Since the VA-AES ACUTE INPATIENT NSG SHIFT ASSESSMENT shares groups and elements that are within the VA-AES NSG FREQUENT DOCUMENTATION, updates to shared data elements will update both templates.

The **VA-AES DIALOGS** contains national health factors that were developed to promote uniformity of data, and facilitation of reports to meet directives, policies, and regulatory metrics that support the characteristics of a high reliability organization. These national health factors are standardized and must be loaded without modification. A complete list of health factors and the corresponding text within can be found at the following link:

The template and Health Factors may not be changed or revised at the local level. Requests to add elements to the note must go through the approval process outlined in the SOP.

***Please Note:***

For questions or feedback on the templates, please utilize the REDACTED. For training questions please refer to the REDACTED. VAAES Contingency forms are available on the REDACTED.
