Update_2_0_8

Clinical Reminders

MH Reminder Updates

INSTALLATION and SETUP GUIDE

February 2017

Product Development
Department of Veterans Affairs

Contents

Introduction

Many changes have been made to the MH clinical reminders and associated dialogs. We have also included a new national follow up reminder for positive PTSD/Depression as a combination clinical reminder and associated dialog. The follow-up for positive alcohol screen dialog has been updated completely to the DSM5 language.

DEPRESSION SCREENING
REQUIREMENTS: Effective October 1, 2016, the PHQ-2 is the required instrument for the purpose of completing annual screening for depression.
BACKGROUND:
VHA implemented annual screening for depression as a requirement for patients active in primary and MH care starting in 2002. Over time, the requirements have been modified, and the national clinical reminder is being updated to match current performance measure requirements.
In 2006, VA implemented a two-step screening approach, utilizing the PHQ-2 as the accepted screening instrument, and following positive screens with a PHQ-9. However, this proved to be very burdensome to staff, with complexity sufficient to interfere with effective screening. Requirements were modified to allow either the PHQ-2 or the PHQ-9, but all administrations of the selected screening instrument that are positive require a suicide risk evaluation.
In support of measurement based care in treatment of depression, the PHQ-9 is being utilized as the symptom monitor for depression. This means that patients being treated for depression are receiving regular PHQ-9's as part of their routine depression care. Initial implementation is occurring in FY17, but this will be expanded to all sites over time. Sites that have used the PHQ-9 as their screening instrument for depression are experiencing problems when administrations of the PHQ-9 used for clinical symptom monitoring trigger a requirement for suicide risk evaluation.
RATIONALE: VHA depression screening requirements are to screen for depressive symptoms at the overall population level. For this purpose, the PHQ-2 has been demonstrated to be a valid and reliable instrument that works as well as the PHQ-9 or other, longer instruments. The argument can certainly be made that a longer instrument gives more information, but it is important to weigh a number of variables, including the purpose of the assessment, the value added by the additional questions versus the burden on providers and patients, and what you are going to do with the information. It is important to recognize that this is a high level screen, and all positive screening results require a follow-up assessment for depression that includes a suicide risk evaluation. This screen is to detect the presence of depressive symptoms. It is not intended to be sufficient to make a diagnosis of depression or screen for suicidal ideation.

UPDATE_2_0_8 includes the following: Note: the text highlighted is not part of the actual name.

1. Reminders Definitions:
    VA-DEPRESSION SCREENING (updated)
    VA-PTSD SCREENING (updated)
    VA-ALCOHOL USE SCREEN (AUDITC) (updated)

VA-ALCOHOL AUDIT-C POSITIVE F/U EVAL (updated)
VA-FOLLOW-UP POS PTSD/DEP COMBINATION (new)

2. Reminder Dialog
VA-DEPRESSION SCREEN (updated)
VA-PTSD SCREENING (updated)
VA-ALCOHOL USE SCREENING (AUDIT-C) (updated)
VA-AUD-C POS BRIEF ALCOHOL COUNSELING (updated)
VA-FOLLOW-UP POS PTSD/DEP COMBINATION (new)

3. Reminder Taxonomies
VA-AUD DIAGNOSIS (new)
VA-DEMENTIA DIAGNOSIS (new)
VA-DEPRESSION DX OUTPT VISIT (updated)
VA-PTSD DX OUTPT VISIT (updated)
VA-TERMINAL CANCER PATIENTS (no change)

4. Terms
VA-PRIOR SUICIDE
VA-NO PRIOR SUICIDE ATTEMPT
VA-SUICIDE PLAN
VA-NO SUICIDE PLAN
VA-SUICIDAL THOUGHTS
VA-NO THOUGHTS OF SUICIDE
VA-HOPELESSNESS
VA-NO HOPELESSNESS
VA-PTSD/DEPRESSION ASSESSMENT COMPLETE
VA-PTSD/DEPRESSION SCREEN POS
VA-BL FOLLOW-UP POS PTSD/DEP COMBINATION
VA-BL SHOW COMBINED PTSD/DEPRESSION DISPO
VA-BL SHOW PTSD DISPO
VA-BL SHOW DEPRESSION DISPO
VA-MH ACUTE ILLNESS
VA-REFUSED DEPRESSION SCREENING
VA-DEP PHQ2
VA-COGNITIVE IMPAIRMENT
VA-DEPRESSION DIAGNOSIS
VA-VETERAN PATIENT
VA-PTSD DIAGNOSIS
VA-LIFE EXPECTANCY < 6 MONTHS
VA-REFUSED PTSD SCREEN
VA-PTSD SCREEN
VA-SEX
VA-BL AUDIT-C >7
VA-BL AUDC 5 SAFE LIMITS

VA-AUD DIAGNOSIS
        VA-SUD CLINIC VISIT
        VA-ALCOHOL NONE PAST 1YR
        VA-ALC MEDICAL PROBLEMS
        VA-ALC USE INTERVENTIONS
        VA-ALCOHOL USE INFORMATION
        VA-REFUSED ALCOHOL SCREENING
        VA-ALCOHOL USE SCREEN

