Introduction

UPDATE_2_0_6 contains 1 Reminder Exchange entry: **UPDATE_2_0_6 VA-TERATOGENIC MEDICATIONS ORDER CHECKS (Update#3)**

The Teratogenic Medications Order Check Interim Solution was originally released as Vista patch PXR*2*22 in July 2012. The interim solution is intended to have regular updates for clinical content, primarily to add newly approved medications that have a noted risk during pregnancy and that warrant an order check. This update, UPDATE_2_0_6 represents the third such update. Included in this update are new medications, and order check text changes consistent with changes by FDA in that Pregnancy Categories are no longer used.
