drug orders as pending (P).

This section describes the Drug-Drug Interaction enhancements made to the Outpatient Pharmacy application included in PSO*7*251.

The Duplicate Drug order check will continue to be performed against active, pending, non-verified, orders on hold (initiated through pharmacy or CPRS), expired and discontinued orders. The timeframe for inclusion of expired and discontinued orders is determined by the display rules on the medication profile. This check will be performed on active Non-VA Medication orders.

Legacy VistA drug-drug interactions have been enhanced to utilize FDB's DIF business rules, APIs and database to provide more clinically relevant drug interaction information. No changes have been made to the existing user actions for critical or significant drug interactions. The pharmacist will have to log an intervention for local, pending and remote critical interactions and have the option of logging an intervention for local and remote significant interactions. No action is required for Non-VA medications orders.

Any remote Outpatient order (from another VAMC or Department of Defense (DoD) facility) using data from Health Data Repository Historical (HDR-Hx) or Health Data Repository- Interim Messaging Solution (HDR-IMS) that has been expired for 30 days or less will be included in the list of medications to be checked.

FDB custom drug interaction tables will be used to store custom changes to FDB standard reference drug interaction tables. FDB drug interactions that are designated as critical in VistA will have their severity level modified to '1'. All FDB drug interactions that are designated as significant in VistA will have their severity level modified to '2'. Any drug interaction in VistA that is not in FDB will be added to the FDB custom tables. For these interactions a custom monograph will be created with a clinical effects section.

The following Outpatient Pharmacy order entry processes have been enhanced:

- Entering a new order via backdoor pharmacy options
- Finishing a pending order

- Renewing an order
- Editing an order which results in a new order being created.
- Verifying an order
- Copying an order
- Reinstating a discontinued order

If a dispense drug is associated with an active Non-VA med order, that dispense drug will be used for the drug interaction order check.

If no dispense drug is associated with an active Non-VA med order, the first active dispense drug marked for Non-VA med use associated with the orderable item will be used for the Drug Interaction order check.

If there are no active dispense drugs marked for Non-VA med use that are associated with the orderable item, then the first active dispense drug marked for Outpatient use associated with the Orderable Item will be used.

If there are no active dispense drugs marked for Outpatient use associated with the orderable item, the first active dispense drugs associated with the orderable item will be used.

If there are no active dispense drugs associated with the orderable item for the Non-VA med order, no Drug Interaction order check will be performed.

Drug interaction order checks will be performed against pending orders.

The software will display to a non-pharmacist (does not hold PSORPH key) when entering a new order via pharmacy backdoor options or when finishing an order entered through CPRS the same drug interaction warning information as shown to a pharmacist.

See examples below:

Critical Drug Interaction with Local Rx

CRITICAL Drug Interaction with Prospective Drug: INDINAVIR 400MG CAP and Local Rx#: 2443 Drug: AMIODARONE 200MG TAB (ACTIVE) SIG: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY Processing Status: Released locally on 11/08/06@08:55:32 (Window) Last Filled On: 11/08/06 The concurrent administration of amiodarone with indinavir,(1) nelfinavir,(2) ritonavir,(3) or tipranavir coadministered with ritonavir(4) may result in increased levels, clinical effects, and toxicity of amiodarone.

Significant Drug Interaction with Local Rx

Critical Drug Interaction with Remote Rx

CRITICAL Drug Interaction with Prospective Drug: INDINAVIR 400MG CAP and LOCATION: <VA or DOD Facility> Remote Rx#: 2443 Drug: AMIODARONE 200MG TAB (ACTIVE) SIG: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY Last Filled On: 11/08/06

The concurrent administration of amiodarone with indinavir,(1) nelfinavir,(2) ritonavir,(3) or tipranavir coadministered with ritonavir(4) may result in increased levels, clinical effects, and toxicity of amiodarone.

Critical Drug Interaction with Non-VA Med Order

Critical Drug Interaction with Prospective Drug: WARFARIN 5MG TAB and Non-VA Med: CIMETIDINE 200MG TAB Dosage: ONE TABLET Schedule: AT BEDTIME

The pharmacologic effects of warfarin may be increased resulting in severe bleeding.

Significant Drug Interaction with Non-VA Med Order

Significant Drug Interaction with Prospective Drug: WARFARIN 5MG TAB and Non-VA Med: ASPIRIN 325MG TAB Dosage: ONE TABLET Schedule: <NOT ENTERED>

 $\ast\ast\ast$ refer to monograph for significant interaction clinical effects

Critical Drug Interaction with Pending Order

Significant Drug Interaction with Pending Order

SIGNIFICANT Drug Interaction with Prospective Drug: WARFARIN 5MG TAB and Pending Drug: ASPIRIN 325MG TAB SIG: TAKE ONE TABLET EVERY 8 HOURS

*** REFER TO MONOGRAPH FOR SIGNIFICANT INTERACTION CLINICAL EFFECTS

The FDB standard professional drug interaction monograph is shown below:

This information is generalized and not intended as specific medical advice. Consult your healthcare professional before taking or discontinuing any drug or commencing any course of treatment.

MONOGRAPH TITLE: Anticoagulants/Salicylates

SEVERITY LEVEL: 2-Severe Interaction: Action is required to reduce the risk of severe adverse interaction.

MECHANISM OF ACTION: Multiple processes are involved: 1) Salicylate doses greater than 3 gm daily decrease plasma prothrombin levels. 2) Salicylates may also displace anticoagulants from plasma protein binding sites. 3) Salicylates impair platelet function, resulting in prolonged bleeding time. 4) Salicylates may cause gastrointestinal bleeding due to irritation.

CLINICAL EFFECTS: The concurrent use of anticoagulants and salicylates may result in increased INR values and increase the risk of bleeding.

PREDISPOSING FACTORS: None determined.

PATIENT MANAGEMENT: Avoid concomitant administration of these drugs. If salicylate use is necessary, monitor prothrombin time, bleeding time, or INR values closely. When possible, the administration of a non-aspirin salicylate would be preferable.

DISCUSSION: This interaction has been reported between aspirin and warfarin and between aspirin and dicumarol. Diflunisal, sodium salicylate, and topical methyl salicylate have been shown to interact with anticoagulants as well. Based on the proposed mechanisms, other salicylates would be expected to interact with anticoagulants as well. The time of highest risk for a coumarin-type drug interaction is when the precipitant drug is initiated, altered, or discontinued.

Professional Monograph Drug Interaction with WARFARIN and ASPIRIN

MONOGRAPH TITLE: Anticoagulants/Salicylates

SEVERITY LEVEL: 2-Severe Interaction: Action is required to reduce the risk of severe adverse interaction.

MECHANISM OF ACTION: Multiple processes are involved: 1) Salicylate doses greater than 3 gm daily decrease plasma prothrombin levels. 2) Salicylates may also displace anticoagulants from plasma protein binding sites. 3) Salicylates impair platelet function, resulting in prolonged bleeding time. 4) Salicylates may cause gastrointestinal bleeding due to irritation.

CLINICAL EFFECTS: The concurrent use of anticoagulants and salicylates may result in increased INR values and increase the risk of bleeding.

PREDISPOSING FACTORS: None determined.

PATIENT MANAGEMENT: Avoid concomitant administration of these drugs. If salicylate use is necessary, monitor prothrombin time, bleeding time, or INR values closely. When possible, the administration of a non-aspirin salicylate would be preferable.

DISCUSSION: This interaction has been reported between aspirin and warfarin and between aspirin and dicumarol. Diflunisal, sodium salicylate, and topical methyl salicylate have been shown to interact with anticoagulants as well. Based on the proposed mechanisms, other salicylates would be expected to interact with anticoagulants as well. The time of highest risk for a coumarin-type drug interaction is when the precipitant drug is initiated, altered, or discontinued.

Display Professional Interaction Monograph? No// No ***SIGNIFICANT*** Drug Interaction with Prospective Drug: WARFARIN 5MG TAB and Local RX#: 2443 Drug: IBUPROFEN 600MG TAB (ACTIVE) SIG: TAKE ONE TABLET BY MOUTH THREE TIMES DAILY Processing Status: Released locally on 11/08/07@08:55:32 (Window) Last Filled On: 11/08/07 *** REFER TO MONOGRAPH FOR SIGNIFICANT INTERACTION CLINICAL EFFFECTS Display Professional Interaction Monograph? No// Yes Device: Home// <Home would print to screen, or a specific device could be specified> Professional Monograph Drug Interaction with WARFARIN and IBUPROFEN MONOGRAPH TITLE: Anticoagulants/NSAIDs SEVERITY LEVEL: 3-Moderate Interaction: Assess the risk to the patient and take action as needed. MECHANISM OF ACTION: The exact mechanism is unknown. Some NSAIDs may displace anticoagulants from plasma protein binding sites. NSAIDs also have the potential to produce gastrointestinal ulceration and bleeding. Some NSAIDs may impair platelet function and prolong bleeding times. CLINICAL EFFECTS: In some patients, NSAIDs have been associated with an increase in the hypoprothrombinemic effect to anticoagulants. PREDISPOSING FACTORS: None determined. PATIENT MANAGEMENT: If concurrent therapy with anticoagulants and NSAIDs is warranted, patients should be monitored for an increased hypoprothrombinemic response when NSAIDs are added to the patient's drug regimen. In addition to routine monitoring of INR values, the patient should be observed for signs of increased effect, including bruising or bleeding. The time of highest risk for a coumarin-type drug interaction is when the

precipitant drug is initiated or discontinued. Consult with the prescriber before initiating, altering the dose of, or discontinuing either drug.

DISCUSSION: The effects of NSAIDs on the hypoprothrombinemic response to anticoagulants appears to vary between patients as well as with different NSAIDs. Documentation is frequently contradictory - while studies have shown several NSAIDs to have no effect on the pharmacokinetics of warfarin, case reports have documented increased effects with and without bleeding when these same NSAIDs were administered concurrently with warfarin.While celecoxib has been shown not to affect platelet aggregation or bleeding times and had no effects on the anticoagulant effect of warfarin in healthy subjects, increased prothrombin times and bleeding episodes, some of which were fatal, have been reported, predominantly in the elderly, in patients receiving concurrent therapy with celecoxib and warfarin.Rofecoxib has been shown to increase prothrombin times in subjects who received concurrent warfarin therapy.If concurrent therapy with anticoagulants and NSAIDs is warranted, it would be prudent to monitor patients closely for increased anticoagulant effects.

1. Therapeutic Duplication

This section describes enhancements to the existing VistA Duplicate Class order checks.

The current VistA Duplicate Class checks have been enhanced using the FDB business rules and database, as well as the FDB Enhanced Therapeutic Classification (ETC) system. The Duplicate Class check will now be referred to as the Duplicate Therapy order check. This order check will continue to be performed against active, pending, non-verified orders on hold (initiated through pharmacy or CPRS), expired and discontinued orders. The timeframe for inclusion of expired and discontinued orders is determined by the display rules on the medication profile. This check will be performed on active Non-VA Medication orders.

No changes have been made to the existing user actions for Duplicate Therapy order checks. Users will continue to have the ability to discontinue the order. The existing order will only be discontinued upon acceptance of the order being processed. No discontinue actions can be performed on remote outpatient orders, Non-VA medications, discontinued, and expired orders or orders placed on provider hold through CPRS. If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', no discontinue action is allowed on any duplicate class order.

Any remote Outpatient order (from another VAMC or Department of Defense (DoD) facility) using data from Health Data Repository Historical (HDR-Hx) or Health Data Repository- Interim Messaging Solution (HDR-IMS) that has been expired for 30 days or less will be included in the list of medications to be checked.

FDB custom tables will be used to store custom changes to the duplication allowance for a FDB therapeutic classification. Each duplicate therapy class is assigned a duplication allowance. The duplication allowance for a therapeutic allowance determines whether or not the therapeutic duplication warning will be displayed to the user.

The Vendor's (currently FDB) Enhanced Therapeutic Classification (ETC) System is now used in place of the VA Drug Class for the Duplicate Therapy (formerly duplicate class) order checks.

Duplicate Therapy order checks will no longer be processed in pairs. Each duplicate therapy warning includes as many outpatient medication orders that it applies to.

A duplicate therapy warning is only displayed if the number of duplicate therapy matches exceeds the duplication allowance specified for the FDB duplicate therapy class.

The following processes use the enhanced functionality:

- Entering a new outpatient medication order through pharmacy options
- Finishing a pending outpatient medication order
- Renewing an outpatient medication order
- When a new outpatient medication order is created via an edit
- Verification of an outpatient medication order entered or finished by a non-pharmacist
- Copy of an outpatient medication order
- Reinstatement of an outpatient medication order

See illustrations below:

Local Rx

```
*** THERAPEUTIC DUPLICATION(S) *** FAMOTIDINE 20MG TAB with
Local Rx#: 2561
Drug: CIMETIDINE 300MG TAB (DISCONTINUED)
SIG: TAKE ONE TABLET BY MOUTH AT BEDTIME
QTY: 30 Days Supply: 30
Processing Status: Released locally on 3/4/08@08:55:32 (Window)
Last Filled On: 11/08/06
Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents, Histamine-2
Receptor Antagonists (H2 Antagonists)
```

Remote Rx

```
*** THERAPEUTIC DUPLICATION(S) *** SUCRALFATE 1GM TAB with
LOCATION: <VA OR DOD FACILITY> Remote Rx#: 65343
Drug: RANITIDINE HCL 150MG TAB (EXPIRED)
SIG: TAKE ONE TABLET BY MOUTH TWICE A DAY
QTY: 180 Days Supply: 90
Last Filled On: 11/08/06
Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents
```

Pending Order

```
*** THERAPEUTIC DUPLICATION(S) *** NIZATIDINE 150MG CAP with
Pending Drug: FAMOTIDINE 20MG TAB
SIG: TAKE ONE TABLET BY TWICE DAILY
```

Class(es)Involved in Therapeutic Duplication(s): Peptic Ulcer Agents

Non-VA Med Order

If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', the following information is shown for the duplicate therapy warning:

```
*** THERAPEUTIC DUPLICATION(S) *** NIZATIDINE 150MG CAP with
Local Rx #2561 (ACTIVE) for CIMETIDINE 300MG TAB
Local Rx #2572 (PROVIDER HOLD) for SUCRALFATE 1MG TAB
Remote Rx #2571 (DISCONTINUED) for RANITIDINE HCL 150MG TAB
Pending Order for FAMOTIDINE 20MG TAB
Non-VA Med Order for CIMETIDINE 300MG TAB
Class(es)Involved in Therapeutic Duplication(s): PEPTIC ULCER AGENTS, HISTAMINE-2
RECEPTOR ANTAGOINSTS (H2 ANTAGONISTS)
```

If there is more than one remote, local, pending or Non-VA med order involved in the therapeutic duplication, the order details will be displayed one after the other.

If the same drugs are involved in multiple therapeutic duplications, a single therapeutic duplication warning will be displayed and multiple therapeutic classes will be listed.

If the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'No', no discontinue action prompt will be presented.

After all the therapeutic duplication warnings are displayed and if the CANCEL DRUG IN SAME CLASS outpatient site parameter is set to 'Yes', the user will be asked if they want to discontinue any of the orders.

See Examples:

Discontinue RX #2580A SUCRALFATE 1GM TAB? Y/N

Discontinue Pending Order SUCRALFATE 1GM TAB? Y/N

The system will only allow a discontinuation action on active, pending, non-verified and orders placed on hold by pharmacy.

The discontinuation of selected orders by the system will occur at the time the user accepts the order that is being processed.

Allergy/ADR Order Checks (PSO*7*251)

This section will detail the Allergy/ADR order check display within Outpatient Pharmacy.

Legacy Outpatient Pharmacy displays the same allergy/ADR warning twice if drug class(es) and drug ingredient(s) are defined for the allergy/ADR. The drug class is listed on one display and the drug ingredient on the other. The user is also prompted to intervene for both warnings. Local and remote Allergy/ADRs are combined.

If no Allergy Assessment has been documented for the patient for whom the medication order is being processed, an intervention dialog is available for each order. Only one warning will be displayed for an Allergy/ADR. If no intervention is chosen, the standard order entry dialog will resume.

See examples below:

Chapter 19: Releasing Medication

This chapter describes the option used for releasing medications.

Release Medication

[PSO RELEASE]

The *Release Medication* option is used at the time the prescription is filled and ready to be given to the patient. Inventory is decreased, certain fields in the file are updated, and a copay is generated if the action is applicable to the prescription. With this option, prescriptions can be batch processed. Communication is made with the Integrated Funds Control, Accounting and Procurement (IFCAP) and Integrated Billing (IB) software to generate copay charges. IFCAP and IB software handle patient billing, tracking of charges, and payment received.

The copay status of a prescription is re-evaluated whenever a fill is released. Various actions can occur based on changes to the criteria that determine the copay status of a prescription. The actions that may result at the time a fill is released are described below.

- 1. No action is taken. No changes to the criteria that determine copay status of a prescription have occurred.
- 2. The copay status of the prescription is automatically reset and an entry is placed in the Copay activity log.

Example: The drug for which the prescription is written is no longer marked for investigational use. The copay status of the prescription is reset from No Copayment to Copay.

3. The copay status of the prescription is automatically reset, an entry is placed in the Copay activity log, and a MailMan message is generated detailing missing information required for user follow up.

Example: The drug for which the prescription is written is no longer marked for investigational use. The copay status of the prescription is reset from No Copayment to Copay. The patient has been documented as being exposed to Southwest Asia Conditions during Persian Gulf War service since the last fill. A MailMan message will be generated informing the user that the 'Is this Rx for treatment related to service in SW Asia?' question must be addressed and documented using the *Reset Copay Status/Cancel Charges* option.

4. A MailMan message is generated detailing missing information required for user follow-up.

Example: A Veteran is documented as having Agent Orange exposure. Refill #2 for a prescription entered into the system before the new medication copay exemptions took effect on January 1, 2002 is released. The prescription is copay eligible. A MailMan message will be generated informing recipients that the 'Is this Rx for treatment of Vietnam-Era Herbicide (Agent Orange) exposure?' question must be addressed. The copay status of the Rx may change based on the response entered using the *Reset Copay Status/Cancel Charges* option.

If a MailMan message is generated at the time a prescription fill is released, the recipients of the message will be the provider of record, the pharmacy user who finished the order, and holders of the PSO COPAY key. The message lists the patient name, prescription number, and medication ordered, current copay status, and applicable copay exemption questions that need addressing to determine the prescription's copay status. The *Reset Copay Status/Cancel Charges* option must be used to enter the responses to the medication copay exemption questions listed in the MailMan message. If responses are not entered for the applicable medication copay exemption questions, any subsequent refills when released for this prescription and possibly other prescriptions for this patient will continue to generate the same MailMan message.

Example: MailMan Message

Subj: PRESCRIPTION QUESTIONS REVIEW NEEDED (500) [#30364] 10/11/05@19:56 35 lines From: OUTPATIENT PHARMACY PACKAGE In 'IN' basket. Subj: PRESCRIPTION QUESTIONS REVIEW NEEDED (500) [#30364] Page 2
Providers:
Please respond with your answer to the question(s) as a reply to this
message. The prescription will be updated by the appropriate staff.
Staff assigned to update the Prescription responses:
Please use the RESET COPAY STATUS/CANCEL CHARGES option to enter the responses
to the questions above, which may result in a Rx copay status change and/or
the need to remove VA copay charges or may result in a charge to the patient's
insurance carrier.
Note: The SC question is now asked for Veterans who are SC>49% in order to
determine if the Rx can be billed to a third party insurance. These Veterans
will NOT be charged a VA copay.
Supply, nutritional, and investigational drugs are not charged a VA copay but
could be reimbursable by third party insurance.
Enter message action (in IN basket): Ignore//

An annual copayment cap is applied to patients in specific priority enrollment groups. Once a patient reaches the annual copayment cap, no further medication copay charges will be billed for the calendar year. An entry to that effect is made to the Copay Activity Log. The '\$' indicator remains next to the prescription number to indicate that the prescription is still copay eligible.

Integrated Billing software keeps track of all prescription fills not billed due to the annual cap.

Example: Copay Activity Log When Annual Cap Reached

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 10/23/01 ANNUAL CAP REACHED ORIGINAL OPPHARMACIST11, THREE Comment: NO BILLING FOR THIS FILL

If a patient falls below the annual copayment cap for whatever reason (e.g. prescription fill is returned to stock and copay charges cancelled), the Integrated Billing package can initiate copay charges to bring the patient back up to the annual copayment cap. Integrated billing software will go back and bill a copay charge for those fills previously not charged due to the annual cap, bringing the patient's total copayment up to the cap. Whenever this occurs an entry will be placed in the Copay activity log.

Example: Copay Activity Log With IB-Initiated Charge

Cop	ay Activity	Log:			
#	Date	Reason	Rx Ref	Initiator Of Activity	
===					
1	10/23/01	ANNUAL CAP REACHED	ORIGINAL	OPPHARMACIST11, THREE	
Com	ment: NO BI	LLING FOR THIS FILL			
2	10/23/01	IB-INITIATED COPAY	ORIGINAL	OPPHARMACIST11, THREE	
Comment: PARTIAL CHARGE					

If a prescription is <u>not</u> in a releasable status, the user will be given an error message, such as:

- Prescription has a status of (status) and is not eligible for release.
- Prescription was deleted.
- Improper barcode format.
- Non-existent prescription.

Copay is not charged for a partial fill.

Important

This is a mandatory function that must be used by the pharmacy.

Changes to Releasing Orders function - Digitally Signed Orders Only

The release function in the *Patient Prescription Processing* option has been modified with patch PSO*7*131 to require that all digitally signed orders for Schedule II controlled substances (CSII orders) be released through the *Outpatient Rx's* option in the *Controlled Substances* (CS) menu. If DEA/PKI is activated and an order is digitally signed, the user will be advised that the order must be released through the *Outpatient Rx's* option in the *Controlled Substances* (CS) menu. If DEA/PKI is activated and an order is digitally signed, the user will be advised that the order must be released through the *Outpatient Rx's* option in the *Controlled Substances* (CS) menu. The same message will display if a user attempts to release a digitally signed CSII order during Speed Release or when using the *Release Medication* option.

At this time the functionality for entering and processing digitally signed orders is part of a pilot project limited to only one site. System-wide implementation of this functionality requires further study and modifications.

Changes to Releasing Orders Function - ScripTalk®

The release function in the *Patient Prescription Processing* option has been modified to display a message to the user when the site is using a Bingo Board and when the patient is enrolled in ScripTalk®. This message will alert the user that the patient is enrolled in ScripTalk® and may need to have a verbal announcement that the prescription(s) is ready, instead of a visual announcement.

