POST INSTALLATION FOR CURRENT PHASER SITES..... 8

POST INSTALLATION FOR NEW PHASER SITES 8

Introduction

This update installs the following modifications to the National Office of Pharmacogenomics' "Pharmacogenomic Testing for Veterans (PHASER)" Program template:

- Update language in the pharmacogenomic (PGx) testing information and consent text
- Revise 5 result groups (CYP2C19, CYP2D6, SLCO1B1, TPMT, and VKORC1)
- Create 5 new result groups (ABCG2, CYP2B6, G6PD, NUDT15, and UGT1A1)
- Add the ability to indicate the PGx testing was originally conducted at another VA site of care (This will facilitate PGx results data entry at sites of care other than the original. Until we succeed in publishing PGx data in the National Health Data Repository, this will allow our automated clinical decision support to fire at any known VA site of care for a given patient)
- Make visible again outdated phenotype selections associated with older gene testing panels to facilitate data entry of all PGx results – including results from older test panels that may have been conducted at other VA sites of care for a given patient
- Update language in results section progress note text
- Improve layout of note template and resulting note written to record
- Remove previous restriction on direct access to PGx order

This template is mandatory for use at engaged sites. Site engagement will be rolled out nationally in planned increments. All sites should ensure the template is installed. POC is REDACTED.

PHASER VA Provider information and Site Deployment Materials: REDACTED (only accessible within the VA firewall). PHASER public website: www.cancer.va.gov/phaser.asp

UPDATE_2_0_334 contains 1 Reminder Exchange entry:
UPDATE_2_0_334 VA-PGX (PHASER) TEMPLATE UPDATE

The exchange file contains the following components:

REMINDER DEFINITION

REMINDER DIALOG

Pre-Install

1. For sites who are current PHASER participants:
 - a. do an inquiry on the following element and take note of the quick order name used for ordering the lab test: VA-EL PHASER ORDER PT AGREES
 - b. do an inquiry to the reminder term VA-PGX AUTHORIZED STAFF and keep this information in case it is needed post-install.

Install Details

This update is being distributed as a web host file. The address for the host file is:
https://REDACTED /UPDATE_2_0_334_1.PRD

The file will be installed using Reminder Exchange, programmer access is not required.

Installation:

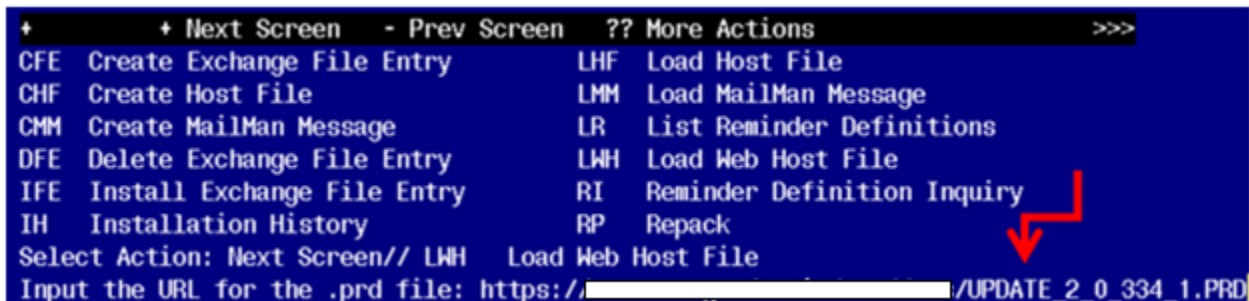

=====

This update can be loaded with users on the system. Installation will take less than 5 minutes.

Install Example

If your site is unable to use LWH functionality, use VistA mail to install the exchange file.

To Load the Web Host File. Navigate to Reminder exchange in Vista

At the **Select Action:** prompt, enter **LWH** for Load Web Host File

At the **Input the url for the .prd file:** prompt, type the following web address:

https://REDACTED/UPDATE_2_0_334_1.PRD

https://[REDACTED]/UPDATE_2_0_334_1.PRD successfully loaded.

