Introduction

UPDATE_2_0_321 contains 1 Reminder Exchange entry: **UPDATE_2_0_321 VA-TERATOGENIC MEDS ORDER CHECKSUPDATE 2022_03**

The Teratogenic Medications Order Check Interim Solution was originally released as VistA patch PXRМ*2*22 in July 2012. The interim solution is intended to have regular updates for clinical content, primarily to add newly approved medications that have a noted risk during pregnancy and that warrant an order check. This update, UPDATE_2_0_321 represents the third update in 2022.

- Drugs added to the pregnancy order checks and lactation level 1 order check are the result of routine review and update from First Databank for new medications that have a risk to the fetus or breastfeeding child.
- Lamotrigine has been removed from the order check as it is associated with the lowest risk of congenital malformations among the antiepileptic drug class.

Below are the changes:

1. Reminder order check group VA-WH HIRISK MEDICATIONS (LACTATION LEVEL 1) GROUP updated.

The following DG (Drug Generic) findings were added to the ORDER CHECK ITEM LIST:

ABROCITINIB
AMOXICILLIN/CLARITHROMYCIN/VONOPRAZAN
AMOXICILLIN/VONOPRAZAN
BRINCIDOFOVIR
FLORTAUCIPIR F-18
LEVOKETOCONAZOLE
OTESECONAZOLE
PACRITINIB
TEBENTAFUSP-TEBN
TECOVIRIMAT

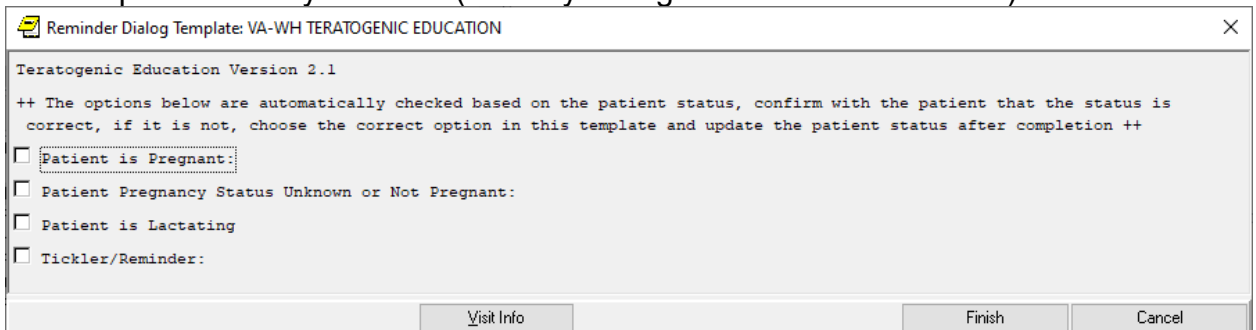

2. Reminder order check groups updated:
VA-WH HIRISK MEDICATIONS (MOD/HIGH RISK DURING PREGNANCY) GROUP
VA-WH HIRISK MEDICATIONS (MODERATE/HIGH RISK) GROUP

The following DG (Drug Generic) findings were added to the ORDER CHECK ITEM LIST:

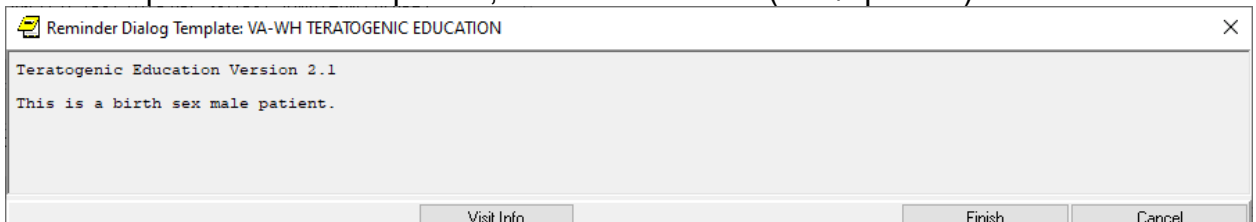

BRINCIDOFOVIR
LONAFARNIB
OTESECONAZOLE

The following DG (Drug Generic) findings were removed from the ORDER CHECK ITEM LIST:
LAMOTRIGINE

3. The reminder order check VA-NALOXONE FOR OPIOID USE DISORDER was updated to shorten the Display Name. The updated display name is: NALOXONE RECOMMENDED FOR OPIOID OR STIMULANT USE DISORDER
4. The reminder dialog VA-WH TERATOGENIC EDUCATION was updated so that if it is opened on a patient with birth sex male, it will not display the options to document counseling.
 - a. If opened on a female patient, it will look like this with the appropriate options already checked (the only change is the version number):

- b. If opened on a male patient, it will look like this (new/updated):

Pre-Installation

Prior to installing this Update:

1. Using the VistA menu, **ROC Reminder Order Check Menu , RI Reminder Order Check Rule Inquiry**, review the STATUS of the reminder order check VA-NALOXONE FOR OPIOID USE DISORDER.

If your site is using this reminder order check and the status is PROD, you will need to put this back into PROD mode after install.

2. Clinical Reminder Update_2_0_284 Teratogenic Medications Update 2022_02 should be installed before installing this update. Review the install history in reminder exchange to confirm that you have installed.

The Install Guide is available at the following link: REDACTED as this is an internal VA site.

Installation:

This update can be loaded with users on the system. Installation will take less than five minutes.

The file will be installed using Reminder Exchange, programmer access is not required.

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

```
+      + Next Screen  - Prev Screen  ?? More Actions
CFE Create Exchange File Entry          LHF Load Host File
CHF Create Host File                    LMM Load MailMan Message
CMM Create MailMan Message              LR  List Reminder Definitios
DFE Delete Exchange File Entry          LWH Load Web Host File
IFE Install Exchange File Entry         RI  Reminder Definition Inqy
IH  Installation History                RP  Repack
Select Action: Next Screen// LWH Load Web Host File
Input the URL for the .prd file: https://[REDACTED]/UPDATE_2_0_321.PRD
```

At the **Select Action:** prompt, enter **LWH** for Load Web Host File

At the **Input the url for the .prd file:** prompt, type the following web address:

https://REDACTED /UPDATE_2_0_321.PRD

You should see a message at the top of your screen that the file successfully loaded. Navigate to the exchange entry named UPDATE_2_0_321 VA-TERATOGENIC MEDS ORDER CHECKSUPDATE 2022_03

```
+Item  Entry                               Source                               Date Packed