Example: Releasing Medication to a ScripTalk® Patient

```
Prescription Number 400693 Released
No Refill(s) to be Released
No Partial(s) to be Released
OPPATIENT16,ONE added to the WAITING display.
This patient is enrolled in ScripTalk and may benefit from
a non-visual announcement that prescriptions are ready.
Press Return to Continue:
```

Changes to Releasing Orders Function – Signature Alert

With Patch PSO*7*385, the release function in the *Patient Prescription Processing* option has been modified to display a message to the user when an ECME-billable prescription is being released as a window fill. This message will alert the user that the patient's signature must be obtained. The user is not required to press <Enter> to continue or respond to the alert in any other manner.

Example: Releasing an ePharmacy Window Fill

Prescription Number 100003853 Released No Refill(s) to be Released No Partial(s) to be Released

ePharmacy Rx - Obtain Signature

(This page included for two-sided copying.)

Changes to Releasing Orders Function – HIPAA NCPDP Global

The release function has been modified with patch PSO*7*148 to perform National Drug Code (NDC) validation for ePharmacy prescriptions. These changes also affect the Controlled Substance prescription release, which is performed through the Controlled Substances package.

The user releasing the third-party electronically billable prescription will be prompted for the NDC for the drug being dispensed to the patient. The NDC code previously retrieved when the prescription was finished will be presented as the current (default) NDC for the prescription. The other possible values that the user will be able to choose from are:

- NDC field value in the DRUG file, if valid and different than the current prescription NDC.
- LAST LOCAL NDC field value in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription, if valid and different that the current prescription NDC.
- NDC CODE field values in the SYNONYM sub-file in the DRUG file, if valid and different that the current prescription NDC.

If the NDC dispensed is not on the list to select, the user must contact the ADPAC or other designated person to add the NDC in a synonym multiple for that drug in the DRUG file.

If the NDC code selected matches the current NDC in the prescription no further NDC processing is required. However, if the user selects a different NDC, the following steps will occur:

- 1. Outpatient Pharmacy V. 7.0 will instruct the Electronic Claims Management Engine (ECME) to reverse the previous claim for the previous NDC code and submit a new claim for the newly selected NDC code.
- 2. The newly selected NDC code will be saved in the LAST LOCAL NDC field in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription.

The following examples show the new prompt for NDC validation during the release process.

Example: Releasing an ePharmacy Order - Selecting Default NDC

ePharmacy Rx - Obtain Signature

Example: Releasing an ePharmacy Order - Selecting Different NDC

```

Chapter 20: Returning Medication to Stock

This chapter describes the option used for returning medication to stock.

Return Medication to Stock [PSO RETURNED STOCK]

This option is used when a prescription has been released, but has been refused, not picked up, or not given to the patient for some reason. Comments can be entered to explain why the medication was returned to stock.

A prescription can only be returned to stock if the prescription status is Active, Discontinued, or Expired. If the prescription is not released, there is no need to return it to stock. This function increases the inventory so that a more current level is maintained by the Outpatient Pharmacy package and removes the copay charge if it is applicable to the prescription. It is highly recommended that this option be used.

When an ePharmacy prescription is returned to stock, the software checks to see if it has a PAYABLE claim. If so, a request is sent to ECME to electronically reverse the claim with the third party payer. Also, if the prescription contains any unresolved DUR or REFILL TOO SOON reject, it will be marked resolved with the reason 'Prescription Returned To Stock'.

If a copay charge is removed by returning a prescription fill to stock, an entry will be placed in the Copay activity log documenting the action.

Example: Copay Activity Log

Copay Activity Log: # Date Reason Rx Ref Initiator Of Activity 1 11/21/01 REMOVE COPAY CHARGE REFILL 1 OPPHARMACIST9, THREE Comment: RX REFUSED Returned to stock

If an **original fill** is returned to stock and reprinted, it can be released again. If a **refill** is returned to stock, the refill is deleted so the patient will not lose it.

(This page included for two-sided copying.)

Chapter 21: Processing a Prescription

This chapter describes the menu and options used in processing prescriptions.

Rx (Prescriptions) [PSO RX]

The *Rx* (*Prescriptions*) menu allows the pharmacist to manipulate information that pertains to prescriptions. Actions are taken on prescriptions via this menu. Some previous options, such as renew, refill, edit, release, are now actions in the *Patient Prescription Processing* option found on this menu. Also, data now must be entered for the individual fields that are used to build a Sig.

Default values are also displayed for possible dosages, schedules, med routes, and patient instructions. When possible, default quantities are calculated using data entered into specific fields during medication order entry.

The following options are available on this menu:

- Patient Prescription Processing
- Barcode Rx Menu ...
- Complete Orders from OERR
- *Discontinue Prescription(s)*
- Edit Prescriptions
- ePharmacy Menu ...
- Third Party Payer Rejects View/Process
- Third Party Payer Rejects Worklist
- List One Patient's Archived Rx's
- Manual Print of Multi-Rx Forms
- *Reprint an Outpatient Rx Label*
- Signature Log Reprint
- View Prescriptions

Patient Prescription Processing [PSO LM BACKDOOR ORDERS]

This option is used to process outpatient medication through OERR V. 3.0. The *Patient Prescription Processing* option is found on the *Outpatient Pharmacy Manager Menu* and the *Pharmacist Menu* under the *Rx (Prescriptions)* option. This option uses List Manager features to allow the outpatient pharmacy manager and pharmacist to perform the following actions on a prescription without leaving this option.

- Enter a new Rx
- Discontinue
- Edit
- Refill
- Renew
- Hold
- Unhold
- Order a partial

- Release
- Reprint
- Copy
- Verify a prescription
- Show a profile
- View activity log
- Pull early from suspense

When a new drug order is processed (new, renewal, finish, verify, copy, or an edit that creates a new order), order checks are performed. These include checking for duplicate drug, duplicate drug class, drug-drug interaction, and drug-drug allergy.

With the introduction of enhanced Order checks, Outpatient Pharmacy generated order checks are displayed in this sequence:

- System Errors
- Duplicate Drug
- Clozapine
- Allergy/ADR (local & remote) or Non-Assessment
- CPRS checks generated backdoor (3 new checks)
- Drug Level Errors
- Local & Remote Critical Drug Interactions
- Local & Remote Significant Drug Interactions
- Order Level Error Messages Drug Interactions
- Local & Remote Duplicate Therapy
- Order Level Error Messages Duplicate Therapy

Additionally, the order check display sequence is applied to the following processes:

- Backdoor new order entry
- Finishing a pending order
- When renewing an outpatient medication order
- Creating a new order when editing an outpatient medication order
- Verifying an outpatient medication order.
- Copying an outpatient medication order
- Reinstating a discontinued outpatient medication order.

There are two levels of error messages associated with enhanced order checking:

- 1. System When such an error occurs no drug interaction or duplicate therapy order checks will be performed. Other order checks that do not use the COTS database (FDB) will still be performed such as allergy/ADRs, duplicate drug (for outpatient only), and new CPRS order checks, etc.
- 2. Drug The second error level is for the drug and no drug interaction/duplicate therapy order checks will be performed for a specific drug. When you are processing an order, you may see a drug level error for a drug that is on the profile. This indicates that a drug interaction or duplicate therapy order check will not be performed for the drug in the order you are processing against this profile drug. Profile drug errors will only be shown once per patient session. So if you process several more orders, you will not see the error again. However, if you exit the option and at some later time reselect this patient to process new orders or take action on any existing orders, you will be shown the profile drug error once again.

If a drug level error occurs on the drug in the order you are processing, no profile drug errors will be displayed. No order checks (duplicate therapy or drug interaction) will occur for the processing drug (prospective drug). The only exception to this is when you are processing an IV order with multiple prospective drugs (i.e. multiple additives).

Error Level	Error Message	Reason	Why message is being displayed.
System	No Enhanced Order Checks can be performed.	Vendor Database cannot be reached.	The connectivity to the vendor database has gone down. A MailMan message is sent to the G. PSS ORDER CHECKS mail group when the link goes down and when it comes back up.
System	No Enhanced Order Checks can be performed.	The connection to the vendor database has been disabled.	A user has executed the Enable/Disable Vendor Database Link [PSS ENABLE/DISABLE DB LINK] option and disabled the interface.
System	No Enhanced Order Checks can be performed	Vendor database updates are being processed	The vendor database (custom and standard data) is being updated using the DATUP (Data Update) process.
Drug	Enhanced Order Checks cannot be performed for Local or Local Outpatient Drug: <drug name=""></drug>	Drug not matched to NDF	The local drug being ordered/ or on profile has not been matched to NDF. Matching the drug to a VA Product will eliminate this message.

See table below for an explanation of the errors:

Error Level	Error Message	Reason	Why message is being displayed.
Drug	Order Checks could not be done for Drug: <drug name="">, please complete a manual check for Drug Interactions and Duplicate Therapy.</drug>		If this error message is displayed, it means that the VA product that the local drug being ordered/or on profile does not have a GCNSEQNO or in rare cases, the GCNSEQNO assigned to the VA Product does not match up with a GCNSEQNO in the vendor database.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active Dispense Drug found	Highly unlikely that this error would be seen. At the time the order check was being performed the orderable item did not have an active dispense drug associated.

See examples below to illustrate error sequences.

Non-VA Med Order

```
Duplicate Drug in a Non-VA Med Order for

Drug: CIMETIDINE 300MG TAB

Dosage: 300MG

Schedule: AT BEDTIME

Medication Route: MOUTH

Start Date: <NOT ENTERED> CPRS Order #: 13554

Documented By: PSOPROVIDER,TEN on Mar 24, 2008@14:44:15

Order Check #1:

SIGNIFICANT drug-drug interaction: CIMETIDINE & PROPRANOLOL (PROPRANOLOL

TAB 40MG PO QID [PENDING])

Overriding Provider: PSOPROVIDER,TEN

Reason:<NOT ENTERED>

Statement/Explanation/Comments:

Patient wants to buy from Non-VA pharmacy
```

Duplicate Drug Order Check business rules:

- a. If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, the system will not prompt a clerk (no PSORPH key) to discontinue the order when a Duplicate Drug order check occurs.
- b. If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and a new order is being entered by a clerk (no PSORPH key) via the pharmacy backdoor, the order being processed will be deleted by the system immediately after the duplicate drug warning is displayed.
- c. If the duplicate drug is a remote order, the system will allow the clerk to process the new order after the display of the duplicate drug warning.
- d. If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and a clerk (no PSORPH key) is finishing a pending order:
 - d1. When the VERIFICATION outpatient site parameter is set to YES and the duplicate drug is a local order, the system will return the user back to the detailed order ListMan display with the available actions of Accept/Edit/Discontinue.
 - d2. When the VERIFICATION outpatient site parameter is set to YES and the duplicate drug is a remote order
 - d2a. A duplicate drug warning will be displayed
 - d2b. The clerk will be allowed to finish the order
 - d2c. The finished order will have a status of non-verified
 - d3. When the VERIFICATION outpatient site parameter is set to NO, the clerk will not be allowed to finish the order.
 - d4. If the DRUG CHECK FOR CLERK outpatient site parameter is set to Yes, a clerk (no PSORPH key) will see the same discontinue prompts as a pharmacist.
- e. If the VERIFICATION outpatient site parameter is set to YES when reinstating an order, no duplicate message will be displayed and the reinstated order will have a non-verified status.

f. No discontinuation prompt will be displayed for a duplicate Non-VA medication order in any situation.

After the Duplicate Drug warning is displayed, the system will ask the user if they wish to discontinue the order.

Active Order

Discontinue RX #2580A SUCRALFATE 1GM TAB? Y/N

Pending Order

Discontinue Pending Order for ALLOPURINOL 300MG? Y/N

If the user chooses not to discontinue the displayed order when entering a new order via the pharmacy backdoor, the system will delete the order being entered (prospective drug).

If the user chooses not to discontinue the displayed order when finishing a pending order, the system will redisplay the pending order and prompt them to accept, edit or discontinue the order.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO, and if the clerk (no PSORPH key) is copying an order, the system will return them back to the detailed order ListMan display where the copy action was initiated.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO and the VERIFICATION outpatient site parameter is set to YES when a clerk (no PSORPH key) is reinstating a discontinued order for a medication for which an active local order exists, the system will delete the active order and reinstate the discontinued order.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to NO and the VERIFICATION outpatient site parameter is set to NO when a clerk is reinstating a discontinued order for a medication for which an active local order exists, the system will display a duplicate drug warning, but the order will not be reinstated.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to YES or NO and the VERIFICATION outpatient site parameter is set to NO when a clerk is reinstating a discontinued order for a medication for which a remote order exists, the system will display a duplicate drug warning and the reinstated order will be assigned an active status.

If the DRUG CHECK FOR CLERK outpatient site parameter is set to YES or NO and the VERIFICATION outpatient site parameter is set to YES when a clerk is reinstating a discontinued order, the system will not display a duplicate drug warning and the reinstated order will be assigned a non-verified status.

If a duplicate drug warning is displayed for a medication order, it will not be included in a duplicate therapy order check.

The following examples illustrate the conditions described above.

The CPRS Auto Refill field can be updated using the *Pharmacy Systems Parameter Edit* [PSS MGR] option. This parameter works in conjunction with the PSOUATRF security key.

- When the CPRS Auto Refill field is set to YES and the PSOAUTRF security key has been assigned to at least one user, all refills placed in CPRS by the provider are processed and suspended with the next fill date and all routing is set to Mail automatically.
- When the CPRS Auto Refill field is set to NO or if the PSOAUTRF security key is not assigned, the manual refill process is required.

If the auto refill process fails, the order will not be processed and will require manual refilling. A MailMan message will be sent to the holders of the PSOAUTRF key describing the reason for not filling the auto refill. All of the refill activity, manual or automatic, is recorded in the Activity Log entry notes.

With Patch PSO*7*233, when a name is selected, if the patient's address is flagged with a Bad Address Indicator, a warning message is displayed. If the user has proper authorization (i.e., the PSO SITE

parameter "EDIT PATIENT DATA" is set to Yes or the user holds the new PSO ADDRESS UPDATE security key), a prompt displays asking if the user wants to update the address.

Following the installation of patches PSO*7*207 and OR*3*238 (Remote Data Interoperability (RDI) trigger patch), order checks will be made using additional data from the Health Data Repository Interim Messaging Solution (HDR-IMS) and the HDR-Historical (HDR-Hx). This will contain both Outpatient orders from other VAMCs as well as from Department of Defense (DoD) facilities, if available. All remote prescription statuses will be included in order checking for a new order being processed from within backdoor Outpatient Pharmacy and for new orders being placed by CPRS or by Inpatient Medications. Any remote Outpatient order that has been expired or discontinued for 30 days or less will be included in the list of medications to be checked.

(This page included for two-sided copying.)

For the *Patient Prescription Processing*, if a temporary address has no end date, the following text is displayed in the Status column: "(Temp address from XXX 99,9999 till (no end date))".

The check for remote data availability is performed upon entering the patient's profile, rather than on each order, to ensure that both remote data and local data are used for order checking.

Note: Once the above patches have been installed, a new comment for remote order checks, "Now processing Enhanced Order Checks! Please wait..." has been added to the screen. The previous comment, "Now doing order checks. Please wait..." is replaced by: "Now doing allergy checks. Please wait..."

The following will not be included in order checks (after patch PSO*7*243):

- Prescriptions with a status of "DELETED" in the STATUS field in the PRESCRIPTION file from a remote facility
- Prescriptions with a missing expiration date, unless the ISSUE DATE field of the PRESCRIPTION file is within the past year

Remote order checking added (after patch PSO*7*243):

- For drug class when orders are placed for locally defined drugs
- Allergy Analgesic class order checks only match against the specific 5-character class if the class begins with "CN10"

If for any reason remote order checks cannot be performed, the following message displays:

Remote data not available - Only local order checks processed.

Note: For remote order checking, if the remote order does not have a VA PRODUCT file VUID, then it will not be included in drug-drug order checks.

This option also prompts for International Classification of Diseases--9th edition (ICD-9) Diagnosis Codes (maximum of eight). Along with the PROVIDER key, the VistA Outpatient Pharmacy application evaluates the IBB Clinical Indicator Data Capture (CIDC) Insurance Switch to determine if CIDC prompts appear. This allows sites to choose whether to collect CIDC data.

These new ICD-9 Diagnosis Code prompts only appear when the:

- 1. User entering the prescription holds the PROVIDER key.
- 2. IBB CIDC Insurance Switch is set to 'YES'. (Yes = Prompt user for ICD-9 Diagnosis Codes)

User response to the ICD-9 Diagnosis Code prompts is optional.

This option is also found on the *Pharmacy Technician's Menu*, but with limited actions. A pharmacy technician can only enter a new order, refill, copy, renew, reprint, release, order a partial, or pull early from suspense.

When an order is an ePharmacy order (determined to be third party billable), the billing data is sent to ECME when an order is finished. ECME sends a message back to Outpatient Pharmacy displaying the status of the claim. This message displays for new, edited, copied, and renewed ePharmacy orders.

```
Is this correct? YES// <Enter>
   -Rx 100003869A has been discontinued...

CPRS Order Checks

The following CPRS order checks have been added to the existing list of order checks performed in the Outpatient Pharmacy application.

- Aminoglycoside Ordered
- Dangerous Meds for Patient >64
- Glucophage Lab Results

Note: Please see the CPRS (OERR) documentation for details on each order check.

The CPRS order checks shall be incorporated in the following Outpatient Pharmacy order entry processes:

- Entering a new order via backdoor pharmacy options
- Finishing a pending order
- Renewing an order
- Editing an order which results in a new order being created.
- Verifying an order
- Copying an order
- Reinstating a discontinued order

No user action/intervention shall be required after a CPRS order check warning is displayed.

See examples below:

Entering a New Order

Actions display in the action area of the screen. Actions with parentheses () around them are invalid actions for that order. A double question mark (??) displays all the actions available, including the Outpatient Pharmacy actions described in the section "Using List Manager." If an invalid hidden action is selected, a message will display in the message window.

Example: Entering a New Order

```
Select Outpatient Pharmacy Manager Option: RX (Prescriptions)
Orders to be completed for all divisions: 14
Do you want an Order Summary? No// <Enter>
```

A summary list of the number of pending orders can be displayed by Division or by each Clinic within the Division where the user is signed on. This is helpful when completing batch orders. In this example, an individual patient name is entered.

```

If RDI is active and a patient has prescriptions at another location, when the user selects the patient to enter a new order from Patient Prescription Processing, the following message appears.

REMOTE PRESCRIPTIONS AVAILABLE! Display Remote Data? N//

If the user responds **NO**, then the normal procedure occurs for entering prescriptions. If the user responds **YES**, the "Remote Facilities Visited" screen appears. See the Displaying a Patient's Remote Prescriptions section later in Entering a New Order for more details.

A detailed explanation of the different parts of the screen can be found under in Chapter 2: List Manager. The Patient Information screen is displayed on two screens; however, only the second screen is shown in this example.

Example: Entering a New Order (continued)

VERB: <Enter> TAKE
```

The list of available possible dosages display after order checks is linked to the drug ordered. The user can choose from the list or use free text to enter the dosage. Confirmation of the selected (or entered) dosage is required to confirm that it is correct.

```
Available Dosage(s)
    1. 250MG
    2. 500MG
    3. 1000MG
Select from list of Available Dosages, Enter Free Text Dose
or Enter a Question Mark (?) to view list: 3 500MG
You entered 500MG is this correct? Yes// <Enter> YES
```

For numeric dosages, the Dispense Units Per Dose value is calculated based on the strength of the dosage ordered divided by the strength of the medication ordered. For example, the 500 mg dosage ordered requires two 250 mg capsules. The Dosage Ordered is re-displayed after the Dispense Units to allow the entry to be verified.

```
DISPENSE UNITS PER DOSE(CAPSULES): 2// <Enter> 2
Dosage Ordered: 500MG
```

If a Route has not been associated with the Dispense Drug, the default Route of PO or Oral will be displayed. A different Route can be entered or it can be deleted at this point if needed. The Route is not required to complete a prescription. If the abbreviation entered is in the stored list of possible routes, the entry will be expanded in the Sig.

Example: Entering a New Order (continued)

ROUTE: PO// **<Enter**> ORAL PO MOUTH Or ROUTE: PO// @ **<**Enter to delete>

A default schedule associated with the drug ordered is displayed. The default can be accepted or a different free text schedule can be entered. Free text entries cannot contain more than two spaces or be more than twenty characters long. Entries will be compared against a list of common abbreviations and expanded if the entry matches. Any entry not found in the list of common abbreviations will be displayed in the Sig as entered.

Schedule: QID// < Enter> (FOUR TIMES A DAY)

The LIMITED DURATION field is used only when a medication should be taken for a limited period of time. Days are assumed for numeric entries. Follow the number with an "H" to specify hours or an "M" to specify minutes.

Do not use the LIMITED DURATION field for Days Supply.

LIMITED DURATION (IN DAYS, HOURS OR MINUTES): ${\bf 10}$ (DAYS)

The CONJUCTION field is used to join dosing sequences in complex orders. Entries are limited to AND, THEN, or EXCEPT. For concurrent doses, use AND; for example, "Take 1 tablet every morning AND take 2 tablets at bedtime." For consecutive doses, use "THEN"; for example, "Take 2 tablets daily for one week THEN take 1 tablet for five days." For any dosing sequence that is not routine, use "EXCEPT"; for example, "Take 1 tablet every day EXCEPT take no tablets Wednesday." See Appendix B for additional examples.

CONJUNCTION: < Enter>

Any entry in the PATIENT INSTRUCTIONS field will first be checked to see if it contains any abbreviations that can be expanded. The entry will be added to the end of the Sig, after the dosing information, and the entire Sig will be displayed.

PATIENT INSTRUCTIONS: WF	WITH FOOD						
(TAKE TWO CAPSULES BY MOUTH FO	OUR TIMES A DAY FOR 10 DAYS WITH FOOD)						
OTHER PATIENT INSTRUCTIONS: WE	CON ALIMENTO						
example continues							

Two optional fields, OTHER LANGUAGE PREFERENCE and PMI LANGUAGE PREFERENCE in the PHARMACY PATIENT file, store if a patient has another language preference and if the patient's PMI sheets should print in English or Spanish at the CMOP. The CMOP functionality was requested for future CMOP use. When printing locally from Outpatient Pharmacy this parameter is not used. These fields are accessed through the *Update Patient Record* option and the protocol Patient Record Update [PSO PATIENT RECORD UPDATE]. If the other language preference is indicated for a patient, the user will be prompted to enter OTHER PATIENT INSTRUCTIONS after selecting the PATIENT INSTRUCTIONS field to enter/edit. If a quick code is entered at the OTHER PATIENT INSTRUCTIONS prompt, the expansion entered at the OTHER PATIENT INSTRUCTIONS EXPANSIONS will print on the prescription label.