You should see a message at the top of your screen that the file successfully loaded

Search for and locate a reminder exchange entry named **UPDATE_2_0_334 VA-PGX (PHASER) TEMPLATE UPDATE**.

Item	Entry	Source	Date Packed

```

You will be returned to this screen. Type **Q** to quit.
Install Completed

Note: If your site is NOT a participating PHASER site, you do not need to proceed to the Post Install steps. No further action is needed.

Post Installation for CURRENT PHASER Sites

1. Look at the element VA-EL PHASER ORDER PT AGREES. If it is no longer mapped, re-map the quick order you identified in the pre-install steps as an Additional Finding. DO NOT REMOVE the national health factor that is mapped.
2. Look at the reminder term VA-PGX AUTHORIZED STAFF. Compare with your inquiry from pre-install and re-map the User Class if necessary. If you MERGED this term, there should be no changes that need to be made.
3. Going forward, the PHASER test can be ordered outside of the Pharmacogenomics Note. Documentation of verbal consent is still required, but providers will no longer be required to use the note to document that consent and access the order. Because of this, follow the instructions below to REMOVE the restriction on the laboratory test. Starting from the “Manage orderable items” option:

Select Manage orderable items Option: QO Enter/edit QO restriction

Select an ORDERABLE ITEM (meds or labs only): Name of your site's PHASER test here

Select the type of usage for which you wish to restrict ordering of this item.

Usage: LABORATORY

QO ONLY: YES// @

SURE YOU WANT TO DELETE? Y (Yes)

Usage: <enter>

4. If your site previously added an ordering menu directing staff to order through the Pharmacogenomics Note, this can be removed. Further, if a “dummy” PHASER lab test had been added to the lab package, sites will want to contact their LIM to have the “dummy” order inactivated.
5. Sites can now make the PHASER test quick order available on ordering menus as requested. For example, sites with a “Common Lab Test” ordering menu could add the quick order to that menu.

Post Installation for NEW PHASER sites (only needs to be done if site did not complete the post-install instructions)

from Update 206)

1. **Make the Dialog templates available to be attached to a Personal or Shared template or to be able to attach the dialog to a progress note title. If this has been done in the past, you will not need to repeat.**

From the Reminders Manager Menu:

