Department of Veterans Affairs

Table of Contents

Introduction

DESCRIPTION:
There will be one cover sheet reminder – print name, COVID-19 Immunization. You will need to add this to your cover sheet in the post install.

The previous reminders/dialogs, COVID-19 Primary series and COVID-19 Booster have been inactivated/disabled. Print names for both of these have also been prefixed with ZZ

The new reminder will be due on all patients who have:
      not received a COVID-19 bivalent dose of vaccine
              and
      have never had a COVID-19 monovalent vaccine
       or
      it has been at least 56 days since their last COVID-19 monovalent vaccine

If they have received a non-bivalent vaccine in the last 56 days, the reminder will be in the Not Applicable folder until after 56 days.

The reminder will resolve with an administration of a **single bivalent dose** or a documented allergy with a VIMM form contraindication.

The current cohort logic **does not** include the permissive recommendations of a 2nd bivalent dose for ages over 65 or for certain immunocompromised diagnosis.
The provider can at their clinical discretion provide a second dose to these populations. The reminder can be opened from the applicable folder or the note template can be used to document additional doses even if the reminder is not due, the user would need to change the series to 2 or 3 as appropriate.

UPDATE_2_0_173Y contains 1 Reminder Exchange entry:

UPDATE_2_0_173Y VA-COVID IMMUNIZATION UPDATE

Install Details

This update is being distributed as a web host file.
The file will be installed using Reminder Exchange, programmer access is not required.
This update can be loaded with users on the system. Installation will take less than 5 minutes
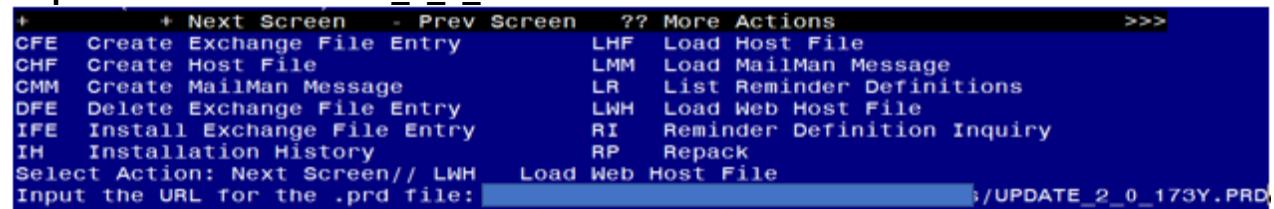

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

At the **Select Action:** prompt, enter **LWH** for Load Web Host File
Copy and pasted the below text.
https://redacted/UPDATE_2_0_173Y.PRD

```
+         + Next Screen   - Prev Screen   ?? More Actions                >>>

Select Action: Next Screen// Q
```

You will then be returned to this screen. At the **Select Action** prompt, type **Q.**

Install complete.

Post-Installation

1. Review the dialogs to make sure only the vaccine options that your site administers show as available to administer. (Moderna Bivalent and Pfizer Bivalent options will be enabled upon install, Novavax and Janssen are disabled upon install)
   a. Disable any dialog groups for vaccine types not in use at your site – E.G., if you are exclusively a Moderna & Janssen site, then disable the reminder dialog groups for Pfizer and enable the Janssen option.

2. Make sure that the reminder definition VA-SARS COV-2 IMMUNIZATION print name COVID-19 Immunization is assigned to the CPRS cover sheet at the appropriate level (This replaces the two that were previously assigned to your cover sheet).

3. Open the reminder and confirm the version displays as 4.1

4. Review the dialog group VAL-SARS-COV-2 VACCINE ORDERING GP, if your site uses the reminder dialog to place an order, you can add the order or order set for the appropriate bivalent COVID-19 formulation as a finding to this group or to the subcomponents/elements contained in that group.