A default value for Days Supply based on patient status is displayed. A default quantity is calculated when possible. See Appendix B for more information on this calculation.

Example: Entering a New Order (continued)

DAYS SUPPLY: (1-90): 30// 10 QTY (CAP) : 80// <Enter> 80

Pharmacy Data Management (PDM) V. 1.0 patch PSS*1.0*61 added the NON REFILLABLE ("F") code to values for the DEA SPECIAL HDLG field of the DRUG file (#50). No refills will be allowed for any Outpatient Pharmacy prescription for a drug that contains an "F" in that field.

An option to add a progress note has been added. If "Yes" is entered at this prompt, the progress note entry will begin after the order information has been displayed and confirmed. The order is redisplayed, along with information on any service-connected disabilities on record.

Example: Entering a New Order (continued)

Do you want to enter a Progress Note? No// **Enter**> Rx # 503906 05/30/01 OPPATIENT25,ONE #80 TAKE TWO CAPSULES BY MOUTH FOUR TIMES A DAY FOR 10 DAYS WITH FOOD AMPICILLIN 250MG CAP OPPROVIDER1,TWO OPPHARMACIST4,THREE # of Refills: 11 SC Percent: 40% Disabilities: NONE STATED Was treatment for Service Connected condition? NO

To determine if the order should be charged copay, eligible copay exemptions for the order are displayed one at a time. The user is asked if the order is being prescribed for the first service-connected condition displayed. If yes is entered at this point, the fill is set for No Copay and no other exemption questions are asked. Otherwise, the next eligible exemption is displayed and the question repeated. In the following example, the patient has reported exposure to herbicides during Vietnam-era service.

```
Was treatment related to Agent Orange exposure? NO
Is this correct? YES// <Enter>
Another New Order for OPPATIENT25,ONE? YES//
```

Entering a new order with Local or Free-Text Dosage

The software checks the medication selected for any interactions or allergies noted in the patient's record, which includes any Non-VA Meds. The next prompts shown will be the new fields used to build a Sig. The list of available possible dosages shown after order checks is linked to the drug ordered. One of the dosages listed may be chosen or a different, free text dosage may be entered. Confirmation of the dosage is required and the value entered is displayed again to allow the user to confirm that it is correct.

Medications with non-numeric dosages, such as ointments and creams, will display non-numeric possible default dosages. Because the dosage is non-numeric, values for dispense units per dose and quantity cannot be calculated.

Example: Entering a New Order with Local or Free-Text Dosage

```
DRUG: TYLENOL #3 ACETAMINOPHEN AND CODEINE 30MG CN101
    ...OK? Yes// (Yes)
Now doing order checks. Please wait...
Available Dosage(s)
    1. 1 TABLET
    2. 2 TABLET(S)
    3. 3 TABLET(S)
Select from list of Available Dosages, Enter Free Text Dose
or Enter a Question Mark (?) to view list: 2 2 TABLET(S)
You entered 2 TABLET(S) is this correct? Yes// <Enter> YES
OTHER LANGUAGE DOSAGE: DOS TABLETA(S)
```

The OTHER LANGUAGE DOSAGE field is only prompted for if a local or free- text dosage is entered and the patient has been identified as having another language preference.

For local or free-text dosages, the Dispense Units Per Dose and Dosage Ordered are not prompted for.

-----example continues-----

The optional field, OTHER LANGUAGE PREFERENCE in the PHARMACY PATIENT file, stores if a patient has another language preference. This field is accessed through the *Update Patient Record* option and the protocol Patient Record Update. If the other language preference is indicated for a patient, the user will be prompted to enter OTHER LANGUAGE DOSAGE.

If a Route has not been associated with the Dispense Drug, the default Route of PO or Oral will be displayed. A different Route can be entered or it can be deleted at this point if needed. The Route is not required to complete a prescription. If the abbreviation entered is in the MEDICATION ROUTES file, the entry will be expanded in the Sig based on the OUTPATIENT EXPANSION field.

Example: Entering a New Order with Local or Free-Text Dosage (continued)

ROUTE: PO// **<Enter**> ORAL PO MOUTH Or ROUTE: PO// @ <Enter to delete>

A default schedule associated with the Orderable Item of the drug ordered is displayed at the "Schedule:" prompt. The default can be accepted or a different free text schedule can be entered. Free text entries cannot contain more than two spaces or be more than twenty characters long. Entries will be compared against a list of common abbreviations, first in the ADMINISTRATION SCHEDULE file and then in the MEDICATION INSTRUCTION file, and expanded if the entry matches. Any entry not found in the list of common abbreviations will be displayed in the Sig as entered.

Schedule: QID// <**Enter**> (FOUR TIMES A DAY)

The LIMITED DURATION field is used only when a medication should be taken for a limited period of time. Days are assumed for numeric entries. The user should follow the number with a "H" to specify hours or a "M" to specify minutes.

NOTE: Do not use this field for Days Supply.

LIMITED DURATION (IN DAYS, HOURS OR MINUTES): **90** (DAYS)

The CONJUCTION field is used to join dosing sequences in complex orders. Entries are limited to AND, THEN, or EXCEPT. AND is used for concurrent doses, such as "Take 1 tablet every morning AND take 2 tablets at bedtime." THEN is used for consecutive doses, such as "Take 2 tablets daily for one week THEN take 1 tablet for five days." EXCEPT is used to describe any dosing sequence that is not routine, such as "Take 1 tablet every day EXEPT take no tablets Wednesday." See Appendix B for examples.

CONJUNCTION: < Enter>

Any entry in the PATIENT INSTRUCTIONS field will first be checked to see if it contains any abbreviations that can be expanded. The entry will be added to the end of the Sig, after the dosing information, and the entire Sig will be displayed.

PATIEN	JΤ	INSTRU	JCTIO	NS: WF				W	ITH H	FOOI	D

0 111211								0.							
						example	е с	onti	nues-					 	

Patch PSS*1*47 adds two optional fields, OPTHER LANGUAGE PREFERENCE and PMI LANGUAGE PREFERENCE in the PHARMACY PATIENT file that stores if a patient has another language preference and what language their PMI sheets should print at the CMOP. These fields are accessed through the *Update Patient Record* option and the protocol Patient Record Update. If the other language preference is indicated for a patient, the user will be prompted to enter OTHER PATIENT INSTRUCTIONS after selecting the PATIENT INSTRUCTIONS field to enter/edit. If a quick code is entered at the OTHER PATIENT INSTRUCTIONS prompt, the expansion entered at the OTHER PATIENT INSTRUCTIONS EXPANSIONS will print on the prescription label.

A default value for Days Supply based on patient status is displayed. A default quantity is NOT calculated for local and free-text dosages. See Appendix B for more information on QUANTITY calculations.

Example: Entering a New Order with Local or Free-Text Dosage (continued)

DAYS SUPPLY: (1-90): 30// 90 QTY (CAP): 720

The remaining prompts have not changed.

An option to add a progress note has been added. If "Yes" is entered at this prompt, the progress note entry will begin after the order information has been displayed and confirmed. The order is redisplayed, along with information on any service-connected disabilities on record.

Example: Entering a New Order with Local or Free-Text Dosage (continued)

Entering a new order --ePharmacy (third party billable)

For patients who have active third party insurance and have the appropriate eligibility requirements, the software will submit electronic claims to their insurance companies when prescriptions for billable drugs are ordered.

After a WINDOW order is entered and finished, the billing data is sent to the Electronic Claims Management Engine (ECME). ECME sends a message back to Outpatient Pharmacy displaying the status of the claim. For MAIL orders, the communication between Outpatient Pharmacy and ECME occurs either during the Local Mail Label Print or during the CMOP transmission.

The following example shows the creation of a new WINDOW order starting with the "DRUG:" prompt.

Example: Entering a New Order for ePharmacy Billing

For non-billable TRICARE prescriptions, an abbreviated version of the reject notification screen will be displayed. Because the prescription is non-billable, the insurance and ECME information that's currently provided for DUR/RTS rejects will not be displayed (i.e. insurance, group name, group #, ECME #, contact, cardholder ID). In this case, the prescription must be discontinued.

Labels will not print for discontinued TRICARE prescriptions, and reprint label will not be allowed for TRICARE rejected prescriptions.

Select Rx (Prescriptions) Option: REPrint an Outpatient Rx Label Reprint Prescription Label: 101113 SIMETHICONE 40MG TAB Number of Copies? : (1-99): 1// Print adhesive portion of label only? ? No// NO Do you want to resend to Dispensing System Device? No// NO Comments: REPRINT 03/03/08 Rx # 101113 OPTRICARE, ONE #180 ONE MOUTH TWICE A DAY SIMETHICONE 40MG TAB OPPHARM, ONE OPPHARM, ONE # of Refills: 3 Select LABEL DEVICE: NULL Bit Bucket No Label(s) printed. Reprint Prescription Label:

Suspended TRICARE prescriptions will remain on suspense when a reject occurs, when the prescription is non-billable, or when the third party claim remains in an 'IN PROGRESS' status in ECME. Labels will not print. Once the reject is resolved, the user may pull the prescription early from suspense or wait for the next scheduled Print from Suspense option runs at which time labels will print accordingly. This includes CMOP and local suspense.

Press <RETURN> to continue...

A rejected TRICARE prescription may not have a partial fill ordered until the reject is resolved.

If ECME's status on the claim remains in an "In Progress" state past the processing timeout during finish of the prescription, TRICARE prescriptions will not be allowed to be filled. Instead it will be placed on suspense until the rejection is resolved. Below is an example of this screen:

TRICARE Prescription 101607 submitted to ECME for claim generation. Claim Status: IN PROGRESS-Building the claim IN PROGRESS-Transmitting IN PROGRESS-Parsing response *** TRICARE - 'IN PROGRESS' ECME status *** _____ _____ Division : ALBANY ISC NPI#: 500000021 Patient : OPTRICARE,ONE(666-55-4789) Sex: M DOB: OCT 18,1963(44) Rx/Drug : 101607/0 - ACETAZOLAMIDE 250MG Date/Time: APR 20, 2008@20:11:17 Reason : ECME Status is in an 'IN PROGRESS' state and cannot be filled _____ _ _ _ _ _____

This prescription will be suspended. After the third party claim is resolved, it may be printed or pulled early from suspense.

Press <RETURN> to continue...

If a pharmacy is active for ePharmacy processing but an insurance plan is not linked or not active, TRICARE prescription will be allowed to be filled without third party claim submission. The phrase "Inactive ECME TRICARE" will be displayed during Finish and an ECME log entry will be added stating such.

Example of message during finish:

Do you want to enter a Progress Note? No// NO Rx # 102046 08/27/08 OPTRICARE,TEST #180 ONE MOUTH TWICE A DAY DANTROLENE 25MG CAP OPPROVIDER,ONE OPPHAR,ONE # of Refills: 3 Is this correct? YES// ... -Rx 101921 has been discontinued...

Inactive ECME TRICARE

Example of ECME Activity Log entry:

Example: Handling a CHAMPVA Rejected New Order for ePharmacy Billing

Rejected CHAMPVA claims will be denoted with "CHAMPVA" during submission to ECME and within the subsequent reject notification screen. Also, the reject codes will be displayed in both places. The following example shows a prescription being submitted to ECME and this process occurs directly following the "Is this correct? YES//" prompt during finish. Where DUR or RTS are one of the reject codes, the user will be able to select from (D)iscontinue the prescription, submit (O)verride codes, or (Q)uit which sends the rejection to the Third Party Payer Rejects - Worklist. A CHAMPVA rejection may not be (I)gnored.

Editing an Order

An asterisk or star (*) is shown in front of each field that will create a new order if it is changed. The Sig field cannot be edited directly, but it will change if the fields that are used to build it are edited.

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription. For more information, see the example Editing an ePharmacy Order.

Do not use the up-arrow (^) after editing one field to jump past the rest of the fields. Using just the uparrow results in the changes just entered being deleted. The user must press **<Enter>** through *all* the order fields when editing to save the changes.

Example: Editing an Order

If a new order is created due to the editing of a field that affects copay, like Duration, the values previously entered display as defaults.

If editing the PATIENT STATUS field of a prescription results in a change to the copay status of that prescription, the copay status of the prescription is automatically updated and an entry made in the prescription Copay activity log.

Enter ?? for more actions + DC Discontinue PR Partial RL Release RF Refill RN Renew ED Edit Select Action: Next Screen// E Edit Select fields by number: (1-18): 5 PATIENT STATUS: OPT NSC// AUT 1 AUTH ABS +96 AUTH ABS -96 2 CHOOSE 1-2: 2 AUTH ABS -96 11 refills are greater than 0 allowed for AUTH ABS -96 Rx Patient Status. The last fill has been released, do you want a reprint label? Y// NO Patient Status field for this Rx has been changed from a COPAYMENT ELIGIBLE patient status to a COPAYMENT EXEMPT patient status. The copay status of this Rx will be automatically adjusted. If action needs to be taken to adjust charges you MUST use the Reset Copay Status/Cancel Charges option. -----example continues-----

If a starred field, like Dosage, is changed a new order will be created that will include a remark noting the original prescription number. Note that when the dosage is changed the dispense units per dose and quantity are recalculated.

Example: Editing an Order (continued)

Editing an ePharmacy Order

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription.

If the original claim was E Payable, and edits are made to any of these fields – Provider, Qty, Days Supply, Division, Fill Date, NDC, or DAW Code – then the original payable claim is reversed and a new claim is submitted to ECME. If the original claim was rejected, then a reversal is not necessary, and a new claim is submitted to ECME.

Select Action: Qui	it// 1											

Press **<Enter>** twice to scroll to page 3 of the Medication Profile. Notice that a new field displays on the profile: DAW Code. DAW stands for "Dispense as Written" and refers to a set of ten NCPDP codes (0-9) that tells third party payers why a brand or generic product was selected to fill a prescription. When a new prescription is entered for a specific drug, the DAW code from the drug is stored in the PRESCRIPTION file (#52) for each fill. This field is solely being used for electronic billing purposes. It communicates to the third party payer that a drug has a special characteristic, which may prevent the payer from rejecting the claim. The available codes include:

Code Description

- 0 NO PRODUCT SELECTION INDICATED
- 1 SUBSTITUTION NOT ALLOWED BY PRESCRIBER
- 2 SUBSTITUTION ALLOWED-PATIENT REQUESTED PRODUCT DISPENSED
- 3 SUBSTITUTION ALLOWED-PHARMACIST SELECTED PRODUCT DISPENSED
- 4 SUBSTITUTION ALLOWED-GENERIC DRUG NOT IN STOCK
- 5 SUBSTITUTION ALLOWED-BRAND DRUG DISPENSED AS A GENERIC
- 6 OVERRIDE
- 7 SUBSTITUTION NOT ALLOWED-BRAND DRUG MANDATED BY LAW
- 8 SUBSTITUTION ALLOWED-GENERIC DRUG NOT AVAILABLE IN MARKETPLACE
- 9 OTHER

The DAW Code default is 0 – No Product Selection Indicated, unless the DAW Code has been set for this drug at the DRUG file level.

Enter **21** to edit the field.

DAW/NDC Edit

The Dispensed As Written(DAW)/National Drug Code (NDC) field for discontinued and expired orders can be edited.

For ePharmacy prescriptions, the DAW/NDC field for discontinued and expired orders can be edited. The following statuses are editable.

- 11 EXPIRED
- 12 DISCONTINUED
- 14 DISCONTINUED BY PROVIDER
- 15 DISCONTINUED (EDIT).

Status's 14 and 15 above result from the prescription being discontinued from CPRS. For status 14 - DISCONTINUED BY PROVIDER, the user can choose to discontinue the prescription in CPRS by selecting "Requesting Physician Cancelled" for the reason.

The following is an example of the activity log entry stored on the prescription for this type of discontinue:

1 06/20/08 DISCONTINUED ORIGINAL OPPHARM, ONE Comments: Discontinued by OE/RR.

For status 15 - DISCONTINUED (EDIT), the user can edit a prescription in CPRS which discontinues the prescription being edited resulting in status 15 in the Outpatient Pharmacy package. The following is an example of the activity log entry on the prescription in OP:

2 06/05/08 DISCONTINUED ORIGINAL OPHARM,ONE Comments: Discontinued due to CPRS edit

Using the Copy Action

If a double question mark (??) had been entered at the "Select Action:"prompt, the following hidden actions would display in the action area.

The	following actions are	also	available:		
AL	Activity Logs (OP)	OTH	Other OP Actions	FS	First Screen
VF	Verify (OP)	REJ	View REJECT	GO	Go to Page

Renewing an ePharmacy Order

When renewing an ePharmacy order, upon acceptance of the renewed order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription.

[This example begins after an order is selected from the Medication Profile screen.]

Flagging and Unflagging a New Pending Order

Flagging a pending order allows you to prevent an order from processing and attach a note known as a flag to the pending order. After the flag has been addressed, you unflag the order, allowing it to be processed. Note that only new pending orders can be flagged.

The following provides examples of how to flag and unflag a pending order from a medication profile within *Patient Prescription Processing*.

If a pending order is flagged, the row number is highlighted on the Medication Profile screen (shown in the following example). Select the order to view the flag or to flag the new pending order.

Example: A Flagged Pending Order

Medication Profile OPPATIENT16,ONE PID: 000-24-6802 DOB: APR 3,1941 (66) SEX: MALE	Mar 13, 2008	· · ·	Y ASSESS 177.80 (7)

PI Patient Information		Select Order			
Select Action: Quit// SO Select	ct Order				
Select Orders by number: (1-3	2): 2				

From the Pending OP Orders screen, you can flag and unflag an order, as well as view the flagged reason. To flag the order, enter **FL** and then enter a "REASON FOR FLAG", alert the proper individual that the flag has been added by pressing **<Enter>** to select the default name or entering a different user name and pressing **<Enter>**, and the flagging process is complete.

Example: Flagging an Order

REASON FOR FLAG: DOUBLE CHECK WITH PATIENT FOR HEART CONDITION BEFORE DISPENSING. Send alert to: PSOUSER,ONE// BIRMINGHAM ALABAMA OP PHARMACIST ... order flagged. When an order is flagged, "FL-" is placed in front of "Pending OP Orders" in the upper left corner, and the flagged reason is listed below the patient identifying information.

After pending orders have been unflagged, they can be processed.

If you attempt to process a flagged order, you are prompted "Unflag Order? NO//". If you respond **YES**, enter comments to unflag the order and continue with processing. If you respond **NO**, you cannot process the order because it is still flagged.

Barcode Rx Menu [PSO BARCODE MENU]

Use this menu to batch barcode refills and renewals of prescriptions, and check the quality of the barcode print. The menu contains the following options:

- Barcode Batch Prescription Entry
- Check Quality of Barcode
- Process Internet Refills

Barcode Batch Prescription Entry [PSO BATCH BARCODE]

Enter refills or renewals by batch entry using barcodes with this option.

Example: Barcode Batch Prescription Entry -- Refills

Check Quality of Barcode [PSO BARCODE CHECK]

No action is taken on the prescription by using this option. Use this option to check the quality of printed barcodes or use it to practice using the barcode reader. After the barcode is scanned, the barcode number will echo back on the screen and screen will return to the "Read Barcode" prompt. No action is taken on the prescription by using this option.

The following are some common causes for failure of the barcode reader and how they can be corrected.

- Barcode too faint (change printer ribbon)
- Improper scanning (move the wand at a steady rate)
- Defective barcode reader (replace the reader)

Process Internet Refills [PSO INTERNET REFILLS]

This option allows the pharmacist to process prescription orders entered on the Internet through My Health<u>e</u>Vet. The system will prompt the user for the information as shown in the following example. The user enters the appropriate response for each prompt by pressing **Enter** on the keyboard to accept the default setting for a prompt. The user must type the appropriate word or letter to enter a response contrary to the default.

The recommended usage of this option is three times a day to ensure the requested refills are processed in a timely manner. Or, the *Automate Internet Refill* option, located on the Maintenance (Outpatient Pharmacy) menu, may be set up to schedule a background job for automatically processing Internet refills.

Example: Process Internet Refills Screen

Select Barcode Rx Menu Option: Process Internet Refills Division: ALBANY Please answer the following for this session of prescriptions FILL DATE: (1/28/2005 - 12/31/2699): TODAY// <Enter> (AUG 11, 2005) MAIL/WINDOW: MAIL// <Enter> MAIL Will these refills be Queued or Suspended? Q// S <Enter> USPENDED Allow refills for inpatient ? N// <Enter> O Allow refills for CNH ? N//<Enter> O Allow early refills? N// <Enter> O Process internet refill requests at this time? YES// <Enter> YES Process internet refills for all divisions? NO// <Enter> O

Users can process refills for their division or all divisions within a site. However, sites can set parameters in the PHARMACY SYSTEM file for the INTERDIVISIONAL PROCESSING and DIVISION PROMPT ASKED fields that control responses to user input on the Process Internet Refills screen. Note that site control parameters override any entries made by the user in the Process Internet Refills screen.

If the INTERDIVISIONAL PROCESSING parameter is set to **No**, only the refills for the user's division will be filled, regardless of the user's input at the "Process internet refills for all divisions?" prompt.

If the INTERDIVISIONAL PROCESSING parameter is set to **Yes** and the DIVISION PROMPT ASKED parameter is set to **No**, then the refill orders are processed for all divisions without any additional user input.

If the INTERDIVISIONAL PROCESSING parameter is set to **Yes** and the DIVISION PROMPT ASKED parameter is set to **Yes**, refills for the user's division will be processed without any additional input. If unprocessed refills outside the user's division exist, the "Continue?" prompt displays, allowing the user to confirm each refill, as shown in the following example.

Example: Process Internet Refills for all Divisions?

Process internet refills for all divisions? NO// Y YES
Now refilling Rx# 100002310 Drug: CAPTROPRIL 100MG TABS
Qty: 60 Sig: TAKE ONE TABLET BY MOUTH TWICE A DAY
Rx # 100002310 is for (ALBANY) division.
This refill is outside
the user's division.

If the user enters Yes at the "Continue?" prompt, the refill will be processed.

If the user enters No at the "Continue?" prompt, the refill will not process at this time, and the refill request will remain in the PRESCRIPTION REFILL REQUEST file. These refill requests may be processed later by a user in the same division, or any division, depending on the PHARMACY SYSTEM file parameters.

Refills processed successfully are flagged as FILLED in the RESULTS field of the PRESCRIPTION REFILL REQUEST file.

Refills not processed due to conditions such as: Rx Expired, Discontinued, On Hold, or Deleted, are flagged as NOT FILLED in the RESULTS field of PRESCRIPTION REFILL REQUEST file.