Select Reminder Managers Menu Option: **CP CPRS Reminder Configuration**

- CA Add/Edit Reminder Categories
- CL CPRS Lookup Categories
- CS CPRS Cover Sheet Reminder List
- MH Mental Health Dialogs Active
- PN Progress Note Headers
- RA Reminder GUI Resolution Active
- TIU TIU Template Reminder Dialog Parameter**
- DL Default Outside Location
- PT Position Reminder Text at Cursor

Select CPRS Reminder Configuration Option: **TIU TIU Template Reminder Dialog Parameter**

Reminder Dialogs allowed as Templates may be set for the following:

- 1 User USR [choose from NEW PERSON]
- 3 Service SRV [choose from SERVICE/SECTION]
- 4 Division DIV [choose from INSTITUTION]
- 5 System SYS [NATREM.FO-SLC.MED.VA.GOV]

Enter selection: **5** *Choose the appropriate number for your site. Your site may do this by System or other levels. The example below uses SYSTEM level*

Setting Reminder Dialogs allowed as Templates for System:

Select Display Sequence: **?**

- 148 VA-VETERANS CHOICE NOTE
- 149 VA-TBI SCREENING
- 151 VACO TRANSPLANT REFERRAL (D)

*When you type a question mark above, you will see the list of #'s (with dialogs) that are already taken. Choose a number **NOT** on this list. For this example, looking above I see the number 150 is not present, so I will use 150.*

Select Display Sequence: **150**

Are you adding 150 as a new Display Sequence? Yes// **Y YES**

Display Sequence: 150// **<Enter>**

Clinical Reminder Dialog:

VA-PHARMACOGENOMIC TESTING FOR VETERANS Enter>

OK? Yes// <Enter> (Yes)

2. Setup of Note title. If this has been done previously, you do not need to repeat.

The new note title that needs to be created is:

PHARMACOGENOMICS NOTE

This note title is to be mapped to the following VHA Enterprise Standard Title:

HEMATOLOGY AND ONCOLOGY NOTE

Comprehensive information on Creating Document Definitions can be found beginning on page 47 of the

3. Associate the reminder dialog with the note title in CPRS

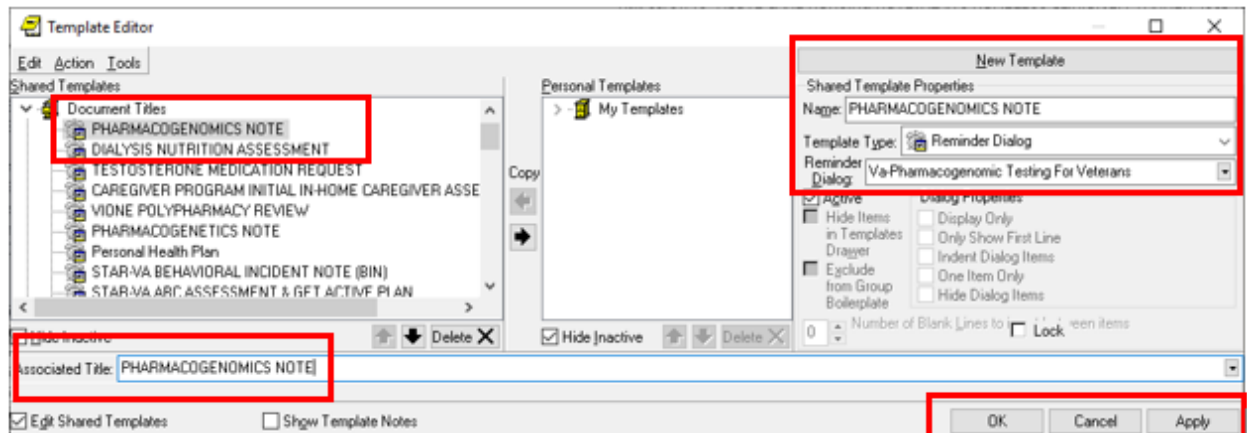

To do this, go to Template Editor, then Document Titles, select the appropriate folder (if applicable), and choose New Template (top right-hand corner).

Type in the following information:

Name: **PHARMACOGENOMICS NOTE**

Template Type: Reminder Dialog

Reminder Dialog: **VA-PHARMACOGENOMIC TESTING FOR VETERANS**

Next, type in the Associated Title, which in this case is **PHARMACOGENOMICS NOTE** and hit Apply.

For TECHNICAL questions regarding any of the remaining Post-Install steps, please contact:
REDACTED
REDACTED

