Introduction

DESCRIPTION:

The consult process set forth in this guide was developed to support the guidance in “Meeting the Challenge of Pandemic Influenza: Ethical Guidance for Leaders and Health Care Professionals In the Veterans Health Administration”. The possible use of this process for Scarce Resource Allocation (SRA) during the current COVID-19 Pandemic was directed in a memo from the VHA Executive in Charge, Dr. Richard A. Stone, titled “Crisis Standards of Care in VHA during the COVID-19 Pandemic”, dated April 8, 2020. This memo authorizes the establishment and implementation of “crisis standards of care” in specific circumstances. This process is only to be implemented during specific conditions, when directed by facility and/or VISN leadership. However, the processes need to be built, tested, and ready to implement by all facilities so that when it is needed and authorized, it is ready to implement.

The TXML templates to be attached to the consult orders have been upgraded based upon input from users and a development team to allow for an option to annotate the individual data pieces that are used in the SRA Sequential Organ Failure Assessment (SOFA) scoring (e.g., respiratory, coagulation, liver, cardiovascular, central nervous system, renal). The only major change to the reminder dialog for the SRA Consult Note is a change to the link to the guidance document, which is now - [Ethics Guidance for Pandemics 2020](https://REDACTED/Ethics_Guidance_for_Pandemics_2020.pdf) -https://REDACTED/Ethics_Guidance_for_Pandemics_2020.pdf.
