Introduction

DESCRIPTION:

With the release of reminder update 119, the instrument used in screening for PTSD was changed from PC-PTSD-5+I9 to PC-PTSD-5. Along with this, the result group was also changed from PXRМ PC-PTSD-5+I9 RESULT GROUP to PXRМ PTSD RESULT GROUP. Within this new group, the positive sequence Result Element had a condition of I SCORE>2 which implies that a score of 3 is positive. This was also transferred to the corresponding progress note with verbiage that a score of 3 was positive. In MHA, the result displayed as the score of 3 being negative which was inconsistent. In Accordance to VA guidelines, a PTSD screening score of 4 or more constitutes a positive screen. In this update, we have created new Result Elements and a Result Group and added this new result group to dialog element VA-MH PC-PTSD+I9 SCREEN. This update corrects the scoring and progress note text. This is an emergency install.

UPDATE_2_0_119A contains 1 Reminder Exchange entry:

UPDATE_2_0_119A VA-PTSD SCREENING UPDATE

The exchange file contains the following components:

MH TESTS AND SURVEYS

PC-PTSD-5

HEALTH FACTORS
