Introduction

UPDATE_2_0_54 contains 1 Reminder Exchange entry: **UPDATE_2_0_54 VA-TERATOGENIC MEDICATIONS ORDER CHECKS (Update#4)**

The Teratogenic Medications Order Check Interim Solution was originally released as Vista patch PXR*2*22 in July 2012. The interim solution is intended to have regular updates for clinical content, primarily to add newly approved medications that have a noted risk during pregnancy and that warrant an order check. This update, UPDATE_2_0_54 represents the fourth such update. This update adds dolutegravir and dolutegravir-containing medications to the 'Known or Potential Teratogen (EXTREME Risk-to-Benefit Ratio)' order check in support of the FDA's announcement and based upon a National PBM Bulletin dated May 31 2018.