4. Create a NEW User Class and Set up Group to be Viewable Only for Specific User Class:

In the template, only trained personnel should be able to record lab panel results into patients' charts. To facilitate this, sites need to create a new user class called **PGX AUTHORIZED STAFF**.

After creating PGX AUTHORIZED STAFF, assign this to staff at your site who will be authorized to enter lab results in patients' charts through the template.

Steps to Create User Class:

From User Class Management Menu:

--- User Class Management Menu ---

- 1 User Class Definition
- 2 List Membership by User
- 3 List Membership by Class
- 5 Manage Business Rules

Select User Class Management Option: **1** User Class Definition

Select User Class Status: ACTIVE// **<enter>** Active

Start With Class: FIRST// **<enter>**

Go To Class: LAST// **<enter>**

Searching for the User Classes.....

Select SUBCLASS: <enter>.....

**** record the pharmacogenomic test results into patients' charts. ****

Map User Class into Reminder Term:

After creating and assigning the User Class to appropriate staff, navigate to the Reminder Term **VA-PGX AUTHORIZED STAFF** and map the user class into the Computed Finding Parameter of Finding #1 (VA-ASU USER CLASS).

By doing this, VistA will suppress the group VA-GP PHASER TEST RESULTS if the person using the template does *not* have the PGX AUTHORIZED STAFF User Class.

5. Creating/Attaching Laboratory Test Quick Order

The pharmacogenomic lab panel is to be available for ordering through this template.

Below are instructions for building the quick order AND for attaching the quick order as a finding item to the appropriate element.

Use your facility's naming convention for this order. Although the quick order can be set to auto-accept if desired, it is recommended to set this to 'no'.

The following example demonstrates setting auto-accept to no.

Creating quick order:

From the Order Menu Management Option:

OI	Manage orderable items ...
PM	Enter/edit prompts
GO	Enter/edit generic orders
QU	Edit personal quick orders by user
ST	Enter/edit order sets
AC	Enter/edit actions
MN	Enter/edit order menus

AO Assign Primary Order Menu
 CP Convert protocols
 SR Search/replace components
 LM List Primary Order Menus
 DS Disable/Enable order dialogs
 CS Review Quick Orders for Inactive ICD9 Codes
 MR Medication Quick Order Report
 CA Quick Order Mixed-Case Report
 CO Create Clinic Order QOs from Inpatient QOs
 CV Convert IV Inpatient QO to Infusion QO
 DF Quick Order Free-Text Report
