Introduction

The Suicide Prevention Telehealth Interfacility Consult (IFC) and Intake Assessment template were developed by the Veterans Health Administration Office of Mental Health and Suicide Prevention (OMHSP) in collaboration with subject matter experts within the SP 2.0 Clinical Telehealth Workgroup. These notes were designed to create a referral system within the Veterans Integrated Service Network (VISN) Clinical Resource Hubs (CRH) for Veterans with a history of suicidal self-directed violence to receive suicide-prevention psychotherapy interventions via telehealth.

Referring providers (LIPs) located in spoke telehealth facilities from general mental health, specialty mental health, residential mental health and inpatient mental health will complete the referring IFC. Suicide Prevention Telehealth psychiatrists, psychologists, social workers and licensed professional mental health counselors located in the HUB site of the Clinical Resource Hubs will receive and respond to the consults using the Intake Assessment Template. The purpose of the templates is to use health factors to capture data, accurately track wait times and collect information about the referral sources and triage responses.

2. Setup of Note Title.

The note title to create to associate with this template is:

SUICIDE PREVENTION TELEHEALTH INTAKE ASSESSMENT

Note: *The note title does not contain the word 'consult' to maintain uniformity across intra- and interfacility referrals.*

Note: *Comprehensive information on Creating new Document Classes and Titles can be found beginning on page 54 of the TIU/ASU Implementation Guide at the following link: [http://www.va.gov/vdl/documents/Clinical/CPRS-Text_Integration_UTILITY_\(TIU\)/tiuim.pdf](http://www.va.gov/vdl/documents/Clinical/CPRS-Text_Integration_UTILITY_(TIU)/tiuim.pdf)*

- a. CRH host site setup (if your facility supports or is integrated with a CRH):
VHA Enterprise Standard Title: **TELEHEALTH CONSULT**

You can add this to your CONSULTS document class.

b. Spoke site setup:

VHA Enterprise Standard Title: **MENTAL HEALTH TELEHEALTH NOTE**

You can add this to the document class containing your psychology note titles. Do *not* add this to your CONSULTS document class because the IFC will be completed by CRH staff using a separate pointer note within the CRH host site VistA instance.

Note: The pointer note documentation process is further described on page 27 of the Clinical Resource Hub Operations Manual at the following link:

REDACTED

Note: This is an internal website that is not available to the public.

3. **Add your local data objects.**

Add your local data objects for patient address and patient phone numbers to the dialog text of the following reminder dialog elements:

- a. VAL-OSP TH INTAKE EMERGENCY INFO VTH PHONE
- b. VAL-OSP TH INTAKE EMERGENCY INFO VTH PT LOCATION HOME

Using the menu Reminder Dialog Management, Reminder Dialogs, change your view to Elements.