Complete Orders from OERR [PSO LMOE FINISH]

When a clinician has created an order for a patient, the pharmacist needs to finish and verify the order. This option is used to finish orders entered into the patient record via Order Entry Results Reporting (OERR) V. 3.0. This option uses the List Manager features.

The user may select orders by patient, route, priority, clinic, or flag. Clinic or Clinic Sort Group can complete orders. In any sort, orders are completed on a first-in/first-out basis by patient. Clinic Sort Groups can be added or edited in the *Enter/Edit Clinic Sort Groups* option, found under the *Maintenance (Outpatient Pharmacy)* menu option. Orders entered before implementation of patch PSO*7*46 (Pharmacy Ordering Enhancements (POE)) must have the fields used to build the Sig filled in before processing can be completed.

Enter "E" at the "Select By:" prompt to stop processing orders.

If a temporary address has no end date, the following text is now displayed: "(Temp address from XXX 99,9999 till (no end date))".

For ePharmacy orders, after an order is finished, the billing data is sent to ECME, which sends a message back to Outpatient Pharmacy displaying the status of the claim. For an example, see "Finishing an ePharmacy Order" in this section.

Example: Finishing an Order from OERR

Select Outpatient Pharmacy Manager Option: RX (Prescriptions) Orders to be completed for all divisions: 16 Do you want an Order Summary? Select the Institution for which to finish orders from. Enter '?' to see all choices. Select CPRS ORDERING INSTITUTION: ALBANY// <Enter> NY VAMC 500 You have selected ALBANY. After completing these orders, you may re-enter this option and select again. <There are 3 flagged orders for ALBANY> Select By: (PA/RT/PR/CL/FL/E): PATIENT// <Enter> All Patients or Single Patient: (A/S/E): SINGLE// <Enter> Select Patient: **OPPATIENT16,ONE** OPPATIENT16,ONE 4-3-41 000246802 VES SC VETERAN WARNING : ** This patient has been flagged with a Bad Address Indicator. Do you want to see Medication Profile? Yes// <Enter>

The user may enter a question mark at the "Select Patient" prompt to get a list of patients with pending orders. A single patient may be selected for processing, or pending orders for all patients may be processed in sequence by the time of each order's entry into the system.

Flagged orders will not be processed. They are not a part of any pending orders. To process flagged orders, you should enter **FL** at the "Select By" prompt. This ensures you will view all patients with flagged pending orders, allowing you to address their flagged orders; however, if you know which patients have flagged orders, you can access the flagged orders through the Medication Profile.

If the user answers **YES** to "Do you want to see Medication Profile?" and the patient has remote prescription(s), the following prompt appears.

```
REMOTE PRESCRIPTIONS AVAILABLE!
Display Remote Data? N//
```

If the user answers **YES** to "Display Remote Data?" then the "Remote Facilities Visited" screen appears, allowing the user to see what facilities the patient has prescriptions at and what those prescriptions are.

After the user answers the medication profile prompt, a warning displays if no allergy assessment has been made. The patient's eligibility and RX patient status also displays.

```

Flagging and Unflagging a New Pending Order

Flagging a pending order allows you to prevent an order from being processed and attach a note known as a flag to the pending order. After the flag has been addressed, you can unflag the order, allowing it to then be processed. Note that only new pending orders can be flagged.

Flagged orders will not be processed. When you have flagged orders to process from the *Complete Orders from OERR* option, you should enter **FL** at the "Select By" prompt (shown in the following example). This ensures you will view all patients with flagged pending orders, allowing you to address their flagged orders; however, if you know which patients have flagged orders, you can access the flagged orders through the Medication Profile.

The following provides examples of how to flag and unflag pending orders from a medication profile within the *Complete Orders from OERR* option.

Example: Finishing an Order from OERR

Select Outpatient Pharmacy Manager Option: RX (Prescriptions) Orders to be completed for all divisions: 16 Do you want an Order Summary? No// <Enter> NO Patient Prescription Processing Barcode Rx Menu ... Complete Orders from OERR Discontinue Prescription(s) Edit Prescriptions ePharmacy Menu... After pending orders have been unflagged, they can be processed.

If you attempt to process a flagged order, you are prompted "Unflag Order? NO//". If you respond **YES**, enter comments to unflag the order and continue with processing. If you respond **NO**, you cannot process the order because it is still flagged.

Changes to Finishing Pending Orders Process - Digitally Signed Orders Only

Digitally signed orders will be identifiable by the "Digitally Signed Order' message in reverse video on the message bar.

If the terminal in use is set up as a VT-100, there may be problems with this message display and the "Processing Digitally Signed Order" message. Updating the VistA terminal session to use VT-320 will avoid this problem.

The provider's PKI certificate is re-validated when accessing a digitally signed order. If the validation check is unsuccessful, an error code is sent to the pharmacist and an entry is made in the Rx Activity Log. The error code type results in either the order being automatically rejected/discontinued or the pharmacist being given the choice to finish, bypass, or discontinue the order. Digitally signed prescriptions that have been discontinued cannot be reinstated. The Speed Discontinuation functionality no longer deletes unverified prescriptions.

Finishing an Order from OERR with Multiple Institutions

Multiple Institution entries can be added using the *Site Parameter Enter/Edit* option. If a site has multiple entries in the CPRS ORDERING INSTITUTION field, the user is prompted for an Institution when entering the *Complete Orders from OERR* option. After an Institution is selected, the Pending Orders shown for completion will be those Pending Orders from clinics that are associated with the Institution selected.

Example: Finishing an Order from OERR with Multiple Institutions

Select Outpatient Pharmacy Manager Option: RX (Prescriptions) Orders to be completed for all divisions: 21 Do you want an Order Summary:? No// <Enter> NO Select Rx (Prescriptions) Option: COmplete Orders from OERR There are multiple Institutions associated with this Outpatient Site for finishing orders entered through CPRS. Select the Institution from which to finish orders. Enter '?' to see all choices. Select CPRS ORDERING INSTITUTION: BIRMINGHAM, AL.// <Enter> BIRMINGHAM, AL.521 You have selected BIRMINGHAM, AL.. After completing these orders, you may re-enter this option and select again. Select By: (PA/RT/PR/CL/FL/E): PATIENT// PA

[See the previous example for completion of this option.]

Finishing an ePharmacy Order

After the user reviews the ePharmacy order and chooses to accept the order, the billing data is sent to ECME, which sends a message back to Outpatient Pharmacy displaying the status of the claim. The ECME section of the Activity Log is also updated.

Prescription 100003840 successfully submitted to ECME for claim generation. Claim Status: IN PROGRESS-Waiting to start IN PROGRESS-Gathering claim info IN PROGRESS-Packet being built IN PROGRESS-Waiting for transmit IN PROGRESS-Transmitting E PAYABLE Another New Order for OPPATIENT, FOUR? YES//

Activity Log

Multiple Activity Logs exist for a completed or finished order. Any single activity log or all activity logs can be viewed.

Use the hidden action (AL) to view the activity log once a completed or finished order is selected.

Example: Activity Log

The Domain Name Server (DNS) information of the automated dispensing device is appended to the Comment field of the activity log. This is usually an IP address or the DNS name.

The activity log has an entry indicating that the Rx has been sent to the external interface. With patch PSO*7*354, this activity entry is enhanced to indicate the routing automated dispensing device. The Domain Name Server (DNS) information of the automated dispensing device is appended to the Comment field of the activity log. This is usually an IP address or the DNS name.

The activity log was also updated to display the mail tracking information available in the RXD-13 segment of the HL7 message received by VistA from the external dispensing interface.

Example: Activity Log with multiple dispensing devices

N// YES

When a prescription is discontinued, the software checks for any unresolved ECME rejections for that prescription. If a DUR REJECT or REFILL TOO SOON REJECT is found, it will be marked resolved with the reason PRESCRIPTION DISCONTINUED.

When an ePharmacy prescription is discontinued, the software checks for any unreleased fills with a PAYABLE claim. If found, a reversal request is sent to ECME, which forwards it on to the third party payer.

When a pending renewal order is discontinued, Outpatient Pharmacy verifies if there is an active prescription for the same drug. If an active prescription is found, you are prompted with "There is an active Rx for this pending order, Discontinue both (Y/N)?" If you respond **YES**, both the pending order and the active order are discontinued. If you respond **NO**, only the pending order is discontinued and the active order is not discontinued.

Edit Prescriptions [PSO RXEDIT]

This option allows changes to be made to entered orders. Newly entered orders can be edited before release by typing in the corresponding field number. Previously entered orders can be edited by entering the prescription number, then specifying the field to be edited. An asterisk or star (*) is shown in front of each field that will create a new order if it is changed. See the section "Editing an Order" for an example.

When editing fields preceded by an asterisk (*) in an ePharmacy order (or electronically third party billable prescription), upon acceptance of the edited order the original prescription will be discontinued and a new order created. If the latest fill of the original order has not been released and is E Payable, the claim for that fill will be reversed. A new claim is submitted for the new prescription. See "Editing an ePharmacy Order" for an example of editing ePharmacy orders.

ePharmacy Menu [PSO EPHARMACY MENU]

The following menu items are locked with the PSORPH key: ePharmacy Medication Profile Division Preferences, ePharmacy Site Parameters, Third Party Payer Rejects – View/Process and Third Party Payer Rejects – Worklist. The following menu item is locked with the <u>PSO</u> <u>TRICARE/CHAMPVA MGR key</u>: TRICARE CHAMPVA Bypass/Override Report.

These menu items allow the user to perform ePharmacy specific functions including rejections by third party payers including DUR/RTS and has the following options:

- Ignored Rejects Report
- *ePharmacy Medication Profile (View Only)*
- NDC Validation
- ePharmacy Medication Profile Division Preferences
- ePharmacy SiteParameters
- Third Party Payer Rejects View/Process
- Third Party Payer Rejects Worklist
- TRICARE CHAMPVA Bypass/Override Report
- View ePharmacy Rx

DURs can occur when a third party determines there are safety issues involved with an Rx claim submission, and they can be due to high dose, drug interaction, and excessive utilization. The third party payer returns an NCPDP rejection code of 88 to indicate a DUR.

Refill Too Soon rejections happen when a third party payer determines that a prescription is being processed too early compared to the last time the prescription was filled. This can occur for several reasons, including third party payer's policy differs from VA policy, patient receiving medication at another pharmacy, or the provider may have increased the dosage or frequency of the medication. The third party payer returns an NCPDP rejection code of 79 to indicate a Refill Too Soon.

Prescriptions rejected as DUR and Refill Too Soon are moved to the REFILL TOO SOON/DUR REJECTS (Third Party) section of the Medication Profile. The user must resolve a rejected prescription before other actions such as release, label print, renew, and refill, among others, can be performed on it. Actions may still be taken on these prescriptions through CPRS.

Ignored Rejects Report [PSO IGNORED REJECTS REPORT]

This option gives the user the ability to run a report for third-party rejects that have been ignored and consequently closed by the pharmacy users.

The user can select one of the following parameters to filter the data in the report:

- **DIVISION**: Allows the user to select one, some or all divisions.
- **DATE RANGE**: Allows the user to select a date range.

- **SORT BY**: Allows the user to choose different fields to sort the report by. Any combination can be selected:
 - **PATIENT**: Allows the user to select a single, multiple or all patients
 - **DRUG:** Allows the user to select a single, multiple or all drugs.
 - **USER:** Allows the user to select a single, multiple or all users that have ignored third party rejects.

Example: Ignored Rejects Report

```
Select ePharmacy Menu Option: IR Ignored Rejects Report
  You may select a single or multiple DIVISIONS,
  or enter ^ALL to select all DIVISIONS.
  DIVISION: ^ALL
  BEGIN REJECT DATE: 030606 (MAR 06, 2006)
    END REJECT DATE: 061407 (JUN 14, 2007)
      Enter the SORT field(s) for this Report:
         1 - PATIENT
         2 - DRUG
         3 - USER
      Or any combination of the above, separated by comma,
      as in these examples:
         2,1 - BY PATIENT, THEN DRUG
        3,1,2 - BY USER, THEN BY PATIENT, THEN BY DRUG
  SORT BY: PATIENT// 1,2
       SORT BY PATIENT
           THEN BY DRUG
  You may select a single or multiple PATIENTS,
  or enter ^ALL to select all PATIENTS.
  PATIENT: ^ALL
  You may select a single or multiple DRUGS,
  or enter ^ALL to select all DRUGS.
  DRUG: ^ALL
  DEVICE: HOME// [Select Printer Device]
-----example continues-----
```

ePharmacy Medication Profile (View Only) [PSO PMP]

Although the name indicates "ePharmacy Medication Profile", this option can be used to list the medication profile for any patient on file. It will be used mostly by ePharmacy users for claims research purposes. This functionality is also available from the Reject Worklist through the Medication Profile (MP) action.

Example 1: Medication Profile with default view

The following options are available as Hidden Menu actions on this screen.

DR - Sort by Drug

LF - Sort by Last Fill

RX - Sort by Prescription ID - Sort by Issue Date RDD - Switch between LAST FILL and LAST RELD (release date)

After selecting a prescription on this screen, the *REJ* option is available on the "RX View" screen's hidden menu. This action displays third party reject information for the prescriptions with third party rejects.

The *CV* (*Change View*) option allows the user to change some characteristics of the screen above. The user can also save and/or delete preferences, which will be used every time the user runs the *Medication Profile* option or invokes it from the Reject Worklist. The users can have one set of preferences for each Division defined.

Example 2: Change View action

Enter CV at the "Select:" prompt to change the view preferences.

Example 3: Display SIG action

Enter SIG at the "Select:" prompt to toggle the Sig display on or off.

NDC Validation

The initial validation of the NDC can be performed by a pharmacy technician. This functionality only applies to local fills that are not sent to OPAI. This function provides a pharmacy technician the ability to manually enter the prescription number or scan the bar code of the existing prescription label. Then the user may manually enter or scan the NDC of the stock bottle used to fill the prescription. When the system matches the NDC, confirmation is provided to the pharmacy tech and allows the technician to continue processing. However, if the system detects a mismatch and the NDC of the stock bottle has an associated entry in the synonym file, the NDC will be updated in Prescription file (#52) for the fill. The system will then prompt the technician to press enter to continue, a new label will be printed, the original electronic claim reversed, and a new claim submission will be transmitted with the new NDC. In the event that the revised NDC prompts a RTS/DUR rejection, the system will immediately send the item to the Reject Worklist.

In a case where the NDC entered is not defined for the drug in the Drug File, the system prompts the technician that a mismatch has occurred and the prescription needs to be validated by a pharmacist. The system notes that the NDC had not been validated and allows the pharmacy tech to move to the next prescription. In the event of a change of NDC prompted a rejection, the system immediately sends the item to the Reject Worklist.

The releasing pharmacist will receive a notation that NDC has been validated by technician when processing. If the NDC change has prompted a claim reversal and produced a RTS/DUR rejection, the pharmacist will be presented with a Reject Processing screen at release.

```

ePharmacy Medication Profile Division Preferences [PSO PMP SITE PREFERENCES]

This option allows the user to specify certain settings that will control how the *ePharmacy Medication Profile* option works for that user. Below is the list of settings that can be specified through this option:

- **EXP/CANCEL CUTOFF:** Indicates the maximum number of days for an expired and/or discontinued prescription to be cut from the profile.
- **SORT BY:** Indicates the default sorting column. The options are: Rx#, Drug Name, Issue Date or Last Fill Date.
- **SORT ORDER:** Indicates the order in which the column above will be sorted: Ascending or Descending.
- **DISPLAY SIG:** Indicates whether the SIG should be displayed under each prescription or if it should be hidden.
- **GROUP BY STATUS:** Indicates whether the list should be grouped by status (Active, Discontinued, Hold, etc...) or not.
- **DISPLAY ORDER COUNT:** Indicates whether the number of orders under each group should be displayed beside the group name. Example _____ACTIVE (3 orders)_____

```
Select ePharmacy Menu Option: \ensuremath{\textbf{PF}} ePharmacy Medication Profile Division Preferences

If there is a set of preferences already on file for the division the user is logged under, the option to delete such preferences is presented to the user as seen above.

ePharmacy Site Parameters

The ePharmacy Site Parameters file (#52.86) has been added to store ePharmacy Site parameters by division. Along with this, a new EPHARMACY SITE PARAMETERS [PSO ePHARM SITE

PARAMETERS] option has been added to the existing ePharmacy Menu [PSO EPHARMACY MENU].

This new option requires the PSORPH security key.

The following site parameters are definable using this option:

- ALLOW ALL REJECTS: Requires a YES or NO answer. <u>It is highly suggested that NO be answered at this prompt.</u> Answering YES to this prompt will signify that all prescription fills with ePharmacy rejected claims will automatically be placed on the Third Party Payer Rejects Worklist, also known as the Pharmacy Reject Worklist. This is in addition to Refill-Too-Soon (79), Drug Utilization Review (DUR/88), CHAMPVA rejects and TRICARE rejects, which are automatically placed on the Pharmacy Reject Worklist. Any individually defined reject codes in this file will be overridden when a "YES" answer is given.
- REJECT WORKLIST DAYS: This is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message.

The following prompts appear consecutively and the user may enter as many reject codes as they desire along with the manner in which each will be allowed to be placed on the reject worklist.

- REJECT CODE: A valid third party claim reject code should be entered. A listing of these codes is provided when double question marks (??) are entered for this prompt. Valid codes are contained within the BPS NCPDP REJECT CODES file (#9002313.93). Also, a value defined in this field triggers definition of USER field (#2) and DATE OF LAST UPDATE field (#3). Any individually defined codes will be overridden when the ALLOW ALL REJECTS prompt is answered as YES.
- AUTO SEND: This prompt is a companion to the REJECT CODE prompt. Enter YES to allow the entered REJECT CODE to be automatically placed on the Pharmacy Reject Worklist or NO to require Outpatient Pharmacy Electronic Claims Coordinator (OPECC) intervention to do so. A null value will be treated the same as entering NO in this field.

The following is an example of definition of ePharmacy Site Parameters:

Select ePharmacy Menu Option: SP ePharmacy Site Parameters Regardless of any parameters defined, Refill-Too-Soon, Drug Utilization Review(DUR), CHAMPVA and TRICARE rejects will always be placed on the Third Party Payer Rejects - Worklist, also known as Pharmacy Reject Worklist. These parameters are uneditable and are the default parameters. 500 Division: ALBANY ISC ...OK? Yes// (Yes) ALLOW ALL REJECTS: NO// **REJECT WORKLIST DAYS: 7** Select REJECT CODE: DAW ?? Third Party Payer Rejects - View/Process [PSO REJECTS VIEW/PROCESS]

This option provides information about rejects that have been on the Third Party Payer Rejects – Worklist. This option allows the user to find, display and reopen rejects previously resolved from the Third Party Payer Rejects – Worklist in order to take action on them again.

The user can choose to view rejects for one, multiple, or all Outpatient Pharmacy Divisions.

Example: Viewing and Resolving Open Rejects

```
Select ePharmacy Menu Option: VP Third Party Payer Rejects - View/Process
You may select a single or multiple DIVISIONS,
or enter ^ALL to select all DIVISIONS.
DIVISION: ^ALL
```

The user can select one of the following selections to filter the data displayed:

• DATE RANGE: Selects a date range (Default: Last 90 days).

```
BEGIN REJECT DATE: T-90// <Enter> (MAR 09, 2007)
END REJECT DATE: T// <Enter> (JUN 07, 2007)
```

- (P)ATIENT: Selects a single patient, multiple patients, or all patients.
- (D)RUG: Selects a single drug, multiple drugs, or all drugs.
- (**R**)**x**: Selects a single prescription number, or multiple prescription numbers.
- (I)NSURANCE: Selects a single insurance, multiple insurances, or all insurances.

Next, the user can choose to display either Unresolved, Resolved, or Both types of rejects.

Example: Viewing and Resolving Open Rejects (continued)

```
Select one of the following:
                  UNRESOLVED
         IJ
                  RESOLVED
         R
                  BOTH
         B
(U)NRESOLVED, (R)RESOLVED or (B)OTH REJECT statuses: B// <Enter> BOTH
Please wait...

DRSort by DrugRESort by ReasonRXSort by PrescriptionPASort by PatientRFScreen RefreshGIGroup by Insurance
Select: Quit//
               -----example continues-----
```

The following options are available on the screen above:

- DR Sorts the list by the drug name.
- PA Sorts the list by the patient's last name.
- RE Sorts the list by the reject reason.
- RF Refreshes the screen. (This selection retrieves DUR/ REFILL TOO SOON rejects that happened after the screen was originally populated.)
- RX Sorts the list by Prescription number.
- GI Groups the rejects by Insurance Company name.

The following two sets of characters denote the order by which the list is being sorted: [^] for ascending and [v] for descending. The order inverts every time the user selects the same column by which the list is already ordered. Thus, if the list is currently ordered by Patient in an ascending order ([^]) and the user types "PA", the list will be re-sorted in descending order and the order indicator will change to ([v]).

The user selects a specific record to display all relevant information about the prescription and the claim submitted to the payer.

Example: Viewing and Resolving Open Rejects (continued)

VWView RxIGN Ignore RejectOVR Submit Override CodesMPMedication ProfileRES Resubmit ClaimCSD Change Suspense Date
Select: Next Screen// IGN Ignore Reject
      ----example continues-----
```

These options are available on the screen above:

- VW (View) Takes the user to the *View Prescription* option to review details for that prescription.
- MP (Medication Profile) Invokes the patient's list of medication.
- IGN (Ignore Reject) Allows the user to close or resolve the DUR/REFILL TOO SOON Reject without resubmission to the payer. The user will be required to enter a free-text comment and his/her electronic signature.
- RES (Resubmit Claim) Allows the user to re-submit the claim to the payer. This will automatically mark the reject resolved.
- OVR (Submit Override Codes) Allows the user to re-submit the claim by entering NCPDP override codes, which shall trigger a new claim submission be sent to the payer.
- CSD (Change Suspense Date) Allows the user to change the fill date for suspended prescriptions. The user will not be allowed to enter a suspense date that is greater than the fill date plus 90 days. Dates where the fill date plus 90 days is greater than the expiration date will not be allowed entry, and dates prior to issue date will not be allowed.

Hidden actions:

- COM (Add Comments) Allows the user to add reject-specific comments. These comments are local to the Reject Worklist and View/Process options and are not transmitted to ECME.
- CLA (Submit Clarif. Code) Allows the user to re-submit a claim with Clarification Codes.
- ED (Edit Rx) Allows the user to edit the prescription.
- PA (Submit Prior Auth.) Allows the user to re-submit a claim with Prior Authorization information.
- ARI (View Addtnl Rej Info) Allows the user to display additional reject information from the payer, if available.
- SMA (Submit Multiple Actions) Allows the user to resubmit a claim with multiple actions, including the following information: Prior Authorization, Submission Clarification Code, Reason for Service Code, Professional Service Code, and Result of Service Code.
- SDC (Suspense Date Calculation) Allows the user to calculate a new suspense date based on Last Date of Service and Last Days Supply.