 FR IV Additive Frequency Utility
 SP SUPPLY COVERSION UTILITY MENU ...

Select Order Menu Management Option: **QO** Enter/edit quick orders

Select QUICK ORDER NAME: **LRZ PGX PANEL ONCE SP AA** (use naming convention here)

Are you adding 'LRZ PGX PANEL ONCE SP AA' as a new ORDER DIALOG? No// **Y** (Yes)

TYPE OF QUICK ORDER: **LABORATORY**

NAME: LRZ PGX PANEL ONCE SP AA Replace <enter>

DISPLAY TEXT: **Pharmacogenomics Panel** VERIFY ORDER: **NO** DESCRIPTION:

Edit? NO// **Hit 'Y' to enter a description here if your facility does this; otherwise hit <enter>**

Lab Test: **Type in the name of the lab test here**

SEND TO LAB - Means the patient is ambulatory and will be sent to the Laboratory draw room to have blood drawn.

WARD COLLECT - Means that either the physician or a nurse will be collecting the sample on the ward.

LAB BLOOD TEAM - Means the phlebotomist from Lab will draw the blood on the ward. This method is limited to laboratory defined collection times.

SP Send patient to lab
 WC Ward collect & deliver
 LC Lab blood team

Collected By: **SP** Send patient to lab

Collection Sample: BLOOD // <enter>

Collection Date/Time: <enter>

Urgency: **ROUTINE** (can change to STAT according to facility's process)

How often: **ONCE**

Lab Test: Name of lab panel here
 Collected By: Send patient to lab
 Collection Sample: BLOOD
 Specimen: BLOOD
 Collection Date/Time: TODAY
 How often: ONCE

(P)lace, (E)dit, or (C)ancel this quick order? PLACE// <enter>

Auto-accept this order? NO// <enter>

Attaching quick order as finding item to element:

Below are the steps to add your quick order to the appropriate element.

Element name: **VA-EL PHASER ORDER PT AGREES**

6. Establish an IFC Pharmacogenomics E-Consult

An interfacility (IFC) e-consult is being implemented as part of the PHASER Program. The IFC will provide facilities participating in the Program with a means to communicate with the PHASER program regarding assistance in interpretation of results of pharmacogenomic test results as well as additional questions regarding program participation. The IFC will serve as a means of provider to provider communication and no direct patient care services will be rendered by this e-consult.

A. CREATE the IFC PHARMACOGENOMICS E-CONSULT Service

SS Set up Consult Services [GMRC SETUP REQUEST SERVICES]

SERVICE NAME: **IFC PHARMACOGENOMICS E-CONSULT**

- C. IMPORT** the IFC reason for request template and link to the consult.

REDACTED

