# Introduction

---

The National ED and Geriatrics group released the Geriatric Emergency Department Note Template (Clinical Reminder Update\_2\_0\_227) on September 16, 2021. The following changes are needed based on feedback from the field after implementation.

## Summary of Changes:

1. Corrected placement of one of the health factors- VA-GERI ED ISAR HELP REG.
2. Upon opening each screen there is the option to Defer or Perform. This was in response to all of the questions needing to be answered prior to Defer being selected in the last version.
3. Health factors added to several options.
4. Free text boxes were added throughout.
5. Re-sequenced the local orders placeholder. This was in response to the scoring and place order being mutually exclusive

For questions, contact Danielle Cosentino (REDACTED).

1. Using the pre-install inquiry, add local orders/enable reminder dialog groups for referrals – OPTIONAL

Each screening tool has the option to add local orders for referrals if needed.

There is a reminder dialog group located at the end of each screen. The purpose of these reminder dialog groups is to allow local editing and addition of consults or other orderable items in response to the screen result. Your site should determine what if any referral options should be offered based on positive screens.

The reminder dialog groups below are currently **not** disabled, If you do not need these options enabled, you can edit them and disable. The dialog text can be modified as needed.

- VAL-GP ISAR ORDERS
- VAL-GP DTS ORDERS
- VAL-GP BCAM ORDERS
- VAL-GP MINI ORDERS
- VAL-GP KATZ ORDERS
- VAL-GP STEADI ORDERS
- VAL-GP CAREGIVER ORDERS

2. There is an option on the deferral options to document the reason for deferral. This element is enabled but can be disabled at your site if you do not want your users to enter a reason why, you can disable the reminder dialog element VAL-DEFER TEXT.