Third Party Payer Rejects - Worklist [PSO REJECTS WORKLIST]

This option gives the user the ability to process Third Party Payer Rejects, CHAMPVA Non-billable rejects and TRICARE Non-billable rejects for one, multiple, or all Outpatient Pharmacy Divisions. Only OPEN/UNRESOLVED rejects that have clinical significance, such as DUR and Fill Too Soon, and rejects transferred from the ECME User Screen, are added to the Worklist. Once the reject is marked CLOSED/RESOLVED, it is automatically removed from the Worklist.

Example: Resolving Open Rejects

One important advantage of having the additional DUR information is the inclusion of the PPS Response information. The information in red above can be used to calculate the next fill date when resolving DUR rejects where the next date of fill is not returned by the payer. The use of this information eliminates a call to the third party in these cases.

TRICARE CHAMPVA Bypass/Override Report

[PSO Bypass/Override Report]

This option provides information in a detail or summary report format that will list prescriptions where the Bypass or Override was performed to enable processing of these TRICARE and CHAMPVA prescriptions. The user has the ability to list (I)npatient; (N)on-Billable Product; (R)eject Override; (P)artial Fill; or(A)ll. Besides allowing the selection of all types, the report allows the selection of one or two types. For example, the user can select Non-billable and Reject for the same report.

This menu option is locked with the PSO TRICARE/CHAMPVA MGR security key.

Example: Accessing the TRICARE CHAMPVA Bypass/Override Report

Select Rx (Prescriptions) Option: epharmacy Menu
IR Ignored Rejects Report
MP ePharmacy Medication Profile (View Only)
NV NDC Validation

TRICARE/CHAMPVA Reject Processing

The Third Party Payer Rejects - Worklist [PSO REJECTS WORKLIST] and Third Party Payer Rejects - View/Process [PSO REJECTS VIEW/PROCESS] options have been modified in the following manner:

Display of non-DUR/RTS rejects

• Non-DUR/RTS TRICARE and CHAMPVA rejections each will be segregated into distinct sections. They will be denoted with a "TRICARE - Non-DUR/RTS" or "CHAMPVA - Non-DUR/RTS" header. This header remains regardless of whether the GI - Group by Insurance action is toggled on or off. The TRICARE and CHAMPVA sections sort in the same manner as the main sort for non-TRICARE/CHAMPVA prescriptions (by Rx, drug, patient).

When GI - Group by Insurance action is toggled ON, the headers "TRICARE" and "CHAMPVA" display, and these "TRICARE" and "CHAMPVA" sections sort alphabetically within RTS/DUR insurances. These TRICARE/CHAMPVA sections are separate from the Non-DUR/RTS section.

Example with GI action toggled on:

The TRI - Show/Hide TRICARE and CVA - Show/Hide CHAMPVA toggle actions can be found on the hidden menu on the Insurance Rejects screen. When the TRI action is toggled to Show, TRICARE Non-DUR/RTS rejects will automatically display in the listing. Toggling the TRI action to Hide will remove them from the screen. The CVA action behaves likewise for CHAMPVA Non-DUR/RTS rejects.

Example with TRICARE and CHAMPVA rejects displayed:

Processing of TRICARE and CHAMPVA Rejections - TRICARE/CHAMPVA Eligible Bypass/Override Functions

• A bypass function is provided to allow continued processing of prescriptions for TRICARE and CHAMPVA eligible inpatients whose Patient status = Inpatient at the time the prescription is issued.

In the following example a patient who has been admitted into a VA hospital (Patient status = Inpatient) is allowed to go on a weekend "pass" and issued outpatient medications such as OTC drugs or supplies for the weekend. The system displays the Non-Billable Reason "TRICARE INPATIENT/DISCHARGE" on the screen. The display of this Non-Billable Reason is due to the patient having Patient status = Inpatient, the patient is a TRICARE patient with TRICARE Insurance and an outpatient medication, OTC or Supply was issued.

```
ISSUE DATE: OCT 31,2010// (OCT 31, 2010)
FILL DATE: (10/31/2010 - 11/01/2011): OCT 31,2010// (OCT 31, 2010)
Nature of Order: WRITTEN//
                                 W
WAS THE PATIENT COUNSELED: NO// NO
Do you want to enter a Progress Note? No// NO
Rx # XXXX885
                     10/31/10
TRICARE, ONE(XXX-XX-XXXX) #3
TAKE 1 BY MOUTH 9
ACETAMINOPHEN 160MG/5ML ELIXIR (OZ)
VHAPROVIDER, ONE JOHN, DOE
# of Refills: 5
Is this correct? YES//
TRICARE INPATIENT/DISCHARGE
Another New Order for TRICARE, ONE? YES//
```

The following is a sample of the View Prescription ECME Log update. The Non-Billable Reason "TRICARE INPATIENT/DISCHARGE" is now displayed on the View Prescription ECME Log. The TRICARE INPATIENT/DISCHARGE status allows the system to record why a TRICARE prescription was allowed to be bypassed.

Rx View (Active) Oct 26, 2010@17:07:34 Page: 4 of 4 TRICARE, ONE <NO ALLERGY ASSESSMENT> Ht(cm): PID: XXX-XX-XXXX DOB: MAR 16,19xx (xx) Wt(kg): ____(____) Label Log: # Date Rx Ref Printed By There are NO Labels printed. ECME Log: # Date/Time Rx Ref Initiator Of Activity _____ 1 10/26/10@16:04:50 ORIGINAL JOHN, DOE Comments: TRICARE-Not ECME Billable: TRICARE INPATIENT/DISCHARGE Enter ?? for more actions Select Action:Quit//

Example: View Prescription ECME Log entry: TRICARE INPATIENT/DISCHARGE

In a similar situation where a prescription is issued to a CHAMPVA patient with Patient status = Inpatient, the Non-Billable Reason "CHAMPVA INPATIENT/DISCHARGE" would be displayed on the reject processing screen and in the View Prescription ECME Log.

TRICARE/CHAMPVA Eligible Outpatient Override Function

- An override function is provided to allow continued processing of prescriptions for TRICARE or CHAMPVA eligible outpatients when a rejected response is received from the TRICARE or CHAMPVA payer/PBM.
 - The Reject Action prompt will default to "Quit". If the Q (Quit) action is selected, the rejected claim will go to the TRICARE or CHAMPVA section, as appropriate, of the Pharmacy Third Party Payer Rejects Worklist. If the D (Discontinue) action is selected, the next prompt "Nature of Order" will default to "Service Reject". The I (Ignore) action is available if the user holds the <u>"PSO TRICARE/CHAMPVA" security key</u> and if selected, continued processing will occur.

Example of Reject Notification Screen Non-DUR/RTS with the action of D (Discontinue)

```

(This page included for two-sided copying.)

For Non-Billable TRICARE or CHAMPVA rejects, a Non-Billable Notification Screen is provided to allow continued processing of prescriptions. The Reject Action prompt will default to "Discontinue". If the action D (Discontinue) is selected, the prompt "Nature of Order" will default to "Service Reject". The I (Ignore) action is available if the user holds the <u>"PSO TRICARE/CHAMPVA" security key</u> and if it is selected, continued processing will occur. If the action Q (Quit) is selected, the Non-Billable TRICARE or CHAMPVA eligible prescription will go to the Pharmacy Third Party Payer Rejects – Worklist utilizing either Reject Code "eT" with reject description "TRICARE-DRUG NON BILLABLE" or Reject Code "eC" with reject description "CHAMPVA-DRUG NON BILLABLE." (The reject codes "eT" and "eC" are for use internal to the VistA system only and have no relation to any NCPDP reject code listing.) The new entry will be displayed in the TRICARE or CHAMPVA section of the Pharmacy Third Party Payer Rejects.

In the following example a TRICARE Active Duty patient with Outpatient status submits an OTC, Non-Billable drug or supplies prescription for dispensing. The pharmacist will have the option of Discontinuing the Rx, Ignoring the Rx or Quitting. Discontinue is the option displayed below.

Example of Non-Billable Notification Screen

Is this correct? YES// DRUG NOT BILLABLE *** TRICARE - NON-BILLABLE *** _____ Division : XXXX DIVISIONNPI#: 999999999Patient : TRICARE,ONE(XXXX)Sex: MDOB: JAN 1,19XX(XX) Rx/Drug : XXX5339/0 - DOCUSATE NA 100MG CA Date/Time: OCT 31, 2010@12:22:10 Reason : Drug not billable This is a non-billable TRICARE prescription. Select one of the following: (D)iscontinue - DO NOT FILL PRESCRIPTION D (Q)UIT - SEND TO WORKLIST (REQUIRES INTERVENTION) Q (I)gnore - FILL Rx WITHOUT CLAIM SUBMISSION Ι (D)iscontinue,(Q)uit, (I)gnore: D// Discontinue Nature of Order: SERVICE REJECT// Requesting PROVIDER: VHAPROVIDER, ONE 111 PHYSICIAN

In the following example a TRICARE Active Duty patient with Outpatient status submitted an OTC, Non-Billable drug or Supplies prescription for dispensing. The pharmacist selected the Quit option to send the prescription to the worklist for further review. The Non-Billable drug is displayed on the Pharmacy Third Party Payer Rejects – Worklist with a reason code "eT".

- The Non-Billable TRICARE prescriptions will appear on the Reject Information screen shown in the example below once the TRICARE Non-Billable claim has been selected from the Pharmacy Third Party Payer Rejects Worklist. The screen will display:
 - ECME# field will be blank
 - Insurance Information will be blank
 - Reject code section will have the reject code eT and status will state "NO CLAIM SUBMITTED"
 - Available Actions will be DC Discontinue Rx, VW -View Rx, MP Medication Profile, FIL – Fill Rx and IGN Ignore Reject (FIL and IGN will require <u>PSO</u> <u>TRICARE/CHAMPVA security key</u>)
 - Available Hidden Actions will be COM Add Comments, ED Edit Rx and all other standard List Manager hidden actions
 - If the action DC is chosen, the system will discontinue the prescription and the prompt "Nature of Order" will default to "SERVICE REJECT"
 - The following actions will <u>not</u> be selectable when processing a TRICARE or CHAMPVA eligible Non-Billable reject: Resubmit Claim (RES)/Change Suspense Date (CSD)/Submit Override Codes (OVR)/Submit Clarif Code (CLA)/Submit Prior Auth (PA)/Suspense Date Calculation (SDC)/Submit Mult Actions (SMA). If selected for a TRICARE reject, an error message will appear: "[action] not allowed for TRICARE Non-Billable claim". If selected for a CHAMPVA reject, an error message will appear: "[action] not allowed for CHAMPVA Non-Billable claim". The only actions available are to Discontinue, Fill the prescription, View prescription or Medication Profile.

Reject Information Screen – Electronic Signature and TRICARE/CHAMPVA Justification

This action requires the security key <u>PSO TRICARE/CHAMPVA</u>.

(This page included for two-sided copying.)

• A user must hold the <u>"PSO TRICARE/CHAMPVA" security key</u> to perform the Fill Rx (FIL) and Ignore Reject (IGN) actions on the Third Party Payer Rejects – Worklist and the "Ignore" action on the TRICARE or CHAMPVA Reject Notification screen. If the user holds the security key "PSO TRICARE/CHAMPVA", the prompt will display: "You are bypassing claims processing. Do you wish to continue?" If the user enters (No=Default), the user will return to the reject notification screen. If the user selects Yes to continue, the system will mimic the current Ignore action/functionality and allow processing of the prescription. The user will be prompted to enter their electronic signature code and asked to enter data into the TRICARE Justification or CHAMPVA Justification field, which is required. The user will be allowed to "^" out of the process. If the user opts to "^" out of the process, they will be taken back to the Reject Information screen prompt.

In the following example a TRICARE patient with Outpatient status submits a prescription for processing and a rejected response is received from the TRICARE payer/PBM. The pharmacist initially sends the prescription to the Third Party Payer Rejects – Worklist then later decides to finish processing the prescription and chooses the FIL action.

• The person that resolves TRICARE and CHAMPVA non-DUR/RTS rejects is dependent upon the type of reject. Dispense As Written (DAW) reject code 22 can be resolved by the pharmacy staff by editing the prescription and entering the appropriate DAW code that results in a claims resubmission. Other insurance-related rejects (missing eligibility or cardholder ID number) are resolved by the Outpatient Pharmacy Electronic Claims Coordinator (OPECC). Once the rejection has been resolved, the Reject Information screen under the pharmacy reject worklist shows the status of the prescription as E PAYABLE. At this point the user may select the FIL action which will prompt for label print.

```

• For rejects that remain in suspense, the user will be allowed to process the rejection as indicated above, however no labels will be printed until the prescription is pulled early or printed from suspense. Upon resolving the reject, the user will be notified of this information. CMOP prescriptions will function in the same manner.

<u>Other Rejects</u> [PSO REJECTS WORKLIST]

Rejects under the OTHER REJECTS section of the screen are resolved in the same manner as DUR/RTS rejects. The comments section will denote whether the reject was transferred automatically as is the case in the example below or "Transferred by OPECC" would denote those rejects where the OPECC manually transferred them to pharmacy for resolution.

The following example shows the user selecting to resolve sequence 16 from the Third Party Payer Rejects - Worklist option shown above. The user selects ED to edit the DAW code for the prescription, then resubmits the claim afterward. Since the claim was payable, both the RTS reject in sequence 13 and the DAW reject in sequence 16 were marked resolved. Also both are removed from the worklist after submission. The user then proceeds to Patient Prescription Processing option to view the ECME logs which show that claim resubmission was payable and that both rejects have been resolved.

Example: Resolving Other Rejects

```

View ePharmacy Rx [BPS RPT VIEW ECME RX]

The *View ePharmacy Rx* option allows you to view information for one prescription, combining information from Outpatient Pharmacy, Integrated Billing and ECME. More information on this report is available in the *Electronic Claims Management Engine (ECME) User Manual*.

(This page included for two-sided copying.)

MailMan Message for Open/Unresolved Rejects

When prescriptions remain on the Third Party Payer Reject – Worklist over the specified number of days, the system will send a Mailman Message. This message will be sent to the PSO REJECTS BACKGROUND MESSAGE mail group. Those users needing access to this information will need to be added manually to this mail group.

The specified number of days referred to above is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message. The number of days are defined in the EPHARMACY SITE PARAMETERS file (#52.86) as described in the EPHARMACY SITE PARAMETERS FILE section of this document.

The following are the criteria for generating a Mailman message regarding a rejected claim:

- Prescription is active
- Prescription is unreleased
- Claim is on the Reject Worklist for specified number of days or greater
- Claim has no comments added within date range.

Adding a comment to the reject will automatically reset the clock for the alert. The specified number of days will be site configurable and stored in EPHARMACY SITE PARAMETERS file (#52.86). The initial patch default setting will be five (5) days; however, the site will be able to reset the parameter between one (1) and thirty (30) to generate the alert message. MailMan message will be sent as a Priority message, and there will be a separate MailMan message for each division. The following is an example of the message:

Subj: ePharmacy - OPEN/UNRESOLVED REJECTS LIST for ALBANY ISC [#2680833] 07/25/08@11:52 53 lines From: OUTPATIENT PHARMACY PACKAGE In 'IN' basket. Page 1 *New* _____ The prescriptions listed below are third party electronically billable and can not be filled until the rejection is resolved. No action to resolve the rejection has taken place within the past 1 days. Please use the THIRD PARTY PAYER REJECTS WORKLIST option to resolve the rejection or add a comment to the rejection. Unresolved rejects will not be sent to CMOP or the local print queue for filling. They will continue to show on the rejects list until acted upon. Alerts for Discontinued CMOP Prescription

Discontinued by a Background Process

When a CMOP prescription with a status of Transmitted or Retransmitted is discontinued by a background process to the Outpatient Pharmacy options, e.g. CPRS or Registration V. 5.3 packages, an email will be sent to the PSX EXTERNAL DISPENSE ALERTS mail group. If no recipients are defined in the new mail group, the message will be sent to PSXCMOPMGR key holders stating that a prescription was just discontinued and that the CMOP status for the discontinued prescription was either Transmitted or Retransmitted.

Discontinued by a Foreground Pharmacy Process

When a CMOP prescription with a status of Transmitted or Retransmitted is discontinued by a foreground Pharmacy process due to a duplicate drug scenario that would trigger the duplicate to be discontinued, then the Processing Status field of the duplicate drug message is highlighted to alert the user.

```
Duplicate Drug A AND Z OINTMENT in Prescription: 123456789

Status: Active Issued: 11/27/09

Processing Status: Transmitted to CMOP on 11/27/09

SIG: APPLY 1 TUBE TO AFFECTED AREA TWICE A DAY

QTY: 1 # of refills: 5

Provider: OPPROVIDER, PROV Refills remaining: 5

Last filled on: 11/27/09

Days Supply: 5

Discontinue RX # 123456789?
```

In the above example, the line "Processing Status: Transmitted to CMOP on 11/27/09" is bold.

List One Patient's Archived Rx's [PSO ARCHIVE LIST RX'S]

This option shows the basic patient demographics and the prescription numbers and dates of archiving for archived prescriptions for this patient.

Manual Print of Multi-Rx Forms [PSO LM MULTI-RX PRINT]

This option allows the user to reprint the Multi-Rx Refill Request form on laser label stock without having to reprint the entire prescription labels. The user will receive a system confirmation that this form has been queued to print.

Example: Manually Printing Multi-Rx Forms

Select Rx (Prescriptions) Option: MANual Print of Multi-Rx Forms Enter patient to reprint Multi-Rx refill form for: OPPATIENT2,ONE Select LABEL DEVICE: LEX2 LEX2\$PRT Bay Pines Multi-Rx form queued to print

Reprint an Outpatient Rx Label [PSO RXRPT]

The label reprint function allows a single label or many copies of the same label to be reproduced. When the patient is enrolled in ScripTalk®, a message is displayed to the user indicating this and prompting the user to use the ScripTalk® label for the prescription bottle.

Example: Reprinting an Outpatient Rx Label

Select Rx (Prescriptions) Option: REPRINT AN OUTPATIENT RX LABEL Reprint Prescription Label: 400693 ADHESIVE TAPE WATERPROOF 1IN ROLL Patient is a ScripTalk patient. Use ScripTalk label for prescription bottle. Number of Copies? : (1-99): 1// <Enter> Print adhesive portion of label only? N// <Enter> 0 Do you want to send to External Interface Device? No// ? Enter either 'Y' or 'N'. Do you want to send to External Interface Device? No// NO Comments: 06/27/03 Rx # 400693 OPPATIENT16, ONE #1 AS DIR ON AFFECTED AREA ADHESIVE TAPE WATERPROOF 1IN ROLL OPPROVIDER30, TWO OPPHARMACIST4, THREE # of Refills: 2

When reprinting, you can choose whether or not you want to resend to a dispensing device using an external interface. If you do choose to resend, then the prescription will be sent to the dispensing system, and an entry will be made in the label log. This documents that this was a reprint and also resent to the dispensing system device. If you do not resend the prescription to the dispensing device, then only one entry is made in the label log.

Example: Reprinting an Outpatient Rx Label - Multiple Dispensing Device

Select Rx (Prescriptions) Option: REPRINT AN OUTPATIENT RX LABEL Reprint Prescription Label: 100002987 BACLOFEN 10MG TABS Number of Copies? : (1-99): 1// Print adhesive portion of label only? ? (This page included for two-sided copying.)

Signature Log Reprint [PSO SIGLOG REPRINT]

This option allows the user to reprint the Signature Log for a prescription. The system will prompt for a prescription number and printer device. The user will receive a system confirmation that this log has been queued to print.

Example: Reprinting a Signature Log

Select Rx (Prescriptions) Option: **Sig**nature Log Reprint Reprint Signature Log for Prescription: **100002277A** PREDNISONE 20MG S.T. Select LABEL DEVICE: **LEX2** LEX2\$PRT Bay Pines Signature Log Reprint queued

View Prescriptions [PSO VIEW]

View the most complete information available for a specific prescription. The activity log lists the date, reason, prescription reference (Rx Ref), the initiator of the activity, and comments. The label log lists the date, prescription (Rx Ref), the person who printed it, and comments. Prescriptions with a deleted status cannot be viewed.

(This page included for two-sided copying.)

Chapter 22: ScripTalk® 'Talking' Prescription Labels

ScripTalk® is a registered trademark of En-Vision America.

The ScripTalk® software generates prescription labels with speech synthesized patient information. This project helps to increase a patient's (individuals with visual impairments, dyslexia, and reading problems) ability to comply with their doctor's orders. Audible prescription information also reduces prescription errors thereby reducing hospital/emergency room visits.

Using the ScripTalk® Talking Prescriptions involves the installation of a specialty printer that prints to microchip-embedded label stock. The label will have printed text on it, along with the microchip containing the contents of the label. Pharmacy or other designated staff will enroll patients to receive these labels and issue those patients a special reader. When the patient holds a ScripTalk® label near the reader and presses a button, the content of the label is read aloud.

If a patient is enrolled for ScripTalk® and a prescription is ordered under a division that has a ScripTalk® printer set-up for auto-print, then whenever a prescription is finished for that patient, a ScripTalk® bottle label is automatically queued to print at the same time as the VistA label. The VistA label (either the old format or the new laser label format) will have the drug name on the bottle label voided out with the text "XXXXXX SCRIPTALK RX XXXXXX" to alert the pharmacist to use the actual bottle label from the ScripTalk® printer.

The pharmacy should check each ScripTalk® label for accuracy by using the ScripTalk® reader to read the label aloud. The printer encodes the chip while printing the label, but nothing in or attached to VistA can see or tell if the label is valid.

ScripTalk Main Menu [PSO SCRIPTALK MAIN MENU]

The options on this menu are used for the implementation as well as the maintenance of the various files for the ScripTalk® 'talking' software. These options allow the set up and testing of the ScripTalk® equipment, enter new patients or edit existing patients as receivers of the 'talking' prescription labels, and run various reports.

PT	ScripTalk Patient Enter/Edit
QBAR	Queue ScripTalk Label by Barcode
QRX	<i>Queue ScripTalk Label by Rx#</i>
RPT	ScripTalk Reports
	Reprint a non-voided Outpatient Rx Label
PARM	Set Up and Test ScripTalk Device

ScripTalk Patient Enter/Edit [PSO SCRIPTALK PATIENT ENROLL]

This option allows the user to define a patient to receive ScripTalk® 'talking' prescription labels or to change a patient to not receive the labels.

Example: Enrolling a ScripTalk® Patient

```
Select ScripTalk Main Menu Option: PT ScripTalk Patient Enter/Edit
Select PATIENT: OP
       OPPATIENT16, ONE 04-03-41
   1
                                     000246802
                                                     SC VETERAN
      OPPATIENTI6, ONE 04-03-41 000246802
OPPATIENT17, ONE 08-30-48 000123456
   2
                                                     NON-VETERAN (OTHER)
CHOOSE 1-2: 1 OPPATIENT16, ONE 04-03-41 000246802 SC VETERAN
SCRIPTALK PATIENT? N// YES
REMINDER: CMOP does not fill ScripTalk prescriptions. Please select mail
status: 2 (DO NOT MAIL), 3 (LOCAL REGULAR MAIL) or 4 (LOCAL CERTFIED MAIL).
MAIL: 2 DO NOT MAIL
     Select one of the following:
          R
                    BLIND VETERAN
                    LOW VISION
          T.
INDICATION: // BLIND VETERAN
```

The "MAIL:" prompt above is only displayed when the patient is set to a Consolidated Mail Outpatient Pharmacy (CMOP) status or does not have a mail status defined.

A progress note can be automatically placed in the ScripTalk® patient's chart to be signed when that patient is enrolled. To invoke this feature, ask the Text Integration Utility/Computerized Patient Record System (TIU/CPRS) coordinator at the site to create a note entitled "SCRIPTALK ENROLLMENT". The note contents will be "*Patient Name* was enrolled in ScripTalk today, and is now eligible to receive prescriptions with encoded speech-capable labels."

Queue ScripTalk Label by Barcode [PSO SCRIPTALK MANUAL INTERNAL]

This option is used to queue a ScripTalk® label to print using the barcode number to identify the label.

Example: Queuing a ScripTalk® Label to Print by Barcode

Select ScripTalk Main Menu Option: **QBAR** Queue ScripTalk Label by Barcode Enter Barcode Rx#:

Queue ScripTalk Label by Rx# [PSO SCRIPTALK MANUAL EXTERNAL]

This option is used to queue a ScripTalk® label to print using the prescription number to identify the label.

Example: Queuing a ScripTalk® Label to Print by Rx#

```
Select ScripTalk Main Menu Option: QRX Queue ScripTalk Label by Rx#
Select PRESCRIPTION RX #: 400675B ADHESIVE TAPE WATERPROOF 1IN ROLL
Queuing ScripTalk label
Select PRESCRIPTION RX #: 12345

Reprint a non-voided Outpatient Rx Label [PSO SCRIPTALK REPRINT VISTA LB]

This option allows the user to reprint an Outpatient Rx label for a ScripTalk® patient without voiding out the drug name.

