Save this info for the post install, it will make adding information back post -install easier if your site has made local edits. Not all sites will have made local edits to these dialog groups.

If you have made significant local edits to these dialog groups, you can also create a local dialog group that contains each of these items as sequences in that group and then create a reminder exchange file to back this group up. After installing, you can install that exchange file after installation of this update. Embedded below are instructions to do this.

*****If you create a local dialog group for backup of these components, do not include the group VAL-GP COVID ASSESSMENT LAB TESTS, for this group, you will need to inquire and save this specific group pre-install and re-do any local changes post install. *****
