POST-INSTALLATION.....	13

Introduction

DESCRIPTION:

This reminder update sends out an updated version of the Covid Immunization reminder definition and a dialog component that is discussed below.

173L makes updates to the VA-SARS-COV-2 IMMUNIZATION reminder dialog, reminder definition and associated progress note template.

Updates are being made to prompt for booster doses of Moderna, second doses of Janssen vaccine and to facilitate and guide documentation for mix and match.

This is a very complicated update and you must follow the instructions completely.

You should back up all of your lot numbers for Pfizer, Moderna and J&J and then add them back in post install. The below link are the instructions for doing this that were included with the 173K release and can be used for this backup also.

<https://REDACTED /COVID-19 LOCAL BACKUP 173K.pdf>

Reminder Logic Updates:

- Booster dose due 6 months after a completed primary series of Moderna vaccine for anyone age 65 and over or who is age 50+ and at high risk of severe disease. (same group as Pfizer booster that was part of 173K).
- Second dose of Janssen vaccine due for all who received dose more than 2 months ago.
- Combinations of vaccines will also resolve the reminder – this has been part of the logic in the past but is now enabled.
- Mental health conditions are added to the list of diagnoses for high risk of severe disease per change in CDC guidelines.

3 new reminders are added to allow branching logic to display guidance for the most common scenarios and what booster options are available.

1. 2 prior doses of Moderna, last dose over 6 months ago, not immunocompromised
2. 2 prior doses of Pfizer, last dose over 6 months ago, not immunocompromised
3. 1 prior dose of Janssen, last dose over 56 days ago.

The reminders that control the branching logic for these informational messages are:

VAL-BL COVID-19 BOOSTER MODERNA

VAL-BL COVID-19 BOOSTER PFIZER

VAL-BL COVID-19 BOOSTER JANSSEN

And the template fields that control the informational message for each of these are:

IM SARS COV-2 C2 BOOSTER INFO
IM SARS COV-2 D2 BOOSTER INFO
IM SARS COV-2 A1 BOOSTER INFO

Reminder Dialog Updates:

- Branching logic is included to display booster information guidance from the template fields listed above. These can be modified locally.

Example:

```
BOOSTER DOSE GUIDANCE:  
  
A COVID-19 Pfizer 2-dose primary series appears to be completed (see above).  
A booster dose is recommended 6 months or more after the primary series.  
  
As a booster dose, this patient may receive a half-dose booster of Moderna,  
a full-dose booster of Pfizer vaccine, or a dose of Janssen vaccine.  
  
Record this 3rd dose (booster dose) as series 3 for whichever vaccine is chosen.
```

- Vaccine series are now counted by patient dose of any COVID-19 vaccine and not separately counted by manufacturer. Dose 1 of any vaccine is series 1, a second dose of any vaccine is series 2, and a 3rd dose of any vaccine, even if different, is series 3.
- Dose 1, 2, 3 for Pfizer and Moderna are suppressed if the dose has been given already and since these are now considered interchangeable, Pfizer will suppress Moderna options and Moderna will suppress Pfizer options.
- Janssen dose 1 will also suppress series 1 and 2 for Pfizer and Moderna since any mRNA dose given after an initial dose of Janssen is considered a booster dose if given 2 months or more after the initial Janssen dose. After a single dose of Janssen, the only option that will show for Moderna and Pfizer is for a booster dose and that dose will be a half-dose for Moderna and both will be defaulted to series 2.
 - o Not all of these series suppression will occur in the historical section since outside doses may not have followed VA guidance.
- The booster dose message in the dialog for patients 65+ or 50+ with underlying conditions now also shows for Moderna recipients in this new update in addition to Pfizer recipients which was part of 173K.
- The immunosuppressed message now only shows for mRNA recipients or patients who have had no vaccine administered.