When reprinting, you can choose whether or not you want to resend to a dispensing device, using an external interface. If you do choose to resend, then the prescription will be sent to the dispensing system, and an entry will be made in the label log. This documents that this was a reprint and also resent to the dispensing system device. If you do not resend the prescription to the dispensing device, then only one entry is made in the label log.

Example: Reprinting a non-voided Outpatient Rx Label

Select ScripTalk Main Menu Option: REprint a non-voided Outpatient Rx Label Reprint Prescription Label: 400675B ADHESIVE TAPE WATERPROOF 1IN ROLL Patient is a ScripTalk patient. Use ScripTalk label for prescription bottle. Number of Copies? : (1-99): 1// <Enter> Print adhesive portion of label only? N// <Enter> 0 Do you want to send to External Interface Device? No// ? LABEL(S) QUEUED TO PRINT

Set Up and Test ScripTalk Device [PSO SCRIPTALK SET-UP]

This menu option contains the options necessary to define, set up and test the ScripTalk® device, print a sample ScripTalk® prescription label, and reinitialize the printer.

- ScripTalk Device Definition Enter/Edit
- Print Sample ScripTalk Label
- Test ScripTalk Device
- Reinitialize ScripTalk Printer

ScripTalk Device Definition Enter/Edit [PSO SCRIPTALK DEVICE DEF'N]

The *ScripTalk Device Definition Enter/Edit* option allows the user to define the ScripTalk® device for the division where it will be used and whether the labels should be automatically printed or will be queued for manual print. The printer must be installed and connected to the network server before using this option.

You may now tie a ScripTalk printer to a regular Pharmacy label printer(s) to control where the ScripTalk labels print for multi-divisions. A divisional ScripTalk device must be defined in order for the printer mapping functionality to work correctly. If there aren't any mapped printers, then the system defaults to the divisional printer.

Example: Defining the ScripTalk® Device

```
Select Set Up and Test ScripTalk Device Option: SCripTalk Device Definition
Enter/Edit
Define ScripTalk Printer by (D)ivision or (P)rinter mapping?: (D/P): Division
Division: TROY
                 514
SCRIPTALK DEVICE: L8150$PRT// <Enter>
SCRIPTALK AUTO-PRINT SETTINGS: ?
     Enter 'A' if ScripTalk label printing should be automatic, "M" if label
     will be queued manually.
     Choose from:
      A AUTO PRINT
M MANUAL PRINT
      А
               AUTO PRINT
SCRIPTALK AUTO-PRINT SETTINGS: A AUTO PRINT
Define ScripTalk Printer by (D)ivision or (P)rinter mapping?: (D/P): Printer
Select LABEL PRINTER TO BE MAPPED: LBL$PRT1 Birmingham
PQ$:LBL$PRT1.TXT
  SCRIPTALK DEVICE: L8150$PRT CIOFO Birmingham PQ$: L8150$PRT.TXT
Select LABEL PRINTER TO BE MAPPED: LBL$PRT2 Tuscaloosa
PO$:LBL$PRT2.TXT
                                                     PQ$: L8150$PRT.TXT
 SCRIPTALK DEVICE: L8150$PRT
                               CIOFO Birmingham
Select LABEL PRINTER TO BE MAPPED:
Define ScripTalk Printer by (D)ivision or (P)rinter mapping?: (D/P):
```

If the device is defined for auto-print, and some patients are defined as ScripTalk® patients, then whenever a VistA label is queued, if the prescription belongs to a ScripTalk® patient, a ScripTalk® label should print at the same time.

Print Sample ScripTalk Label [PSO SCRIPTALK SAMPLE LABEL]

After the printer is defined, a sample ScripTalk[®] label can be generated. The *Print Sample ScripTalk Label* option allows the user to print a test ScripTalk[®] label.

Example: Printing a sample ScripTalk® Label

Select Set Up and Test ScripTalk Device Option: PRint Sample ScripTalk Label The following test data will be sent to the ScripTalk printer: ^XA ^F0250,700^XGE:RX.GRF^FS ^F0250,700^XGE:RX.GRF^FS ^AFR,20,10^F0531,50^FR^CI0^FD7305 N. MILITARY TRL Exp: January 01,2002^FS ^AFR,20,10^F0503,50^FR^CI0^FDRX#82382787 January 01,2006 Fill 01 OF 01^FS ^AFR,20,10^F0475,50^FR^CI0^FDONE OPPATIENT23^FS ^AFR,20,10^F0447,50^FR^CI0^FDTAKE 1 CAPSULE THREE TIMES DAILY^FS ^AFR,20,10^F0419,50^FR^CI0^FD^FS ^AFR,20,10^FO391,50^FR^CI0^FD^FS ^AFR,20,10^FO363,50^FR^CI0^FD^FS ^AFR,20,10^FO335,50^FR^CI0^FDDr. TWO OPPROVIDER30 MD^FS ^AFR,20,10^F0279,50^FR^CI0^FDQTY: 24 TABS^FS ^AFR,20,10^F0251,50^FR^CI0^FDAMOXICILLIN 500MG CAP^FS ^RX01, ONE OPPATIENT23^FS ^RX02,AMOXICILLIN 500MG CAP^FS ^RX03, TAKE 1 CAPSULE THREE TIMES DAILY ^FS ^RX04,010101^FS ^RX05,00^FS ^RX06,020000^FS ^RX07,TWO OPPROVIDER30^FS ^RX08,2928993888^FS ^RX09,82382787^FS ^RX10, ^FS ^PQ1,0,1,Y ^XZ Task Queued ! Select Set Up and Test ScripTalk Device Option:

If the printer did not print the label, check to make sure that the printer is closed very tightly. It may not have been closed completely after loading the labels.

If the printer printed a blank label or one that is extremely faint, use the *Reinitialize ScripTalk printer* option to reinitialize the printer. Then try printing the sample label again.

Once the sample label has printed, it is ready to be read by the reader. To read the label, place it near the face of the reader and hit the round power button on the reader. A series of ticks will be heard as the reader finds and retrieves the information on the label. Then the reader will begin speaking.

Test ScripTalk Device [PSO SCRIPTALK TEST DEVICE]

The *Test ScripTalk Device* option can be used to send one Zebra Print Language (ZPL) test string to the ScripTalk® printer.

Example: Testing the ScripTalk® Device

Select Set Up and Test ScripTalk Device Option: **TE**st ScripTalk Device Enter ZPL test string: **^AFR,20,10^F0475,50^FR^CI0^FDONE OPPATIENT23^FS**

Task Queued!

Reinitialize ScripTalk Printer [PSO SCRIPTALK REINITIALIZE]

The *Reinitialize ScripTalk Printer* option is used when the printer printed a blank label or one that is extremely faint. The user can reinitialize the printer and then try printing the label again.

Example: Reinitializing the Printer

Select Set Up and Test ScripTalk Device Option: ?
 ScripTalk Device Definition Enter/Edit
 Print Sample ScripTalk Label
 Test ScripTalk Device
 Reinitialize ScripTalk Printer
Enter ?? for more options, ??? for brief descriptions, ?OPTION for help text.
Select Set Up and Test ScripTalk Device Option: REinitialize ScripTalk Printer
Task Queued !

Chapter 23: Using the Supervisor Functions Menu

This chapter describes the Supervisor Functions menu options.

Supervisor Functions

[PSO SUPERVISOR]

The options on this menu are used for the implementation as well as the maintenance of the various files for the basic running of the Outpatient Pharmacy software. The following options are available on the Supervisor Menu:

- Add New Providers
- Daily Rx Cost
- Delete a Prescription
- Edit Provider
- Initialize Rx Cost Statistics
- Inter-Divisional Processing
- Inventory
- Lookup Clerk by Code
- Monthly Rx Cost Compilation
- Patient Address Changes Report
- Pharmacist Enter/Edit
- Purge Drug Cost Data
- Recompile AMIS Data
- Site Parameter Enter/Edit
- View Provider

Add New Providers [PSO PROVIDER ADD]

This option allows new providers to be entered. If at the "Enter NEW PERSON's name" prompt the name entered is repeated and the display returns to the menu, the provider name entered is already in the file. The *Edit Provider* option must then be used to change existing provider entries.

Daily Rx Cost [PSO COSTDAY]

This option is used to compile pharmacy daily costs.

Delete a Prescription [PSO RXDL]

Using this option, a prescription status can be changed to deleted. Deleted prescriptions do not appear on any profiles.

released prescription can only be deleted after it has been returned to stock.

Edit Provider [PSO PROVIDER EDIT]

Edit existing provider entries with this option in the NEW PERSON file.

If the inactive date given for the provider passes, the provider can no longer be used when entering a new prescription. However, the provider will still be available for refills beyond the inactivation date.

Initialize Rx Cost Statistics [PSO COSTINIT]

This option allows the manager to initialize the system to automatically compile cost data for one day or a range of days.

The default date is today plus 1 at 1:00 a.m. (T+1@1:00). The date on the screen represents either a default date/time if the option has never been queued, or the current date/time this option has already been queued to run.

Inter-Divisional Processing [PSO INTERDIV]

The user can permit or prevent processing between divisions with this option.

Inventory [PSO INVENTORY]

Use to update the current inventory or set up a starting count of inventory for the pharmacy.

The ORDER UNIT file does not come with data. You must populate this file with your own data.

Look-up Clerk by Code [PSO CLERK]

Identify the clerk by entering the identifying number. Clerk code-filing uses the internal identifying number of the clerk, which is determined at sign-on time and does not change.

Monthly Rx Cost Compilation [PSO COSTMONTH]

Use this option to gather information for reports of monthly pharmacy costs.

Patient Address Changes Report [PSO ADDRESS CHANGE REPORT]

This option provides a report that displays changes made to permanent and temporary mailing address information in the PATIENT file. Also, changes to the MAIL field and the MAIL STATUS EXPIRATION DATE field in the PHARMACY PATIENT file will be displayed. Changes can only be displayed if the edits were made using VA FileMan, and the Audit function was turned on for the field(s) at the time of the edit.

- For the PATIENT file, turn on auditing for:
 - STREET ADDRESS [LINE 1] field
 - ZIP+4 field
 - STREET ADDRESS [LINE 2] field
 - STREET ADDRESS [LINE 3] field
 - CITY field
 - STATE field
 - ZIP CODE field

- BAD ADDRESS INDICATOR field
- TEMPORARY ADDRESS ACTIVE? field
- TEMPORARY STREET [LINE 1] field
- TEMPORARY ZIP+4 field
- TEMPORARY STREET [LINE 2] field
- TEMPORARY STREET [LINE 3] field
- TEMPORARY CITY field
- TEMPORARY STATE field
- TEMPORARY ZIP CODE field
- TEMPORARY ADDRESS START DATE field
- TEMPORARY ADDRESS END DATE field
- For the PHARMACY PATIENT file, turn on auditing for:
 - o MAIL field
 - o MAIL STATUS EXPIRATION DATE field

Example: Patient Address Changes Report

Select Maintenance (Outpatient Pharmacy) Option: Patient Address Changes Report This option provides a report that displays changes made to permanent and temporary mailing address information in the PATIENT file (#2). Also changes to the MAIL field (#.03) and the MAIL STATUS EXPIRATION DATE field (#.05) in the PHARMACY PATIENT file (#55) will be displayed. Changes can only be displayed if the edits were made using VA FileMan, and the Audit function was turned on for the field(s) at the time of the edit. Print report for a Single patient, or All patients: (S/A): Single// <Enter> 12-2-16 Select PATIENT: **OPPATIENT24**, ONE 000345678 NSC VETERAN This report will be sorted by Date/time of edit. A beginning and ending date must now be entered for the search. Beginning Date: **T-100** (JUL 23, 2002) Ending Date: **T** (OCT 31, 2002) DEVICE: HOME// <Enter> GENERIC INCOMING TELNET <Enter> Address changes for OPPATIENT24,ONE (34-5678) PAGE: 1 made between JUL 23, 2002 and OCT 31, 2002 _____ _____ Date/time of edit: OCT 31, 2002@11:10:18 Field edited: STREET ADDRESS [LINE 1] Edited by: OPPHARMACY4, THREE Option/Protocol: PSO LM BACKDOOR ORDERS/PSO PATIENT RECORD UPDATE Old Value: <no previous value> New Value: TEST ADDRESS LINE 1 Date/time of edit: OCT 31, 2002@11:10:21 Field edited: STREET ADDRESS [LINE 2] Edited by: OPPHARMACY4, THREE Option/Protocol: PSO LM BACKDOOR ORDERS/PSO PATIENT RECORD UPDATE Old Value: <no previous value> New Value: TEST ADDRESS LINE 2 Date/time of edit: OCT 31, 2002@11:10:25 Field edited: STREET ADDRESS [LINE 3] Press Return to continue, '^' to exit:

Pharmacist Enter/Edit [PSO RPH]

This option allows pharmacists to be identified to the system. Enter the name of the new pharmacist at the "Select Pharmacist" prompt. When the PSORPH key is shown as a default, press return. This enters the pharmacist into the file and gives him/her the PSORPH security key. To delete a pharmacist, enter the name, then enter an @ symbol at the "KEY" prompt and press return.

Purge Drug Cost Data [PSO PURGE DRUG COST]

To purge drug cost data from the DRUG COST file enter a starting and ending date. Then choose to run this job immediately or queue it.

Example: Purge Drug Cost Data

Select Maintenance (Outpatient Pharmacy) Option: PURGE Drug Cost Data
Purge Cost Data Starting: FEB 1997// <Enter> (FEB 1997)
Purge Cost Data Ending: 3/97 (MAR 1997)
Are you sure you want to purge cost data
from 02/00/97 to 03/00/97? NO// Y YES
Do you want this option to run IMMEDIATELY or QUEUED? Q// <Enter> UEUED
Requested Start Time: NOW// <Enter> (MAY 06, 1997@10:31:23)
Task #223079 QUEUED.

Recompile AMIS Data [PSO AMIS RECOMPILE]

Gather AMIS data from various sources with this option. It is recommended that this job should be queued to run during off-peak hours or at a time that is convenient for the site.

Note: Month/day/year may be specified for a current month report, but only month and year can be specified for reports of past months.

Site Parameter Enter/Edit [PSO SITE PARAMETERS]

This option is used to establish and edit parameters for the Outpatient Pharmacy software application. The following table lists each parameter and its corresponding description.

Site Parameter	Description
NAME	This field contains the name of the site.
MAILING FRANK	This field is used for the address of the outpatient site.
STREET ADDRESS	
AREA CODE	This field is used for the area code of the outpatient site.
PHONE NUMBER	This field is used for the telephone number of the outpatient site.
MAILING FRANK ZIP+4	This field is used for the zip code of the outpatient site. This field will allow zip+4
CODE	format (excluding the "-")
SITE NUMBER	This field is used to show the site/station number.
MAILING FRANK CITY	This field is used for the city in which the outpatient site is located.
MAILING FRANK	This field is used to show the state in which the outpatient site resides.
STATE	

The MAILING COMMENTS field is available for a site to enter any information that will show on the Mail Address label. For example, this free text entry might be "Forwarding service requested" or "Address service requested". The comments will show after the MAIL field in the Mail Address Section of the label.

Site Parameter	Description
MAILING COMMENTS	This field will be printed on the laser labels mailing address label. It can contain
	anything the site deems appropriate (i.e. whether mailing is "Forwarding service
	requested" or "Address service requested", etc.)
HOLD FUNCTION?	This site parameter is used to determine if the 'Hold' function will be used at the medical facility.
SUSPENSE FUNCTION?	This site parameter will be used to determine if the 'Suspense' feature will be used at
	the medical facility.
CANCEL DRUG IN	Prescriptions with duplicate classes can only be discontinued if this site parameter is
SAME CLASS	set to 'Yes' and if the Rx has not been put on hold through CPRS.
REFILL INACTIVE	This will be used to determine if inactive drugs will be used to refill active
DRUG RXS	prescriptions.
ASK METHOD OF	This field will be used to determine if method of pickup will be asked for window
PICKUP	prescriptions.
PASS MEDS ON	This field is used to determine if pass medication within specified date range will be
PROFILE	listed on profiles.
PROFILE `SORT BY'	This field will be used to determine the sort order of medications on profiles.
DEFAULT	
COPIES ON NEW	This field will be used to determine the number of copies for labels to print.
DRUG CHECK FOR	This field is used to determine if the duplicate drug warnings should be shown for
CLERK	non-pharmacist.
FEE BASIS SUPPORT	This field is used to determine if fee basis prescriptions are processed.
MULTI RX REQUEST	This field is used to determine if the multiple prescription request forms are printed
FORM	with medication labels.
BARCODES ON	This field is used to determine if barcodes are printed on profiles, labels, and multi
REQUEST FORMS	request forms.

Site Parameter	Description
BARCODES ON ACTION	This field is used to indicate if barcodes are to print with the action profiles. The
PROFILES	printer used must be setup or have barcode capabilities for the barcodes to print.
	Contact IRM to help determine which printers have barcode capabilities.
DISPLAY GROUP	This field is used to determine which bingo board display screen will be shown on
	the waiting room monitor.
SCREEN PROFILES	This field is used to determine if profiles are displayed when refilling and renewing
	medications.
EDIT PATIENT DATA	This field is used to determine if editing of patient data will be allowed.
EDIT DRUG	This field will be used to determine if drugs can be changed during prescription edit.
RENEWING RX'S	This field will be used to determine if renewing of medications will be allowed.
ALLOWED	
PASS MEDS CANCEL	This field is used to determine if pass medications are to be cancelled.
AUTO SUSPEND	This field is used to determine if medication that is refilled or renewed before the
	next possible fill date is to be placed in suspense automatically.
SHALL COMPUTER	This field is used to determine if the computer will auto generate prescription
ASSIGN RX #S	numbers.
PROFILE WITH NEW	This field is used to determine if medication profiles are printed when new
PRESCRIPTIONS	medication is ordered.
SLAVED LABEL	This field will be used to allow printing of RX labels without being able to queue to
PRINTING	a printer.
	This parameter is primarily for slaved printing of RX labels. If 'yes' is the answer
	the prompt or action to be taken on the label will include the '/PRINT' action.
METHADONE	This field will be used to determine if the site has a methadone program and if a
PROGRAM	particular drug should be prompted for.
METHADONE DRUG	This field will be used to show what drug is being used if the site has a methadone
	program.
DAYS TO PULL FROM	This field will be used to pull a patient's medication from suspense for a specified
SUSPENSE	number of days. The day range is from 0 to 10.
DAYS TO PULL	This field will be used to pull a patient's controlled substances from suspense for
SUSPENDED CS CMOP	CMOP medications for a specified number of days. The range is between 0 and 10.
NEW LABEL STOCK	This field will be used to determine which medication label stock will be used.
EXTERNAL INTERFACE	This field allows sites to alter the characteristics of the external interface. The Set of
	Codes field have the following values:
	0 - the external interface is off 1 - send all drugs to the external interface; print labels
	locally
	2 - send all drugs to the external inter
	face; don't print labels locally
	3 - send only marked drugs to the external interface; don't print labels locally
	4 - send only marked drugs to external interface and print labels through VistA.
BLANK LABEL	This field will determine if a blank label should print between patients on the label
BETWEEN PATIENTS	printers.
VERIFYING	This site parameter will determine if the name of the verifying pharmacist or the
PHARMACIST ON	name of the person who made the order request will print on the Rx label. If the
LABELS	parameter is set to Yes the verifying pharmacist name will print.

The CPRS ORDERING INSTITUTION field in the OUTPATIENT SITE file allows multiple Institutions to be entered for the local site. If more than one Institution is entered for a site, the user can select the appropriate Institution when using the *Complete Orders from OERR* option and complete Pending Orders from clinics that are associated with the specific Institution selected.