Click the IFC PHARMACOGENOMICS ECONSULT_4CAC box shown below.

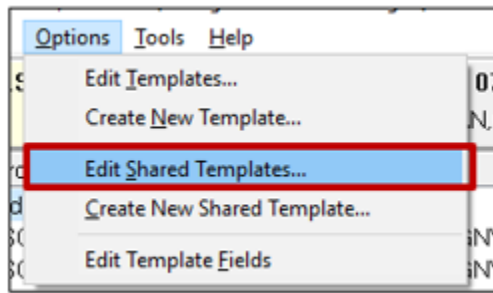

Click “Download” when the screen below displays. DO NOT click “Open”.

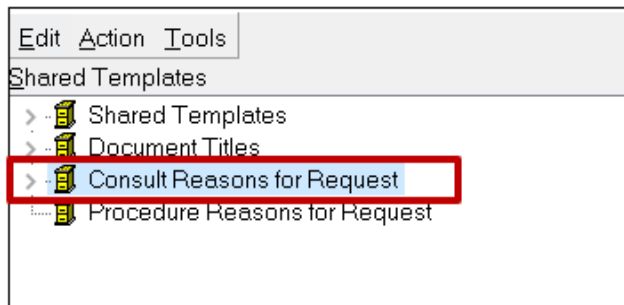

When given the option to Save, save the TXML template to your Desktop.

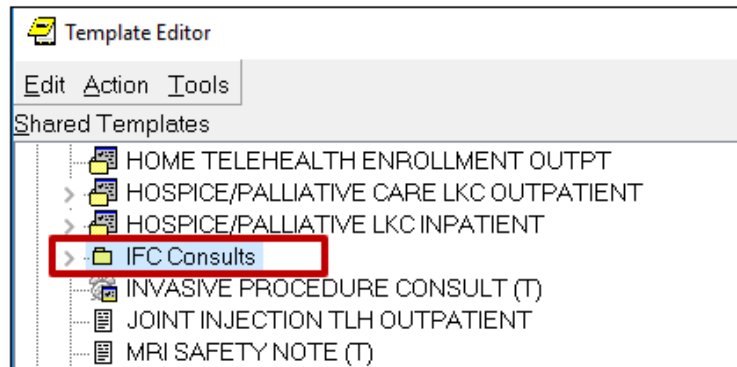

In CPRS Notes tab on the Tools bar, click on Options → Edit Shared Templates...

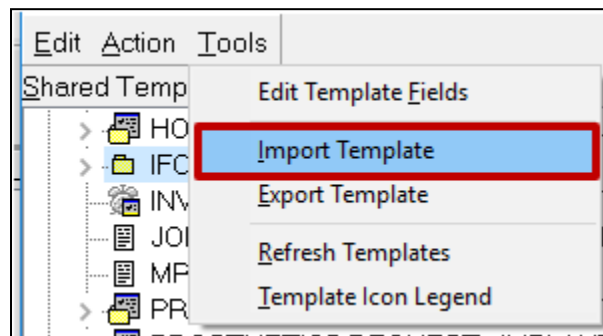

In CPRS Template Editor, go to the Consult Reasons for Request folder. Click on the Consult Reasons for Request to highlight it and expand this folder by double-clicking on the name or clicking on the 'triangle' to left of the folder name.

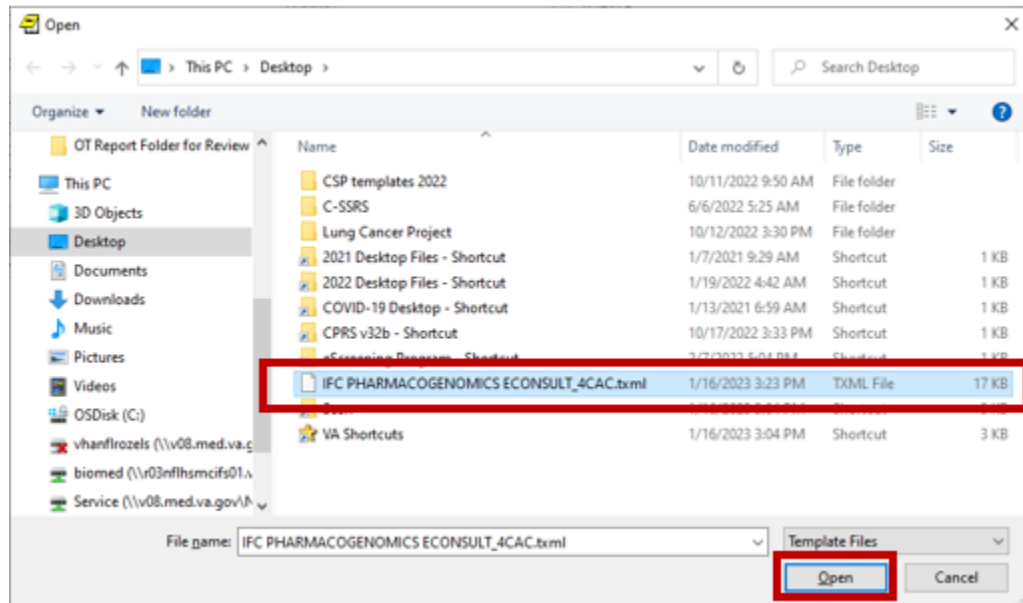

Select the folder you wish to add the consult template to (in this example – IFC Consults).

On the Tools bar, select Tools → Import Template

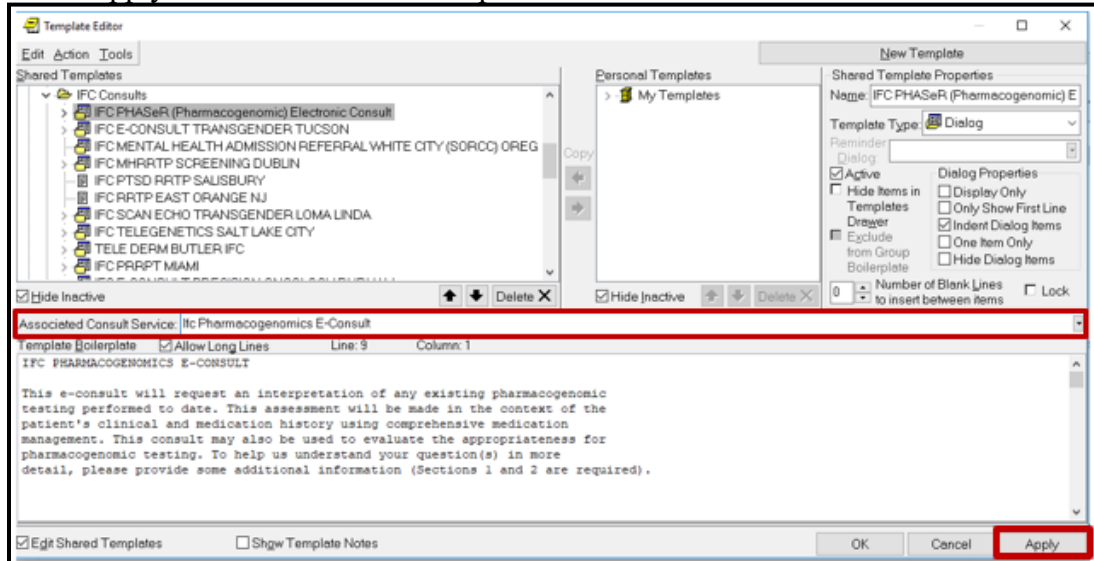

Select the template from where you saved it and click on 'Open' to import the template.

Select the template by clicking on it. In the Associated Consult Service box, type:

IFC PHARMACOGENOMICS E-CONSULT

Click Apply to save and link the template to the consult service.

D. CREATE a quick order for the consult service

Use your site's naming convention for the quick order.

Select Order Menu Management Option: **QO** Enter/edit quick orders

Select QUICK ORDER NAME: **GMRCTZ IFC PHARMACOGENOMICS E-CONSULT**

Are you adding 'GMRCTZ IFC PHARMACOGENOMICS E-CONSULT' as a new ORDER DIALOG? No// **Y** (Yes)

TYPE OF QUICK ORDER: **CONSULTS**

NAME: GMRCTZ IFC PHARMACOGENOMICS E-CONSULT Replace <enter>

(P)lace, (E)dit, or (C)ancel this quick order? PLACE//
Auto-accept this order? NO//

Work with your local stakeholders to ensure this quick order is placed in all ordering menus/locations that will be conducive to local workflow processes.

E. Notify Durham VAMC to coordinate configuration on their side (as a receiving site). Email REDACTED to notify that your site is adding this IFC. They will need your site's *station number* to add your site to Durham's set-up

F. TEST the IFC configuration

After Durham has added your site to their set-up, test the IFC configuration to ensure it has been successfully configured.

Select Consult Management Option: **IFC** IFC Management Menu

TI	Test IFC implementation
LI	List incomplete IFC transactions
IFC	IFC Requests
TR	IFC Transaction Report
LK	Locate IFC by Remote Cslt #
BK	Monitor IFC background job parameters
AI	Print All Incomplete IFC Transactions