Thank you to the following test sites who installed and tested this reminder update:

New Mexico VA Health Care System (Albuquerque)
VA Nebraska Western Iowa Health Care System
Ralph J Johnson VA Medical Center (Charleston)
Aleda E. Lutz VA Medical Center (Saginaw)
VA Maryland Health Care System (Baltimore)
James J Peters VA Medical center (Bronx)

Pre-Install

1. You should have installed update 173J and 173K prior to installing this update.
2. Back up all your lot numbers as described previously
https://REDACTED/COVID-19_LOCAL_BACKUP_173K.pdf
– this update WILL OVERWRITE all your lot numbers and you will need to re-install them after installing this update. Find the previously packed lot numbers in the Reminder Exchange file entries and repack it to update it – use the Repack (RP) command to pack a fresh copy.
3. Any local modifications to template fields or to the dialog will be overwritten. Please make note of your local modifications and evaluate whether they are still needed or valid prior to re-entering them in the post-install.
4. Terms that are likely to have local mappings are highlighted in yellow above and **you should not overwrite those**. Make a note of those.

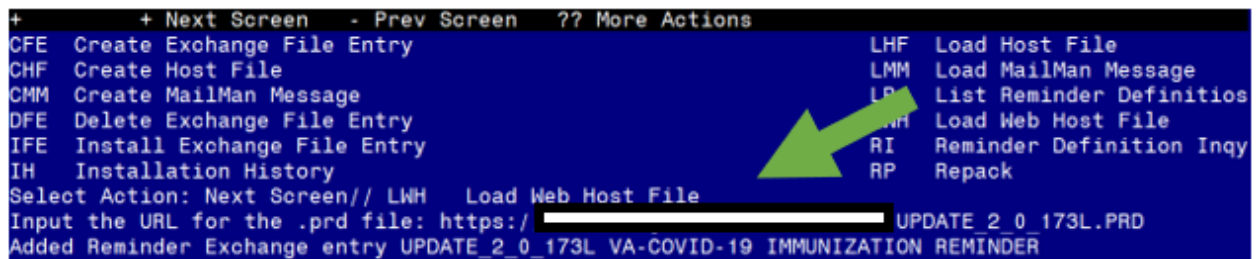

Install Details

This update is being distributed as a web host file. The address for the host file is:
https://REDACTED/UPDATE_2_0_173L.PRD

The file will be installed using Reminder Exchange, programmer access is not required. This update can be loaded with users on the system. Installation will take less than 5 minutes

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

```
+      + Next Screen  - Prev Screen  ?? More Actions
CFE  Create Exchange File Entry      LHF  Load Host File
CHF  Create Host File                 LMM  Load MailMan Message
CMM  Create MailMan Message           LPH  List Reminder Definitios
DFE  Delete Exchange File Entry       LWH  Load Web Host File
IFE  Install Exchange File Entry      RI   Reminder Definition Inqy
IH   Installation History              RP   Repack
Select Action: Next Screen// LWH  Load Web Host File
Input the URL for the .prd file: https://[REDACTED] UPDATE_2_0_173L.PRD
Added Reminder Exchange entry UPDATE_2_0_173L VA-COVID-19 IMMUNIZATION REMINDER
```

At the **Select Action:** prompt, enter **LWH** for Load Web Host File
At the **Input the url for the .prd file:** prompt, type the following web address:

https://REDACTED/UPDATE_2_0_173L.PRD

You should see a message that the file was successfully loaded.

```
https://[REDACTED]/UPDATE_2_0_173L.PRD successfully loaded.
```

Install complete.

Post-Installation

1. Reinstall your lot numbers from the backup exchange file created in the pre-install.
2. Re-enter any required local modifications.
3. Disable any dialog groups for vaccine types not in use at your site – E.g. if you are exclusively a Moderna & Janssen site, then disable the reminder dialog group for Pfizer: VAL-SARS-COV-2 VACCINE ADMIN D2 GP
4. If you use the scribe option, then re-enable it.