Site Parameter	Description
CPRS ORDERING	This field is used when completing orders from CPRS. If there is only one
INSTITUTION	Institution entry, then when completing orders from CPRS under this Outpatient
	site, only those orders from that Institution will be shown. If there is more than one
	entry, then the Institution will be prompted for when completing orders from CPRS,
	and only those orders associated with that Institution selected will be shown.
RELATED INSTITUTION	Institution associated with the site.
LOGICAL LINK	This is a pointer to the Logical Link file (#870). This link is used to transmit
	messages to an external (client) application. This field is not filled in when
	messages are exchanged between DHCP applications on the same system. This field
	will be used as the Logical Link for the prescription if there is a Clinic associated
	with the prescription, and the Institution derived from that Clinic has an entry in this
	CPRS ORDERING INSTITUTION multiple with an associated Logical Link.
NPI INSTITUTION	This is the institution or division that has the National Provider Identifier (NPI)
	value for this Outpatient Site. No two Outpatient Site entries in this file should point
	to the same INSTITUTION file entry. (Note that the RELATED INSTITUTION
	field differs from this field and is the parent institution which may be the same for
	any or all of the Outpatient Site entries.)
AUTOMATED	This field will determine what version of the automated dispense machine this site is
DISPENSE	running. If the machine is older than HL7 V.2.4, enter letter O, if HL7 V.2.4 has
	been installed, enter 2.4.
FILE RELEASE	This field is used to indicate if the release date/time is to be filed for the prescription
DATE/TIME	dispensed by an external interface.
ENABLE MASTER FILE	This field will determine if the automated dispense machines are ready to receive
UPDATE	HL7 V.2.4 messages.
SCRIPTALK DEVICE	This field contains a pointer to the ScripTalk printer device in the device file.
SCRIPTALK AUTO-	Set this to 'A' to have a ScripTalk label automatically print for ScripTalk-enrolled
PRINT SETTINGS	patients whenever their regular medication label prints. Set to 'M' if ScripTalk labels
	will be printed manually.
LABEL/PROFILE	Maximum number of label/profiles to be stored in the Label/Profile Monitor list for
MONITOR MAX 0	each printer device. The default and minimum value for this number is 1000. Each
	time the printer is used an entry is made in the Label/Profile monitor and if the
	monitor holds more entries than specified by this parameter, the oldest entry is
	deleted.
NARCOTICS	This field is used to determine if narcotics will be numbered differently from other
NUMBERED	medications/supplies.
DIFFERENTLY	
NARCOTIC LOWER	This field is used to determine what prescription numbers narcotics are to start with
BOUND	if narcotics are numbered differently from other prescriptions/supplies.
NARCOTIC UPPER	This field is used to determine the highest prescription number used for narcotics if
BOUND	this type of medication is numbered differently from other medications/supplies.
LAST NARCOTIC	This field is used to indicate last number issue d for narcotic medications.
NUMBER ISSUED	
IB SERVICE/SECTION	Select the appropriate entry in the Service/Section file (#49) that is to be used for the
	Pharmacy Copayment/Integrated Billing procedures.

Site Parameter	Description
NARRATIVE FOR	This field contains information from the site regarding the copayment procedures for
COPAY DOCUMENT	the patient to follow upon receipt of the copay document. For example, information
	may include a telephone number to call regarding billing inquiries, a payment
	mailing address, etc.
NARRATIVE	This field contains information from the site regarding procedures for the patient to
REFILLABLE RX	obtain a refill of his refillable medication. May include the address, phone number,
	etc. that will assist the patient.
NARRATIVE NON-	This field contains information from the site regarding procedures for the patient to
REFILLABLE RX	obtain a new prescription for his non-refillable medication. This field may contain
	address, phone number, etc that will assist the patient.
CHARGE LOCATION	This field is a pointer to the Hospital Location File (#44). Multi-division sites
	should populate this field for each division. This data could be obtained from the
	Business Office of the Medical Center.

The CHARGE LOCATION field is used to group charges in the COTS billing system according to the type of service.

IMPORTANT

Entering and defining the Charge Locations is crucial to the success of this function. Initially, however, a unique Outpatient Pharmacy Location must be entered in the HOSPITAL LOCATION file by Registration or Scheduling. It is recommended that the Location be coordinated with the Medical Center's business office. A Charge Location should be defined for every division currently in the OUTPATIENT SITE file, which means that there could be multiple hospital locations or one location for all divisions.

If a Charge Location is not defined for a particular division, Outpatient Pharmacy will search all active divisions in the OUTPATIENT SITE file for a Charge Location entry and use the first one it finds. If the PFSS switch is ON and no Charge Locations are defined in any divisions, the information will not be passed on to IB or the COTS billing system and no charge takes place.

Information in the CHARGE LOCATION field cannot be deleted, but it can be replaced with entry of another Charge Location.

Site Parameter	Description
NCPDP NUMBER	This field is the site-specific National Council for Prescription Drug Programs
	number (NCPDP), formerly referred to as the National Association of Boards of
	Pharmacy Number (NABP).
PRESCRIPTION #	This field is used to enter the lowest prescription number for this site.
LOWER BOUND	
PRESCRIPTION # UPPER	This field is used to enter the highest prescription number for this site.
BOUND	
LAST PRESCRIPTION #	This field is used to store the last RX number used.
ISSUED	
INACTIVE DATE	This date will indicate that the Outpatient Site is no longer active, and cannot be
	selected through the Outpatient Pharmacy options.

Site Parameter	Description
LOGICAL LINK	This is a pointer to the Logical Link file (#870). This link is used to transmit messages to an external (client) application. This field is no t filled in when messages are exchanged between DHCP applications on the same system. This field will be used as the Logical Link for the prescription if there is no Clinic associated with the prescription, or if there is a Clinic associated with the prescription, but the Institution derived from that Clinic does not have an entry in the CPRS ORDERING INSTITUTION multiple with an associated Logical Link for that Outpatient Site entry.
DISPENSE DNS NAME	This is the DNS computer name of the automated dispensing machine that is used for this outpatient site division.
DISPENSE DNS PORT	Enter the DNS port number associated with the automated dispense machine for this outpatient pharmacy site division.
DISPENSING SYSTEM PRINTER	This field identifies the name of the dispensing system printer device. When the user selects this printer device and the external interface is in use, an HL7 message will be generated.
OPAI	This multiple field identities the Automated Dispensing Device (ADD) associated with the DISPENSING SYSTEM PRINTER (#59.0200801) field. When the user selects a label printer during Patient Prescription Processing, and the external interface is in use, an HL7 messages will be generated and routed to the appropriate automated dispensing devices defined in this multiple.

The following example displays all of the prompts that are possible with the Site Parameter Enter/Edit option. The prompts displayed at each site will depend upon that site's settings.

Example: Site Parameter Enter/Edit - all fields

Select Maintenance (Outpatient Pharmacy) Option: SITE Parameter Enter/Edit Select SITE NAME: ALBANY 500 Would you like to see all site parameters for this division?                                                 9086
   DNS NAME: SCRIPTCENTER //
   CATEGORY: STORAGE / /
  Select DNS NAME:
Select DISPENSING SYSTEM PRINTER:
```

• Before adding a "DNS NAME", the entry must first be added to the PHARMACY AUTOMATED DISPENSING DEVICES file (#52.53) using the Enter/Edit Automated Dispensing Devices [PSO AUTO DISPENSING DEVICE] option.

• The CATEGORY field is a set of codes and is a required field. Categories provide the flexibility of routing RXs to different automated dispensing devices. The following are the valid codes:

Code	Description
MCS	MAIL – CONTROLLED SUBSTANCE
MNCS	MAIL – NONCONTROLLED SUBSTANCE
MAIL	MAIL
WCS	WINDOW – CONTROLLED SUBSTANCE
WNCS	WINDOW - NONCONTROLLED
	SUBSTANCE
WIND	WINDOW
CS	CONTROLLED SUBSTANCE
NCS	NONCONTROLLED SUBSTANCE
А	ANY
S	STORAGE

Note: The "ANY" category is only allowed (with the exception of S-storage) if no other categories are selected for the automated dispensing device and vice versa (i.e., if any other category is selected for the automated dispensing device, then the "ANY" category shall not be selectable). The "ANY" category will not work with any other category except "STORAGE".

Note: "STORAGE" denotes a 24/7 prescription pickup kiosk that stores prescriptions filled electronically by pharmacy and enables pharmacy customers to pick up their prescriptions without waiting in line. It enhances patient satisfaction, ensures the right prescription is delivered to the right patient thus enhancing patient safety, saving pharmacy time, and giving inventory control over the medications dispensed.

The "S" category is allowed in combination with other categories and as standalone.

Example: Allowable Category Combinations

Allowable Category combinations when associating multiple automated dispensing devices to one dispensing printer:
1. MCS, MNCS, WCS, WNCS, S*
2. MCS, MNCS, WIND, S*
3. WCS, WNCS, MAIL, S*
4. CS, MNCS, WNCS, S*
5. NCS, WCS, MCS, S*
6. MAIL, WIND, S*
7. CS, NCS, S*
8. ANY, S*
9. S*
*Multiple storage devices can be associated with one dispensing printer.
To avoid conflict, only certain category permutations shall be allowed.
For example, users shall not be able to define categories of MCS to one
automated dispensing device and MAIL for a different automated dispensing
device linked to the same dispensing printer. Otherwise, a controlled substance
Rx with a route of Mail would have the potential of being routed to two different
automated dispensing devices, which presents a conflict.
Within each set identified above, there can be any combination within each
category (for example in #1, categories MCS and WNCS can both be defined for
a dispensing printer).
a dispensing prince).

Again, the "ANY" category will not work with any other category except "STORAGE".

The software will not allow the same category to be defined for different automated dispensing devices associated with a printer.

Note: In order to exit the CATEGORY field, you must either enter ^ DNS NAME or select the "S" category.

View Provider [PSO PROVIDER INQUIRE]

This option provides a way to quickly look up basic data for a single provider.

Select Supervisor Functions Option: **VIEW** Provider Select Provider: **OPPROVIDER, THREE** OPPROVIDER, THREE то PROVIDER Name: OPPROVIDER, THREE Initials: TO Tax ID: Date Exclusionary List Checked: NON-VA Prescriber: No Exclusionary Check Performed: On Exclusionary List: Exclusionary Checked By: Authorized to Write Orders: Yes Requires Cosigner: No DEA# Class: VA# Type: Unknown NPI# Remarks: Synonym(s): TO Service/Section: PHARMACY Select Provider:

Chapter 24: Using the Suspense Functions

This chapter describes the Suspense Functions menu options used for handling suspended prescriptions.

Suspense Functions

[PSOPND]

The *Suspense Functions* menu allows the user to print or delete various entries and print out statistics about entries in the RX SUSPENSE file. This file contains prescription labels that have been suspended for printing at a later time. Each prescription label has with it an associated suspense date which is the same as the fill or refill date.

There are eight *Suspense Functions* options that allow the user to manipulate the data in the RX SUSPENSE file:

- Auto-delete from Suspense
- Change Suspense Date
- Count of Suspended Rx's by Day
- Delete Printed Rx's from Suspense
- Log of Suspended Rx's by Day (this Division)
- Print from Suspense File
- Pull Early from Suspense
- Reprint Batches from Suspense

Auto-delete from Suspense [PSO PNDEL]

The *Auto-delete from Suspense* option is the same as the V. 6.0 option *Delete from Suspense File*. This option allows deletion of the records of all the prescriptions that have already been printed prior to the user specified number of days. This specified number of days must be set from 7 to 90 days at the "DAYS PRINTED RX STAYS IN 52.5" prompt in the *Site Parameter Enter/Edit* option. The task is set to run every 7 days at the user specified time. The user may also re-queue or de-queue this task using this option. Once a prescription is deleted from suspense, it cannot be reset for reprinting. This option will delete based on the date the prescription was printed from suspense, not the date that it was originally suspended for. The reason for this is that one batch may print on a certain day with prescriptions with different original suspense dates. This job will therefore never delete only part of a printed batch.

Example: Auto-delete from Suspense

Select Suspense Functions Option: Auto-delete from Suspense Edit Option Schedule Option Name: PSO PNDEL1 Menu Text: Auto-delete from Suspense TASK ID: 1091148 QUEUED TO RUN AT WHAT TIME: JUL 13,1997@01:00 DEVICE FOR QUEUED JOB OUTPUT: QUEUED TO RUN ON VOLUME SET: RESCHEDULING FREQUENCY: 8D TASK PARAMETERS: SPECIAL QUEUEING: COMMAND: Press <PF1>H for help Insert

Change Suspense Date [PSO PNDCHG]

This option allows the suspense date for a specific prescription or all prescriptions for a patient to be changed. The new suspense date will become the fill/refill date automatically. The user is also given the opportunity to delete a specific prescription, or all prescriptions for a patient, from suspense while in this option. If a refill is deleted from suspense that has not yet been printed, the refill information will be deleted from the prescription, and the various fill dates will be adjusted accordingly. This option does not produce a label.

Count of Suspended Rx's by Day [PSO PNDCNT]

This option allows printing of a list showing the total number of prescriptions in the RX SUSPENSE file for every day in the specified time period.

This option can help the pharmacy anticipate the workload for particular days.

Delete Printed Rx's from Suspense [PSO PNDPRI]

With this option printed prescriptions can be deleted from suspense manually. Basically, it does the same thing as the *Auto-delete from Suspense* option, but it prompts the user to delete a single prescription, all prescriptions for one patient, all prescriptions for a given date range, or all prescriptions that have printed in a batch.

A batch is the group of labels that printed for a particular Print from Suspense File job. For example, if for one day, the *Print from Suspense File* option is queued 3 times, three batches will be printed for that day. (See the *Print from Suspense File* option.)

If it is necessary to reset and reprint the suspense labels and only selected labels are wanted, those not wanted can be deleted from the batch. The deleted labels will not be reprinted as part of the batch.

Log of Suspended Rx's by Day (this Division) [PSO PNDLOG]

Using this option, the manager can print a report by division of all suspended prescriptions sorted either by patient or identification number. The log contains the prescription number, patient name, drug name, type, and print status.

The Log of Suspended Rx's by Day (this Division) [PSO PNDLOG] option is updated to add a new column showing the B/D/F (Bad Address Indicator/ Do Not Mail/ Foreign Address) status of the prescription.

Print from Suspense File [PSO PNDLBL]

This option allows the user to print labels from the RX SUSPENSE file. First, enter the "Print Through" date. Any prescriptions with a suspense date on or before the date entered will print. Additionally, if a patient has at least one prescription on or before the date entered, any other prescriptions for that patient that are in suspense will be printed for the site parameter specified number of days to be pulled from suspense.

For example, if today's date is entered and Patient A has a prescription to be printed through the date entered, all of Patient A's prescriptions between the date entered plus the number of days set in the local site parameter will be printed. If there are no prescriptions for Patient A through the date entered, no labels will print.

Labels can be sorted by the patient name, the SSN, or the DEA Special Handling code. If sorted by DEA, the labels must then sort by patient name or SSN. Sorting by DEA will send the labels to the printer in three groups:

- **First group** will contain all the prescriptions with drugs that contain an "A" (narcotics and alcoholics) or a "C" (controlled substances-non narcotic) in the DEA Special Handling field.
- Second group will contain all the prescriptions with drugs containing an "S" (supply) in the DEA Special Handling field.
- **Third group** will contain all others. If a patient has prescriptions in suspense that fall in all three categories, that patient's labels will be printed three times, once in each group.

Only one job is tasked for all of the prescriptions in the batch; therefore, if the job is queued by mistake, only one tasked job must be undone. Any prescription that is put in suspense for the "Print Through Date" between the times the job was queued until the time it actually runs will be included in the job.

Labels for each job printed from suspense will be part of a batch. Each batch is identified by the Division, the user who queued the batch, and the date/time that the job was queued to begin.

Prescriptions pulled early from suspense will not be part of a batch, so they will not be able to be reprinted through the *Reprint Batches from Suspense* option.

A short profile for every patient for whom a label for a new prescription is being printed will also be printed if the local Profile with New Prescriptions site parameter is set to Yes.

If a patient has partial prescriptions with regular fills, only one set of trailing documents will print for that patient. (In V. 6.0 trailer documents were printed after each partial.)

If the patient has remote prescriptions, then the text "THIS PATIENT HAS PRESCRIPTIONS AT OTHER FACILITIES" will appear on the report as shown in the following example.

PRESCRIPTION PROFILE AS OF 12/30/2008	
NAME: PSOPATIENT, ONE	
THIS PATIENT HAS PRESCRIPTIONS AT OTHER FACILITIES	
PHARMACIST:	DATE:

If a prescription is determined to be an ePharmacy prescription (e.g., third party electronically billable), an electronic claim will be sent by ECME to the third party payer. TRICARE and CHAMPVA prescriptions are exceptions, as noted in the TRICARE and CHAMPVA section. The communication events between Outpatient Pharmacy and ECME are recorded in the ECME Log section of each prescription. The ECME log can be viewed in the patient Medication Profile screen (Activity Log option - AL) and also from the View Prescriptions option. If the claim submission returns a Refill Too Soon (79) or Drug Utilization Review (88) reject, the label is not printed for the prescription and it is moved to the Refill Too Soon/DUR section of the patient Medication Profile screen until the user resolves the reject. The prescription will also display on the Third Party Payer Reject worklist.

3/4 Days Supply Hold

Because of the great number of refill-too-soon third party claim rejections that can occur due to prescriptions being filled too early, the system verifies that ³/₄ of the days supply has elapsed on the previous fill before the ePharmacy prescription may be refilled. The following list describes this functionality.

- ePharmacy prescriptions are delayed from being sent to CMOP and printed for local mail until ³/₄ of the days supply has elapsed. For CMOP suspense, a partial day will be rounded up (ex.: ³/₄ of 30 days will be 23 days). With the release of PSO*7*367, this rounding functionality will also be available for local mail suspense.
- An activity log entry states the date/time that the prescription will be allowed to be removed from suspense. The activity log is defined on the initial evaluation. The following is an example of the log entry:

4 06/18/08 SUSPENSE REFILL 2 OPHARM,ONE Comments: 3/4 of Days Supply SUSPENSE HOLD until 6/20/08.

• To fill the prescription earlier, users may pull these types of prescriptions early from suspense.

Host Errors

Prescriptions (ePharmacy only) will be prevented from being filled/sent to CMOP when a host processing error occurs as a claim is submitted through ECME. Host processing errors are identified by reject codes M6, M8, NN, and 99 which are returned by the third party payer. The following conditions apply when this scenario occurs.

- The transmission of the prescription fill will be delayed 1 day in hopes that the host processing issues will be resolved by the third party payer.
- An activity log entry will state the date/time along with a comment stating that the Rx/fill was left in suspense hold due to a host processing error. The following is an example of the log entry:

2 06/25/08 SUSPENSE ORIGINAL OPPHARM,TWO Comments: SUSPENSE HOLD until 6/26/08 due to host reject error.

• The Pull Early from Suspense function is not impacted by this added functionality. Users may pull these type prescriptions early from suspense.

There is no user interaction for this function. It initiates when the Print from Suspense [PSO PNDLBL] option is initiated for CMOP prescriptions.

TRICARE and CHAMPVA

If there is an override or bypass for a TRICARE or CHAMPVA prescription and there are no open claim rejections for that prescription, then an electronic claim is not generated from suspense, and the label will be printed when the prescription is processed from suspense. This

exception applies to TRICARE and CHAMPVA ePharmacy billable prescriptions and nonbillable prescriptions.

If a claim is submitted from suspense for a TRICARE or CHAMPVA prescription, the prescription will be displayed on the Third Party Payer Reject worklist if the claim submission returns any type of reject. Also, non-billable TRICARE and CHAMPVA prescriptions will be displayed on the Third Party Payer Reject worklist. A user must resolve the reject or submit an override before the prescription can be processed through suspense.

(This page included for two-sided copying.)

Pull Early from Suspense [PSO PNDRX]

This option is used to pull a specific prescription or all prescriptions for a patient early. If a prescription is pulled early using this option, it will not be associated with any printed batch, and the user will not be able to reprint a label with the *Reprint Batches from Suspense* option. Since prescriptions that are pulled early from suspense do not belong to any printed batch and cannot be reprinted from suspense, there is no reason to leave them in suspense.

The user may also edit the "Method of Pickup". For the prompt "Pull Rx(s) and delete from Suspense", the user should answer **YES** to pull the prescriptions, and they will always be deleted from suspense.

If the routing is changed to "Window" when pulling from suspense early and the bingo board is being used, those prescriptions will be sent to the bingo board.

If a prescription is determined to be an ePharmacy prescription (e.g., third party electronically billable), an electronic claim will be sent by ECME to the third party payer. The communication events between Outpatient Pharmacy and ECME are recorded in the ECME Log section of each prescription. The ECME log can be viewed in the patient Medication Profile screen (Activity Log option - AL) and also from the *View Prescriptions* option. If the claim submission returns a Refill Too Soon (79) or Drug Utilization Review (88) reject, the label is not printed for the prescription and it is moved to the Refill Too Soon/DUR section of the patient Medication Profile screen until the user resolves the reject. The prescription will also display on the Third Party Payer Reject worklist.

Queue CMOP Prescription [PSO RX QUEUE CMOP]

The *Queue CMOP Prescription* option allows the users (including pharmacy technicians) to put mailrouted prescription(s) for CMOP drugs on suspense for CMOP.

Example: Queue CMOP Prescription

Select Suspense Functions Option: ${\tt QUEUE}$ CMOP Prescription Enter the Rx # to queue to CMOP: ${\tt 300486}$

If the prescription does not have a routing of Mail, has already been released, or is not for a CMOP drug, and does not pass all the other normal checks for CMOP, it will not be put on suspense for CMOP.

Reprint Batches from Suspense [PSO PNDRPT]

This option enables the user to reset the RX SUSPENSE file so that labels in a batch that have already been printed once can be printed again. This option is useful if certain portions of the previously printed labels are unusable.

A prompt is shown for a date range, and within the date range entered all of the batches that have printed from suspense and all the labels associated with each batch are shown. Next, the user can choose to reprint any number of batches. Whichever batch or batches is chosen to reprint, only the labels printed with that batch will be reprinted in the same order they were printed originally. If a prescription or prescriptions have been deleted using the *Delete Printed Rx's from Suspense* option, it will be excluded from the batch to be reset and reprinted.

Prescriptions pulled early from suspense will not be part of a batch, so they will not be able to be reprinted through the Reprint Batches from Suspense option.

(This page included for two-sided copying.)

Chapter 25: Updating a Patient's Record

This chapter describes the option used for updating a patient's record.

Update Patient Record

[PSO PAT]

Use this option to update the patient information currently in the computer and to update patient records being viewed by using the *Patient Record Update* screen action. If implementing Other Language Modifications, use either to set a patient's other language preference.

In support of Registration patch DG*5.3*522, the Outpatient Pharmacy software provides for the automatic population of city, state, and county based on entry of a zip code.

Example: Updating a patient record

Select Outpatient Pharmacy Manager Opti	on: UPDATE Patient Record
Select Patient: OPPATIENT,ONE 12-	4-53 000007890 YES SC VETERAN
OPPATIENT, ONE 4500 S MAIN ST	ID#: 000-00-7890 DOB: DEC 4,1953
ADDRESS LINE2 LINE 3 OF ADDRESS	
MADISON	PHONE: 555-555-1653
WISCONSIN 53705	ELIG: SC LESS THAN 50% SC%: 10

(This page included for two-sided copying.)

Chapter 26: Verifying Prescriptions

This chapter describes the option and methods used for verifying prescriptions.

Verification

[PSO VER]

Pharmacists use the *Verification* menu to verify prescriptions with a non-verified status; obtain a listing of those remaining non-verified prescriptions; or calculate the number of non-verified prescriptions by entering the patient or the clerk.

The following options are available on the Verification menu:

- List Non-Verified Scripts
- Non-Verified Counts
- Rx Verification by Clerk

If the verification site parameter is set to "YES", new prescriptions entered by a non-pharmacist (i.e., someone who does not hold the PSORPH key) will be put in a non-verified status, entered into the non-verified orders file, and will not be made active (nor will labels be printed) until they are reviewed and verified by a pharmacist. When new and renewed prescriptions for a patient are verified, all labels for that patient will be printed together. If a patient has refills only, these labels will be printed as they are entered.

A pharmacist may choose to verify all entries made by a particular technician rather than all the prescriptions for an individual patient.

Prescriptions in a non-verified status can not be canceled, edited, or deleted through the usual options. If a non-verified prescription is auto canceled on admission, it can be reinstated, but it returns to the non-verified status.

Verifying an ePharmacy order is similar to finishing an order. For an example, see "<u>Verifying ePharmacy</u> <u>Orders</u>" at the end of the "Verification through Patient Prescription Processing" section.

Incorporating enhanced dosing checks in the verification process (PSO*7*251):

- When the VERIFICATION outpatient site parameter is set to 'Yes', dosage check warnings are displayed to a user who does not hold the PSORPH key when entering a new outpatient medication order through the backdoor or when finishing a pending order.
- When the VERIFICATION outpatient site parameter is set to 'No', dosage check warnings are displayed to a user who does not hold the PSORPH key when entering a new outpatient order through the backdoor.
- When the VERIFICATION outpatient site parameter is set to 'No', a user who does not hold the PSORPH key will not be allowed to finish a pending order.

• A user who does not hold the PSORPH key, regardless of how the VERIFICATION outpatient site parameter is set to, shall not be prompted to take any intervention action on a dosage check warning.

The *Patient Prescription Processing* [PSO LM BACKDOOR ORDERS] and *Complete Orders from OERR* [PSO LMOE FINISH] options have been modified to incorporate the above functionality.

(This page included for two-sided copying.)

List Non-Verified Scripts [PSO VRPT]

This option allows the user to obtain a list of all scripts remaining in a status of 'Non-Verified' by either patient or entering clerk.

Example: Non-verified prescriptions (sorted by patient)

Select Outpatient Pharmacy Manager Option: Verification Select Verification Option: List Non-Verified Scripts Sort By Patient or Clerk: P// <Enter> ATIENT DEVICE: HOME// [Select Print Device] NON-VERIFIED PRESCRIPTIONS AS OF JUL 16,2007@14:49:54 SORTED BY PATIENT (# indicates Critical Drug Interaction) Patient name Page: 1 Rx # Issued Drug Entry By _____ OPPATIENT, FIVE 100001860A 04/01/04 ACETAMINOPHEN 1000MG TABLET 1000000028 OPPATIENT, FOUR 100001591A 07/27/98 ASPIRIN BUFFERED 325MG TAB 11733 OPPATIENT, ONE 100001853 10/23/02 ERYTHRITYL TETRANIT. 10MG TAB 10000000022 OPPATIENT, TWELVE 10000185411/25/02ACETAMINOPHEN 1000MG TABLET100001798A04/19/99INSULIN NPH U-100 INJ (PORK) 1000000022 100

Select Verification Option:

Non-Verified Counts [PSO NVCNT]

This option allows the user to obtain a count of the number of prescriptions remaining in a status of non-verified.

Example: Total of Non-verified prescriptions

