VA-COLORECTAL CANCER SCREENING UPDATE

Install Guide

July 2021

Table of Contents

Introduction

The four colorectal screening reminders were released in 2017 as Clinical reminder Update_2_0_9 and updated with Update_2_0_94. This reminder update includes updates/additions to the VA-CRC Average Risk reminder definition.

The following changes are in this update:

1. The VA-CRC AVERAGE RISK baseline frequency changed to 45yo to meet new guidelines to begin CRC screening at age 45.
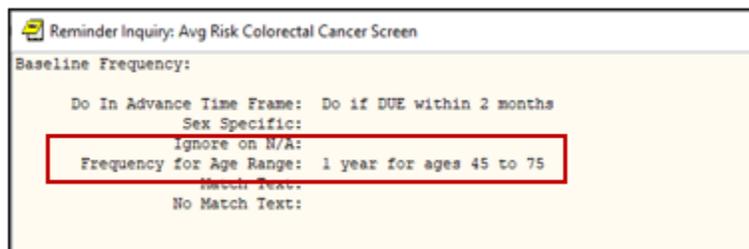

2. All reminder dialog options with branching logic based on age have been updated to the new guidelines. The options below will now display for patients 35yo and older, instead of beginning at age 40. These options are in the VA-CRC COLONOSCOPY AVG RISK, VA-CRC WAITING FOR RECOMMEND GAP, VA-CRC COLONOSCOPY FOLLOW UP REMINDER, VA-CRC COLON SCREENING DOCUMENTATION reminder dialogs.

    Note: The age range has changed in the following terms, however, the reminder term name has not changed. Changing the name to match the new age range would have installed new terms, which would have required remapping throughout the dialogs. The decision was made to keep the existing names to reduce the amount of remapping at local sites.
