INSTALL EXAMPLE 5

POST INSTALLATION 9

Introduction

Description: Banner Version 6 changes

1. **Resolved Clinically takes precedence:** in v5, if patient had an indicator of “Resolved Clinically” and their positive PCR test was over 14 days old, the banner would display as “Prior Positive”. Any prior positive PCR over 14 days old would cause the banner to display as “Prior Positive” unless a new positive test was entered.

With V6, the entry of a health factor indicating “Resolved Clinically” will take precedence unless there is a new positive PCR that is more than 60 days after an entry of “Resolved Clinically”. An entry of “Resolved Clinically” will affect the banner display permanently for any patient who has a prior positive PCR unless there is a new PCR positive that is more than 60 days after the “Resolved Clinically”.

If there is no entry of “Resolved Clinically”, then the banner will continue to use the “Prior Positive” display after 14 days.

If an entry of ‘Resolved Clinically’ is present, it will continue to display into the future instead of reverting to ‘Prior Positive’.

COVID-19	Resolved Clinically: 3/4/2021	Positive test: 3/4/2021
-----------------	--------------------------------------	--------------------------------

In this example, the patient had a positive PCR in March 2020 and then it was entered that they were ‘Resolved Clinically’. After that entry, the patient tested positive again by PCR on 5/11/20. The ‘Resolved Clinically’ is what is displayed since the new positive is still within 60 days of the entry of clinical resolution of illness.

COVID-19	Resolved Clinically: 3/23/2020	Positive test: 5/11/2020
-----------------	---------------------------------------	---------------------------------

Then the patient is re-infected and tests positive in July 2020. The banner would have displayed for 2 weeks as ‘POSITIVE’. If no other entries are made after that new positive, then the banner looks like this 14 days after the positive test.

COVID-19	Prior Positive	Outside Test: 7/14/2020
-----------------	-----------------------	--------------------------------

This status could be updated to ‘Resolved Clinically’ at any time with entry of that health factor even many months later.

2. **A positive Antigen test will display:**

If there is a positive antigen test and it is the most recent test and there is no more recent indication of " Resolved Clinically", the positive antigen test will display in the banner.

There are 4 possible options for display - the first 3 display if the positive antigen test was done in the past 14 days:

- a. Antigen Test Positive
- b. Antigen Test Positive PCR test collected, results pending:
- c. Antigen Test Positive PCR test pending collection:
- d. Prior Antigen Test Positive

Once the PCR is resulted, then that is what will display instead of the Ag test. A positive antigen test will display instead of "Resolved Clinically" until a new "Resolved Clinically" is entered or a PCR is resulted.

Example of (a)

If a PCR is pending and not received in the lab – as in c. above.

- 3. A negative Antigen or Negative self-reported outside COVID-19 PCR will display as “testing Completed – see details” instead of “Not tested”.
 - a. The results will show when you click on the banner to see the detailed information.

- 4. **The detailed display text has been expanded** to include:
 - a. A section for COVID-19 immunizations
 - b. A section for site specified orderable items that can be used for orders for isolation/precautions or for other COVID-19 related orderable items that a site wants to display in the details. Only pending or active orders will display and there is a limit of 6. This is optional.

The description of COVID-19 RESOLVED in the COVID-19 STATUS ADJUSTMENT template was also updated:

```
3. COVID-19 RESOLVED - Converts a CPRS banner of POSITIVE to
RESOLVED CLINICALLY.
- Resolved clinically will display until there is a positive
  test resulted 60 days or later after this status is entered.
- Do not use this option for a patient who was not KNOWN to
  have COVID-19.
- This option is used to indicate that the patient's
  illness has resolved based on CDC criteria -
  Severe/Critical Illness
  a. At least 24 hours have passed since resolution of
    fever without the use of fever-reducing medications
    AND
  b. Improvement in respiratory symptoms (e.g., cough,
    shortness of breath);
    AND
  c. At least 20 days have passed since symptoms first appeared.

  Mild/Moderate Illness or Asymptomatic
  a. At least 24 hours have passed since resolution of
    fever without the use of fever-reducing medications
    AND
  b. Improvement in respiratory symptoms (e.g., cough,
    shortness of breath);
    AND
  c. At least 10 days have passed since symptoms first appeared
    or positive test
```

UPDATE_2_0_194 contains 1 Reminder Exchange entry:

UPDATE_2_0_194 VA-COVID-19 CPRS STATUS VERSION 6

The exchange file contains the following components:

HEALTH FACTORS

Install Details

This update is being distributed as a web host file. The address for the host file is:

https://REDACTED /UPDATE_2_0_194.PRD

The file will be installed using Reminder Exchange, programmer access is not required.

Installation:

=====

This update can be loaded with users on the system. Installation will take less than 5 minutes.