```
Select Verification Option: NON-Verified Counts
DEVICE: HOME // [Select Print Device]
                       NON-VERIFIED PRESCRIPTION COUNTS
                            JUL 16,2007@14:57:34
TOTAL NUMBER OF NON-VERIFIED PRESCRIPTIONS : 12
NUMBER OF PATIENTS WITH ONE OR MORE NON-VERIFIED PRESCRIPTIONS : 9
(NOTE: Total number of patients listed here may not always equal the number at
the bottom, since some patients at the bottom may be counted more than once,
possibly having non-verified Rx's entered on different days.)
                   # of

Verifying ePharmacy Orders

Verifying an ePharmacy order is similar to finishing an order. After the user reviews the ePharmacy order and chooses to accept the order, the billing data is sent to ECME, which sends a message back to Outpatient Pharmacy displaying the status of the claim. The ECME section of the Activity Log is also updated.

Rx Verification by Clerk

[PSO VR]

The **Rx Verification by Clerk** [PSO VR] option and the **Patient Prescription Processing** [PSO LM BACKDOOR ORDERS] option incorporate the new **Process Order Checks** functionality when processing non-verified orders with critical drug interactions and dosing checks.

When utilizing the **Process Order Checks, Rx Verification by Clerk** [PSO VR] or **Patient Prescription Processing** [PSO LM BACKDOOR ORDERS] options and processing multiple critical drug interactions for non-verified orders, the following choices are possible:

Do you want to: 1. Cancel Rx #2476 DRUG: AMIODARONE 200MG TAB 2. Cancel Rx #2474 DRUG: WARFARIN 5MG TAB 3. Cancel Both 1 and 2 4. Activate Both 1 and 2 5. Leave Both Pending (do nothing) ?: 4 ACTIVATE 1 and 2

The term 'Activate' has changed to 'Process' and the term 'Pending' has changed to 'Non-verified'.

See output with changes below:

Do you want to: 1. Cancel Rx #2476 DRUG: AMIODARONE 200MG TAB 2. Cancel Rx #2474 DRUG: WARFARIN 5MG TAB 3. Cancel Both 1 and 2 4. Process Both 1 and 2 5. Leave Both Non-Verified (do nothing) ?: 4 Process 1 and 2

The List Non-Verified Scripts [[PSO VRPT] option now includes Dosage Checks.

Introduction

In CPRS, Order Checks occur by evaluating a requested order against existing patient data. Most order checks are processed via the CPRS Expert System. A few are processed within the Pharmacy, Allergy Tracking System, and Order Entry packages. Order Checks are a real-time process that occurs during the ordering session and is driven by responses entered by the ordering provider. Order Check messages are displayed interactively in the ordering session.

Order Checks review existing data and current events to produce a relevant message, which is presented to patient caregivers. Order Checks use the CPRS Expert System (OCX namespace), to define logical expressions for this evaluation and message creation. In addition to the expert system Order Checks have some hard-coded algorithms. For example, the drug-drug interaction order check is made via an entry point in the pharmacy package whereas Renal Functions for Patients 65 and Over is defined as a rule in the CPRS Expert System.

Order Check Data Caching

Data caching was recently added to improve the speed of order checks. Before data caching, order checks could be slow because each order check retrieved data from the other VISTA packages—even if the order checks used the same data. With data caching, the first order check in an ordering session retrieves data from other VISTA packages, uses the data to evaluate whether it should display a warning, and then stores the retrieved data in the ^XTMP("OCXCACHE" global for five minutes. The order checks that occur in the next five minutes can use the cached data, if it is the appropriate data, instead of retrieving data from the other packages. After five minutes, the cached data expires, and order checks must retrieve new data from the VISTA packages.

For example, before data caching was implemented, if an order check took 3 seconds to retrieve data from other VISTA packages, and there were 12 order checks, clinicians might wait 36 seconds to sign orders. With data caching, the first order check might take 3 seconds to retrieve the data, but subsequent order checks could use the cache and might take only .03 seconds each. That would be 3.33 seconds compared to 36 seconds. The numbers in this example are for illustration only and do not reflect real system speed. However, data caching should speed up order checks.

To avoid using all available disk space for storing data from order checks, there are several ways to clear the ^XTMP("OCXCACHE" global. ORMTIME removes data from the global when it runs. The suggested frequency for running ORMTIME is every 30 minutes, but not every site runs it that frequently. Kernel clean up utilities also remove data from the cache when they run, which is usually every 24 hours. If needed, users that have access to the programmer's prompt can manually clear the cache from that prompt by using PURGE^OCXCACHE.

(This page included for two-sided copying.)

Chapter 28: Error Messages

Error Level	Error Message	Reason	Why message is being displayed.
System	No Enhanced Order Checks can be performed.	Vendor Database cannot be reached.	The connectivity to the vendor database has gone down. A MailMan message is sent to the G. PSS ORDER CHECKS mail group when the link goes down and when it comes back up.
System	No Enhanced Order Checks can be performed.	The connection to the vendor database has been disabled.	A user has executed the Enable/Disable Vendor Database Link [PSS ENABLE/DISABLE DB LINK] option and disabled the interface.
System	No Enhanced Order Checks can be performed	Vendor database updates are being processed	The vendor database (custom and standard data) is being updated using the DATUP (Data Update) process.
Drug	Enhanced Order Checks cannot be performed for Local or Local Outpatient Drug: <drug name=""></drug>	Drug not matched to NDF	The local drug being ordered/ or on profile has not been matched to NDF. Matching the drug to a VA Product will eliminate this message.
Drug	Order Checks could not be done for Remote Drug: <drug name="">, please complete a manual check for Drug Interactions and Duplicate Therapy. Remote order indicator</drug>		If this error message is displayed, it means that the VA product that the local or remote drug being ordered/or on the local or remote profile does not have a GCNSEQNO or in rare cases, the GCNSEQNO assigned to the VA Product does not match up with a GCNSEQNO in the vendor database.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active Dispense Drug found	Highly unlikely that this error would be seen. At the time the order check was being performed the orderable item did not have an active dispense drug associated.

Error Level	Error Message	Reason	Why message is being displayed.
Drug	Enhanced Order Checks cannot be performed for Orderable Item: <oi NAME></oi 	No active, marked for IV Fluid Order Entry IV Additive/Solution found	The orderable item associate with an IV Fluid order did not have an active IV Additive/IV Solution marked for IV fluid order entry use at the time the order check was executed. This is another error the user will probably not see.

Error Information

The text in the error message and reason column will be displayed to the user. The type of error is displayed in column 1.

Two Levels of Error Messages

- System When such an error occurs no drug interaction or duplicate therapy order checks will be performed. Other order checks that do not use the COTS database (FDB) will still be performed such as allergy/ADRs, duplicate drug (for outpatient only) and new CPRS order checks, etc.
- Drug The second error level is for the drug and no drug interaction/duplicate therapy order checks will be performed for a specific drug. When you are processing an order, you may see a drug level error for a drug that is on the profile. This indicates that a drug interaction or duplicate therapy order check will not be performed for the drug in the order you are processing against this profile drug. Profile drug errors will only be shown once per patient session. So if you process several more orders, you will not see the error again. However, if you exit the option and at some later time reselect this patient to process new orders or take action on any existing orders, you will be shown the profile drug error once again.

If a drug level error occurs on the drug in the order you are processing, no profile drug errors will be displayed. No order checks (duplicate therapy or drug interaction) will occur for the processing drug (prospective drug). The only exception to this is when you are processing an IV order with multiple prospective drugs (i.e. multiple additives)

Chapter 27: Security Keys

A security key is a unique entry in the Security Key file (^DIC(19.1,) which may prevent access to a specific option or action by including the key as part of the option's entry in the Option file (^DIC(19,). Only users entered in the Holder field of the Security Key file may access the option or action.

New or Modified Security Keys

PSO TRICARE/CHAMPVA

PSO*7*385 renamed the PSO TRICARE security key to PSO TRICARE/CHAMPVA. Please see <u>TRICARE/CHAMPVA Eligible Outpatient Override Function</u> for further information on this security key.

PSO TRICARE/CHAMPVA MGR

PSO*7*385 renamed the PSO TRICARE MGR security key to PSO TRICARE/CHAMPVA MGR. Please see <u>TRICARE CHAMPVA Bypass/Override Report</u> for further information on this security key. (This page included for two-sided copying.)

Glossary

The following table provides definitions for common acronyms and t	terms used in this manual.
--	----------------------------

Acronym/Term	Definition
Action Profile	A list of all active and recently canceled or expired prescriptions for a patient sorted by classification. This profile also includes a signature line for each prescription to allow the physician to cancel or renew it.
Activity Log	A log, by date, of changes made to or actions taken on a prescription. An entry is made in this log each time the prescription is edited, canceled, reinstated after being canceled, or renewed. An entry will be made into this log each time a label is reprinted. A CMOP activity log will contain information related to CMOP dispensing activities.
ADD	Automated Dispensing Device
Allergy/ADR Information	Includes non-verified and verified allergy and/or adverse reaction information as defined in the Adverse Reaction Tracking (ART) package. The allergy data is sorted by type (DRUG, OTHER, FOOD). If no data is found for a category, the heading for that category is not displayed.
AMIS	Automated Management Information System
Answer Sheet	An entry in the DUE ANSWER SHEET file. It contains the questions and answers of a DUE questionnaire. This term is also used to refer to the hard copy representation of a DUE ANSWER SHEET entry.
API	Application Programming Interfaces
APSP	Originally Indian Health Service Pharmacy's name space now owned by the Outpatient Pharmacy software.
Bypass	Take no action on a medication order.
CHAMPVA	CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs) is a cost-shared health benefits program established for the dependents and survivors of certain severely disabled and/or deceased veterans.
СМОР	Consolidated Mail Outpatient Pharmacy.
CPRS	Computerized Patient Record System. CPRS is an entry point in VistA that allows the user to enter all necessary orders for a patient in different packages (e.g., Outpatient Pharmacy, Inpatient Pharmacy, etc.) from a single entry point.
Critical	Interactions with severe consequences that require some type of action (finding facts, contacting prescribers) to prevent potential serious harm.
DATUP	Data Update (DATUP). Functionality that allows the Pharmacy Enterprise Customization System (PECS) to send out custom and standard commercial- off-the-shelf (COTS) vendor database changes to update the two centralized databases at Austin and Martinsburg.

Acronym/Term	Definition
DEA	Drug Enforcement Agency
DEA Special Handling	The Drug Enforcement Agency special Handling code used for drugs to designate if they are over-the counter, narcotics, bulk compounds, supply items, etc.
DHCP	See VistA.
DIF	Drug Information Framework
Dispense Drug	The Dispense Drug name has the strength attached to it (e.g., Acetaminophen 325 mg). The name alone without a strength attached is the Orderable Item name.
Dosage Ordered	After the user has selected the drug during order entry, the dosage ordered prompt is displayed.
Drug/Drug Interaction	The pharmacological or clinical response to the administration of a drug combination different from that anticipated from the known effects of the two agents when given alone.
DUE	Drug Usage Evaluation
Expiration/Stop	The date on which a prescription is no longer active. Typically, this date is 30 days after the issue date for narcotics, 365 days after the issue date for other medications and 365 days after the issue date for supplies.
FDB	First DataBank
Finish	Term used for completing orders from Order Entry/Results Reporting V. 3.0.
GUI	Acronym for Graphical User Interface.
Issue Date	The date on which the prescription was written. This date is usually, but not always, the same as the first fill date. This date cannot be later than the first fill date.
HFS	Host File Server.
Health Insurance Portability and Accountability Act of1996 (HIPAA)	A Federal law that makes a number of changes that have the goal of allowing persons to qualify immediately for comparable health insurance coverage when they change their employment relationships. Title II, Subtitle F, of HIPAA gives HHS the authority to mandate the use of standards for the electronic exchange of health care data; to specify what medical and administrative code sets should be used within those standards; to require the use of national identification systems for health care patients, providers, payers (or plans), and employers (or sponsors); and to specify the types of measures required to protect the security and privacy of personally identifiable health care information. Also known as the Kennedy-Kassebaum Bill, the Kassebaum-Kennedy Bill, K2, or Public Law 104-191.
ЈСАНО	Acronym for Joint Commission on Accreditation of Healthcare Organizations
Label/Profile Monitor	A file for each printer which records, in the order in which they were printed, the last 1000 labels or profiles printed on that printer. This allows a

Acronym/Term	Definition
	rapid reprint of a series of labels or profiles that were damaged by a printer malfunction or other event.
Local Possible Dosages	Free text dosages that are associated with drugs that do not meet all of the criteria for Possible Dosages.
Medication Instruction File	The MEDICATION INSTRUCTION file is used by Unit Dose and Outpatient Pharmacy. It contains the medication instruction name, expansion and intended use.
Medication Order	A prescription.
Medication Profile	A list of all active or recently canceled or expired prescriptions for a patient sorted either by date, drug, or classification. Unlike the action profile, this profile is for information only and does not provide a signature line for a physician to indicate action to be taken on the prescription.
Medication Routes File	The MEDICATION ROUTES file contains medication route names. The user can enter an abbreviation for each route to be used at the local site. The abbreviation will most likely be the Latin abbreviation for the term.
Med Route	The method in which the prescription is to be administered (e.g., oral, injection).
NCCC	Acronym for National Clozapine Coordinating Center.
Non-Formulary Drugs	The medications, which are defined as commercially available drug products not included in the VA National Formulary.
Non-VA Meds	Term that encompasses any Over-the-Counter (OTC) medications, Herbal supplements, Veterans Health Administration (VHA) prescribed medications but purchased by the patient at an outside pharmacy, and medications prescribed by providers outside VHA. All Non-VA Meds must be documented in patients' medical records.
OPAI	Outpatient Pharmacy Automated Interface
Order	Request for medication.
Orderable Item	An Orderable Item name has no strength attached to it (e.g., Acetaminophen). The name with a strength attached to it is the Dispense drug name (e.g., Acetaminophen 325mg).
Partial Prescription	A prescription that has been filled for a quantity smaller than requested. A possible reason for a partial fill is that a patient is to return to the clinic in ten days but the prescription calls for a thirty-day supply. Partials do count as workload but do not count against the total number of refills for a prescription.
Payer	In health care, an entity that assumes the risk of paying for medical treatments. This can be an uninsured patient, a self-insured employer, or a health care plan or Health Maintenance Organization (HMO).
Pending Order	A pending order is one that has been entered by a provider through CPRS without Pharmacy finishing the order. Once Pharmacy has finished the order, it will become active.

Acronym/Term	Definition
Pharmacy Narrative	OUTPATIENT NARRATIVE field that may be used by pharmacy staff to display information specific to the patient.
Polypharmacy	The administration of many drugs together.
POE	Acronym for Pharmacy Ordering Enhancements (POE) project. Patch PSO*7*46 contains all the related changes for Outpatient Pharmacy.
Possible Dosages	Dosages that have a numeric dosage and numeric dispense units per dose appropriate for administration. For a drug to have possible dosages, it must be a single ingredient product that is matched to the DRUG file. The DRUG file entry must have a numeric strength and the dosage form/unit combination must be such that a numeric strength combined with the unit can be an appropriate dosage selection.
Prescription	This term is now referred to throughout the software as medication orders.
Prescription Status	A prescription can have one of the following statuses.
	 Active - A prescription with this status can be filled or refilled. Canceled - This term is now referred to throughout the software as Discontinued. (See Discontinued.) Discontinued - This status is used when a prescription was made inactive either by a new prescription or by the request of a physician. Discontinued (Edit) - Discontinued (Edit) is the status used when a medication order has been edited and causes a new order to be created due to the editing of certain data elements. Deleted - This status is used when a prescription is deleted. Prescriptions are no longer physically deleted from the system, but marked as deleted. Once a prescription is marked deleted no access is allowed other than view. Expired - This status indicates the expiration date has passed. *Note: A prescription that was canceled or has expired more recently than the date specified by the cutoff date, typically 120 days in the past, can still be acted upon. Hold - A prescription that was placed on hold due to reasons determined by the pharmacist. Non-verified - There are two types of non-verified statuses. Depending on a site parameter, prescriptions entered by a technician do not become active until a pharmacist reviews them. Until such review, they remain non-verified and cannot be printed, canceled or edited except through the <i>Verification</i> menu. The second non-verified status is given to prescriptions when a drug/drug interaction is encountered during the new order entry or editing of a prescription. Pending - A prescription that has been entered through OERR. Refill - A second or subsequent filling authorized by the provider. Suspended - A prescription that will be filled at some future date.
Progress Notes	A component of Text Integration Utilities (TIU) that can function as part of CPRS.
Provider	The person who authorized an order. Only users identified as providers who

Acronym/Term	Definition
	are authorized to write medication orders may be selected.
Reprinted Label	Unlike a partial prescription, a reprint does not count as workload.
Questionnaire	An entry in the DUE QUESTIONNAIRE file. This file entry contains the set of questions related to a DUE as well as the drugs being evaluated.
Schedule	The frequency by which the doses are to be administered, such as Q8H, BID, NOW, etc.
Sig	The instructions printed on the label.
Significant	The potential for harm is either rare or generally known so that it is reasonable to expect that all prescribers have taken this information into account.
Speed Actions	See Actions.
Suspense	A prescription may not be able to be filled on the day it was requested. When the prescription is entered, a label is not printed. Rather, the prescription is put in the RX SUSPENSE file to be printed at a later date.
Third (3 rd) Party Claims	Health care insurance claims submitted to an entity for reimbursement of health care bills.
Time In	This is the time that the patient's name was entered in the computer.
Time Out	This is the time that the patient's name was entered on the bingo board monitor.
TIU	Text Integration Utilities; a package for document handling, that includes Consults, Discharge summary, and Progress Notes, and will later add other document types such as surgical pathology reports. TIU components can be accessed for individual patients through the CPRS, or for multiple patients through the TIU interface.
TRICARE	 TRICARE is the uniformed service health care program for: active duty service members and their families retired service members and their families members of the National Guard and Reserves and their families survivors, and others who are eligible There are differences in how prescriptions for TRICARE beneficiaries are
	processed versus how prescriptions are processed for Veterans.
Units per Dose	The number of Units (tablets, capsules, etc.) to be dispensed as a Dose for an order. Fractional numbers will be accepted for medications that can be split.
VistA	Acronym for Veterans Health Information Systems and Technology Architecture, the new name for Decentralized Hospital Computer Program (DHCP).
Wait Time	This is the amount of time it took to fill the prescription. It is the difference between Time In and Time Out. For orders with more than one prescription, the wait time is the same for each.