EP	Edit IFC Processing Parameters
IP	IFC Requests By Patient
IR	IFC Requests by Remote Ordering Provider
MP	Configure test account patients for IFC
PI	Print IFC Requests

Select IFC Management Menu Option: **TI Test IFC implementation**

Select one of the following:

P	procedure
C	consult service

Would you like to test a procedure or consult service: **Consult service**

Select the Consult service that you'd like to test: **IFC PHARMACOGENOMICS E-CONSULT**

attempting to connect to remote system...

Congratulations! You're configured correctly.

Would you like to test another implementation? **N**

If you see an error message, please work with the host site to correct any configuration issues.

G. SUPPORT

For questions/issues about the CLINICAL CONTENT of the template/consult, contact:

REDACTED
For TECHNICAL issues/problems regarding the template/consult, please contact:

7. Setting up PHARMACOGENOMICS NOTE as a Posting

This step is optional but *highly recommended* to increase visibility of the patient's Pharmacogenomics information. To set up the PHARMACOGENOMICS NOTE as a Posting with auto-demotion set-up, follow the steps below. If your site does not typically support Postings of this type, please notify REDACTD (PHASER Program Manager) at:
REDACTED

A. Move PHARMACOGENOMICS NOTE to the CLINICAL WARNING document class

B. Create a second note title that will be used as the auto-demotion target title
Document Class: **ONCOLOGY SERVICE** (or similar equivalent)
Name: **PHARMACOGENOMICS NOTE - HISTORICAL**
VHA Enterprise Standard Title: **HEMATOLOGY AND ONCOLOGY NOTE**

**** Important: Leave this second note title in a status of INACTIVE to avoid having it show up in CPRS as a note title to choose ****

C. Auto-Demotion Setup

To finish the Auto-Demotion Setup for this note, navigate to the Text Integration Utilities (MIS Manager) menu in VistA.

- MIS Managers Menu ---
- 1 Individual Patient Document
 - 2 Multiple Patient Documents
 - 3 Print Document Menu ...
 - 4 Search for Selected Documents
 - 5 Statistical Reports ...
 - 6 Unsigned/Uncosigned Report
 - 7 Missing Text Report
 - 9 Signed/unsigned PN report and update
 - 10 UNKNOWN Addenda Cleanup
 - 11 Missing Expected Cosigner Report
 - 12 Mark Document as 'Signed by Surrogate'
 - 13 Mismatched ID Notes
 - 14 TIU 215 ANALYSIS ...
 - 15 Transcription Billing Verification Report
 - 17 CWAD/Postings Auto-Demotion Setup

Select Text Integration Utilities (MIS Manager) Option: **17** CWAD/
Postings Auto-Demotion Setup