5. Health Factors (only listing new HF's)
        VA-PTSD/DEP OTHER DISPOSITIONS
        VA-REFUSE INTERVENTION PTSD/DEP
        VA-MANAGE PTSD/DEP IN PRIMARY CARE
        VA-OUTSIDE EVAL/TREATMENT FOR PTSD/DEP
        VA-CURRENT F/U OR RX FOR PTSD/DEP SCRN
        VA-NO INTERVENTION FOR PTSD/DEP SCRN
        VA-ALCOHOL OTHER
        VA-ALCOHOL REFER TO SUD PROGRAM
        VA-ALCOHOL REFER TO PCMHI
        VA-ALCOHOL TREAT IN PRIMARY CARE
        VA-ALCOHOL SELF HELP/AA MEETINGS
        VA-ALCOHOL USE AND MEDICAL PROBLEMS
        VA-ALCOHOL ABSTAIN OTHER ADVICE

6. TIU Template Field (only listing new template fields)
        VA-MH FREQ
        VA-MH WHEN
        VA-SUD CGP

7. Health Summary Type (no new Health Summary Types)

8. Education Topics (no new Education Topics)

Reminder Definition changes:

VA-DEPRESSION SCREENING: (updated)
  1. VA-DEMENTIA DIAGNOSIS taxonomy was added to VA-COGNITIVE IMPAIRMENT term. This term was changed to a 1Y exclusion instead of permanent exclusion.
  2. PHQ-9 will not resolve this reminder any longer, only the PHQ-2

VA-PTSD SCREENING: (updated)
  1. VA-DEMENTIA DIAGNOSIS taxonomy was added to VA-COGNITIVE IMPAIRMENT term. This term was changed to a 1Y exclusion instead of permanent exclusion.

VA-ALCOHOL USE SCREEN (AUDIT C): (updated)

1. VA-DEMENTIA DIAGNOSIS taxonomy was added to VA-COGNITIVE IMPAIRMENT term. This term was changed to a 1Y exclusion instead of permanent exclusion.

2. updated broken URL

3. added URL for SUD CPG

4. changed instrument to optional open/required complete or cancel

5. modified PXRM AUDC Result group to add two new results:

   1: negative
   2: positive, score 3 or 4 for F, 4 for M--new pop up message, brief intervention not required. Updated PXRM AUDC RESULT ELEMENT 2
   3: positive, score of 5-7, new pop up message, brief intervention required. PXRM AUDC RESULT ELEMENT 3
   4: positive, score of >7, new pop up message, bi required, further eval recom PXRM AUDC RESULT ELEMENT 4

VA-FOLLOW-UP POS PTSD/DEP COMBINATION: (new)

1. This definition was added as a national replacement for the 2 reminder definitions/dialogs that are possibly being used at your site. This reminder will be DUE NOW if *either* the Depression Screen or the PTSD screen are positive. The dialog uses branching logic to guide the users based on patient data in their chart.   It was decided to streamline reminders by combining into 1 definition/dialog. The 2 definitions this replaces are below. You may not have these in your system as they are NOT national content.
   a. EVALUATION OF + DEPRESSION SCREEN
   b. EVALUATION OF + PTSD SCREEN
2. Definition is linked to dialog **VA-FOLLOW-UP POS PTSD/DEP COMBINATION** (NEW)

VA-ALCOHOL AUDIT-C POSITIVE F/U EVAL: (updated)

1. Print name of this reminder was changed from "Pos Alcohol Scrn:" to "Follow-up Pos Alcohol"
2. Replaced definition URL from:
   http://pubs.niaaa.nih.gov/publications/Practitioner/CliniciansGuide2005/clinicians_guide.htm   to:
   http://www.healthquality.va.gov/guidelines/MH/sud/
3. Associated dialog updated to meet DSM5 criteria
4. Added new branching logic to require offer of treatment for pts with score of >7 and AUD diagnosis.
5. Added new branching logic to toggle display of safe drinking limits based on gender
6. Removed VA-GP ALC SCREEN and replaced with VA-GP ALC OFFER TREATMENT to give providers multiple options for pts instead of just referral to specialty treatment programs
7. Part of the cohort logic is for patients with AUD diagnosis within last year and any AUDC score greater than 0 but less than 5

Install Details

This update is being distributed as a web host file. The address for the host file is:
http://vista.med.va.gov/reminders/UPDATE_2_0_8.PRD

The file will be installed using Reminder Exchange, programmer access is not required.

Installation:
=============
This update can be loaded with users on the system. Installation will take less than five minutes.

Note: You may not see exactly what is listed in the install example.   The rules to follow are:
1. Print or save a copy of the reminder definition inquiries prior to installing.
2. If there is a new component, use the INSTALL action.
3. If there is an existing TERM, but the incoming one is different, use the MERGE action. This will keep you from overwriting your mapped items in the term.
4. If a component, other than a TERM exists, but the incoming one is different, use the OVERWRITE action.
5. There is a known bug when installing taxonomies. You will be prompted that the component is different regardless of whether it is or not. Always use the OVERWRITE action. If the taxonomy is new, use the INSTALL action (see item 2 above)
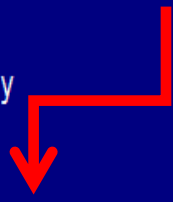

Pre-Install

1. Print or save reminder inquiry for the following reminder definitions to remap to any terms if necessary. If you have a locally built reminder for any MH screenings or follow-up, print or save the reminder inquiry.
   a) VA-DEPRESSION SCREENING
   b) VA-PTSD SCREENING
   c) VA-ALCOHOL USE SCREEN (AUDIT-C)
   d) VA-ALCOHOL AUDIT-C POSITIVE F/U EVAL
   e) Evaluation of + Depression Screen (local and may not exist in your system)
   f) Evaluation of + PTSD Screen (local and may not exist in your system)

Install Example

To Load the Web Host File. Navigate to Reminder exchange in Vista

```