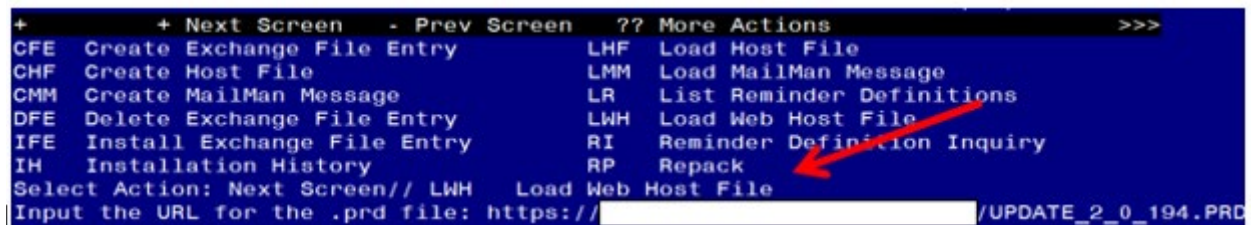

Pre-Install

Using the Vista menu, Reminder Term management, Term Inquiry, inquire and save the following reminder terms for reference post install. If you follow the install guide closely, your mapping should be preserved.

1. VA-COVID-19 PCR LAB RESULTS NEGATIVE
2. VA-COVID-19 PCR LAB RESULTS POSITIVE
3. VA-COVID-19 PCR LAB ORDERS
4. VA-COVID-19 PCR/AG LAB RESULTS
5. VA-COVID-19 ANTIBODY LAB TEST

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

```
+          + Next Screen  - Prev Screen  ?? More Actions  >>>
CFE  Create Exchange File Entry  LHF  Load Host File
CHF  Create Host File             LMM  Load MailMan Message
CMM  Create MailMan Message       LR   List Reminder Definitions
DFE  Delete Exchange File Entry   LWH  Load Web Host File
IFE  Install Exchange File Entry  RI   Reminder Definition Inquiry
IH   Installation History         RP   Repack
Select Action: Next Screen// LWH  Load Web Host File
Input the URL for the .prd file: https://[REDACTED]/UPDATE_2_0_194.PRD
```

At the **Select Action:** prompt, enter **LWH** for Load Web Host File

At the **Input the url for the .prd file:** prompt, type the following web address:

https://REDACTED/UPDATE_2_0_194.PRD

You should see a message at the top of your screen that the file successfully loaded.

```
https://vaww.va.gov/reminders/docs/UPDATE_2_0_194.PRD successfully loaded.
```

Search for and locate the reminder exchange entry titled UPDATE_2_0_194 VA-COVID-19 COVID-19 CPRS STATUS VERSION 6.

Select Action: Next Screen// IA		

At the **Select Action** prompt, type **IA** for Install all Components and hit enter.

Select Action: Next Screen// **IA Install all Components**

During the installation, you will see several prompts:

Install all new components

MERGE any existing REMINDER TERM components that you are prompted to overwrite with one exception, for this term **VA-COVID-19 OUTSIDE PCR LAB**

POSITIVE you should **overwrite**

REMINDER TERM entry named **VA-COVID-19 OUTSIDE PCR LAB POSITIVE** already exists but the packed component is different, what do you want to do?

Select one of the following:

- C Create a new entry by copying to a new name
- M Merge findings
- O Overwrite the current entry
- U Update
- Q Quit the install
- S Skip, do not install this entry

Enter response: **O// overwrite the current entry**

Are you sure you want to overwrite? **N// Y**

OVERWRITE the reminder definition component

****Note: if you are installing in your TEST account, the immunization file may not have the COVID-19 immunization entries and you will get prompted to replace those finding items, you can replace them in your TEST account with any other immunization.*

You will be prompted to install the reminder dialog component – You will choose to install all even though some components may have an X to indicate that they exist.

Post Installation

Review the following terms from the pre-install and edit to add your local items if needed, if you chose to merge instead of overwrite during the installation, no changes should be needed:

1. **VA-COVID-19 PCR LAB RESULTS NEGATIVE**
This term should only contain lab test (LT) findings for COVID-19 PCR lab tests
2. **VA-COVID-19 PCR LAB RESULTS POSITIVE**
This term should only contain lab test (LT) findings for COVID-19 PCR lab tests
3. **VA-COVID-19 PCR LAB ORDERS**
This term should only contain orderable items (OI) findings for COVID-19 PCR lab test orderable items
4. **VA-COVID-19 PCR/AG LAB RESULTS**
This term should only contain lab test (LT) findings for COVID-19 PCR and COVID-19 Antigen lab tests
5. **VA-COVID-19 ANTIBODY LAB TEST**
This term should only contain lab test (LT) findings for COVID-19 ANTIBODY Tests

There are two new reminder terms that can be mapped

1. **VA-COVID-19 AG LAB RESULTS POSITIVE**
Add your local lab test (LT) findings for COVID-19 antigen tests

2. VA-COVID-19 RELATED ORDERABLE ITEMS FOR BANNER DISPLAY

This term is optional for use.

Any orderable item added to this term will display in the detailed display of the CPRS banner. This can be used for active and pending orders for infection control precautions by adding the orderable items for those precautions that a site decides to display in the details of the banner click event.

If a site needs to use this to display prior orders for monoclonal antibody treatment, then you may need to set a time period in the begin date such as T-90D and add other statuses for those orderable items (expired, active, pending, etc).

Do not add drug findings to this term - the CSUB object is set for orderable items only.
